Written by active accounting researchers, this text brings clarity and flexibility to the central ideas underlying business combinations, consolidated financial statements, foreign currency transactions, partnerships, non-profit accounting and more. This

new Seventh Edition has been updated to reflect the latest changes to FASB and GASB standards, allowing students to build a skill set based on up-to-date practices. The Sixth Edition of *ADVANCED FINANCIAL ACCOUNTING*, by Baker/Lembke/King continues its strong coverage of the topics, its well-known clarity of presentation, and its integrated coverage based on continuous case examples. The text is highly illustrated

with complete presentations of worksheets, schedules, and financial statements so that students can see the development of each new topic. In the chapters covering consolidation subsequent to the date of combination, the three alternative methods of the parent company's accounting for the investment—basic equity, cost, and fully adjusted equity—are presented in each chapter and appendices to provide the opportunity to cover the differences in the methods, and to see how the consolidated financial statements are the same regardless of the method the parent company uses to account for the investment. The two international chapters include a comprehensive discussion of accounting for foreign currency derivatives and other forms of derivatives such as interest swaps and options used in today's business arena. The governmental and not-for-profit chapters are comprehensive in their coverages of accounting and financial reporting for these entities, based on the most current GASB pronouncements. The text can be described as: (a) very comprehensive in coverage of advanced accounting topics, (b) extensively illustrated with worksheets and other learning tools, (c) clearly written for students' learning, (d) a very large variety of end-of-chapter materials for homework selections, and (e) current and complete in its coverage of accounting and reporting standards from the FASB and the GASB. Because Advanced Financial Accounting is often taken by students who plan to take the CPA exam, numerous end-of-chapter materials are provided in the formats as tested on the CPA exam. A wide variety of multiple-choice questions, cases requiring written presentations, and other objective answer format materials is provided.

As the number of businesses registered as partnerships continues to grow in the United States (U.S.)—there are now more than seven million—it is imperative for parties with business interests in the country to be fully informed of the challenges pertaining to this sui generis form of business and its intricate body of tax law. In an illustrative manner not covered by other books on the subject, this invaluable guide discusses, analyzes, dissects, and helps resolve issues arising in such contexts as accounting methods, anti-abuse rules, liabilities, dissolutions, mergers, and bankruptcy, with expert guidance on preparing partnership financial statements. With numerous boxed examples and references to important court cases, the author thoroughly describes such topics as the following: types of partnerships (LP, LLP, LLC, PTP); the two concepts of partnerships; partnership formation; transactions between partnership and partners; allocation of revenues among partners; the partnership taxable year; base erosion and anti-abuse tax (BEAT); centralized partnership audit regime; recourse and nonrecourse liabilities; and special tax rules for publicly traded partnerships (PTPs). Key abstract concepts are explained in a down-to-earth way, and all formal requirements—filing the partnership tax return (Form 1065), reporting, preparing for an audit, and so on—are clearly illustrated with examples. As the first book to describe the

economics of partnerships in a concise and comprehensive manner, this book provides a reliable and authoritative overview of the complexities of U.S. partnership taxation and expounds the relevant rules in accessible language. It will be warmly welcomed by tax law practitioners, members of international and U.S. tax law associations, tax academics, and the international business communities with interests in the U.S.
