20 Powerful Lessons for Today's Leaders from America's 16th President St. Martin's Press

The author, who is well known in conditioning circles, has penned a how to text that covers a wide spectrum of conditioning activities. The book is well illustrated with many photos and is divided into 33 chapters. The first five chapters give the reader a background into the authors extensive experience as an athlete and coach along with a brief history of strength and conditioning focusing on weightlifting. The next seven chapters focus on program design and it is here that the authors European background becomes evident in the areas of warm-up, general physical preparation and restoration. Chapters 13 thru 25 are the heart of the book and contain a wide variety of strength and conditioning programs from novice to elite level. Many of the dumbbell complexes and circuits have been made famous by the author over the years. Again the area of general physical preparation is well addressed with many innovative exercise regimes. The trunk/torso routines are very challenging in part due to the authors gymnastic background. Chapter 26 contains a listing of the various exercises along with photos of each exercise. The author has a great variety of exercise variations which the reader can use to add variety to any conditioning program. Over 200 variations of dumbbell exercises and complexes are included. Chapters 27 thru 29 concentrate on competitive weightlifting. Descriptions, technique progressions, novice and advanced programs are presented. The next two chapters contain some innovative material on wheelchair training and at your desk training for office workers. The author concludes with chapters on reconditioning and outlining a weight training class. This is a "how to" text. The author does not include a lot of research material. This book will appeal to anyone looking for innovative approaches to strength and conditioning. Its strength is in the areas of general physical preparation and variety of routines for all ages, types and levels of fitness.

"This textbook is PROACTIVE. It is about starting over. It is the complete guide that I would give to any new client in an extreme situation. It leaves nothing out and provides explicit details of every step I take to make someone completely disappear, including document templates and a chronological order of events. The information shared in this book is based on real experiences with my actual clients, and is unlike any content ever released in my other books." -- publisher.

The Torch and the Sword is the long-awaited sequel to The Final Quest and The Call. Written for mature Christians, this book is not recommended for the spiritually timid. Continuing themes established in the previous books, The Torch and the Sword carries these themes further and deeper while venturing into new spiritual territories. The Torch and the Sword paints an increasingly broad and clear spiritual picture of our times. As Christians, we are called not only to endure the challenges with which we are faced, but also to prevail, seizing the great spiritual opportunities available to us. The truth of the gospel of Jesus Christ is the light which is stronger than any darkness. This book is a call to those who will love and stand for the Truth until His victory is complete.

Advanced Structural Analysis is a textbook that essentially covers matrix analysis of structures, presented in a fresh and insightful way. This book is an extension of the author's basic book on Structural Analysis. The initial three chapters review the basic concepts in structural analysis and matrix algebra, and show how the latter provides an excellent mathematical framework for the former. The next three chapters discuss in detail and demonstrate through many examples how matrix methods can be applied to linear static analysis of skeletal structures (plane and space trusses; beams and grids; plane and space frames) by the stiffness method. Also, it is shown how simple structures can be conveniently solved using a reduced stiffness formulation, involving far less computational effort. The flexibility method is also discussed. Finally, in the seventh chapter,

analysis of elastic instability and second-order response is discussed in detail. The main objective is to enable the student to have a good grasp of all the fundamental issues in these advanced topics in Structural Analysis, besides enjoying the learning process, and developing analytical and intuitive skills. With these strong fundamentals, the student will be well prepared to explore and understand further topics like Finite Elements Analysis.

Understanding the mechanisms involved in liver regeneration is of crucial importance for clinical medicine, not only regarding carcinogenesis and diabetes treatment, but also for the use of stem cells for cell therapy and liver surgery. This graduate-level text provides an overview of the current state of knowledge of the molecular mechanisms of liver regeneration. Hepatic stem cells are introduced and the important players involved in regeneration such as oval cells, bone marrow and stellate cells are reviewed. The cell signaling pathways that initiate liver regeneration and regulate the switch between proliferation and apoptosis are presented and the role of liver stem cells in tumorigenesis is discussed. The book also treats the epigenetic regulation of liver stem cells and the roles of inflammation and angiogenesis in liver regeneration. This compact overview of the fascinating regenerative capacity of the liver will be of interest to graduate students and post-docs in molecular biology, biochemistry and medicine.

The story of the destruction of Sodom, Gomorrah, and Jericho--three cities situated along a major fault line extending 1,100 kilometers from the Red Sea to Turkey--is the oldest such description in human history. In this book, noted geologists K.O. Emery and David Neev have revisited that story to shed light on what happened there some 4,350 years ago. With all the benefits of modern geological and forensic science techniques at their disposal, the authors explore an area where earthquakes, volcanic activity, variations in the Dead Sea's level, and oscillations between arid and wet climates have affected life there for over 10,000 years. In reviewing the geology, biblical paleogeography, and limnology of the region, the authors have produced fascinating insights into the tectonic and climatic changes that have occurred in the region over the last 6,000 years and how those changes have affected cultural life in the Middle East. The Destruction of Sodom, Gomorrah, and Jericho is the first book to combine modern science and biblical archaeology to produce an authoritative account of the of these three great cities. It will fascinate students and researchers in geology, geophysics, and archaeology alike.

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her

mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

"This volume of measurement instruments in the English language arts is the second one produced by the Research Instruments Project (TRIP), which was designed to collect and evaluate research instruments in language arts, language and language development, literacy, literature, oral language, reading, teacher knowledge/attitudes, and writing. The 160 measurement instruments are arranged alphabetically by category; within each category, measures are listed alphabetically by author. All instruments are cross-referenced by author. The age range indicated is the specific age grouping as stated by the authors or the age of the sample to whom the instrument was administered. The description of the instrument provides the purpose of the instrument, the date of construction, and a physical description of the instrument--often including sample items and administration data (directions, time, scoring procedures, and so forth). The lack of reliability and validity data for instruments is indicated when the information was unavailable. In the case of tables of difficulty, indexes, and so on, the data contained are summarized and the complete data are made available with the test or references cited.
