The Winner Effect: The Neuroscience of Success and Failure.
Ilan H. Robertson. What does it really take to be a winner?

Neuropsychology expert Ian Robertson seeks answers in his new book. He weaves together neuroscience findings and personal stories to look closely at how winning (or losing) can physically change the brain and affect the psyche, with long-lasting and self-reinforcing effects.

The Winner Effect The science of success and how to use it

Success changes the chemistry of the brain, making you more focused, smarter, more confident, and more

aggressive. The effect is as strong as any drug. And the more you win, the more you will go on to win. But the downside is that winning can become physically addictive.

The Winner Effect : The Neuroscience of Success and ...

Hormones and the 'winner effect' Testosterone is a hormone which boosts men's and women's sex drive and makes them more aggressive, and it does so by changing the chemistry of their brains.
