Making the most of the longest days of the year Summer is a season of sun, heat and daylight that brings activity to all corners of life, from plants bearing fruit to animals and birds feeding their young. It also brings people together in the open air, whether on holiday, a day trip to the beach, celebrating the longest day of the year or just making the most of the weather. Through inspirational quotes, interesting facts, fascinating trivia the Little Book of Summer explores what makes three months of every year summer as well as our relationship with the great outdoors and with each other during the warmest season of the year. "Summer afternoon - summer afternoon; to me those have always been the two most beautiful words in the English language." - Henry James If you can hear crickets chirping on a balmy summer evening, you can use their chirps to determine the temperature. Crickets are cold-blooded creatures and chirp at a frequency consistent with the air temperature. For a Celsius reading, count the number of chirps over 25 seconds, then divide that number by 3 and add 4. For Fahrenheit, count the number of chirps in 14 seconds, then add 40.

Some subjects seem too hot for a group to discuss sanely. Not necessarily. The Little Book of "Cool Tools for Hot Topics" -- Group Tools to Facilitate Meetings When Things Are Hot shows how to help people hear each other when they feel like shouting; how to focus on the issues at stake rather than having a war of personalities; how to employ actual practices for better understanding (interviews, small-group discussions, role-reversal presentations); and how to move a group toward making a decision that all can honestly support. Lead author Ron Kraybill is a professor of Conflict Studies in the Conflict Transformation Program at Eastern Mennonite University, Harrisonburg, Virginia. During the years of the South African political transition, he trained local, regional, and national leadership in negotiation and mediation skills and served as a training advisor to the National Peace Accord. Cool Tools is rich in anecdotes and practical how-to for any group faced with tension-filled decision-making.

The four most popular restorative justice books in the Justice & Peacebuilding series—*The Little Book of Restorative Justice: Revised and Updated*, *The Little Book of Victim Offender Conferencing*, *The Little Book of Family Group*

Conferences, and *The Little Book of Circle Processes*—in one affordable volume. And now with a new foreword from Howard Zehr, one of the founders of restorative justice! Restorative justice, with its emphasis on identifying the justice needs of everyone involved in a crime, is a worldwide movement of growing influence that is helping victims and communities heal while holding criminals accountable for their actions. This is not a soft-on-crime, feel-good philosophy, but rather a concrete effort to bring justice and healing to everyone involved in a crime. Circle processes draw from the Native American tradition of gathering in a circle to solve problems as a community. Peacemaking circles are used in neighborhoods, in schools, in the workplace, and in social services to support victims of all kinds, resolve behavior problems, and create positive climates. Each book is written by a scholar at the forefront of these movements, making this important reading for classrooms, community leaders, and anyone involved with conflict resolution.

In our era of mass incarceration, gun violence, and Black Lives Matters, a handbook showing how racial justice and restorative justice can transform the African-American experience in America. This timely work will inform scholars and practitioners on the subjects of pervasive racial inequity and the healing offered by restorative justice practices. Addressing the intersectionality of race and the US criminal justice system, social activist Fania E. Davis explores how restorative justice has the capacity to disrupt patterns of mass incarceration through effective, equitable, and transformative approaches. Eager to

break the still-pervasive, centuries-long cycles of racial prejudice and trauma in America, Davis unites the racial justice and restorative justice movements, aspiring to increase awareness of deep-seated problems as well as positive action toward change. Davis highlights real restorative justice initiatives that function from a racial justice perspective; these programs are utilized in schools, justice systems, and communities, intentionally seeking to ameliorate racial disparities and systemic inequities. Chapters include: Chapter 1: The Journey to Racial Justice and Restorative Justice Chapter 2: Ubuntu: The Indigenous Ethos of Restorative Justice Chapter 3: Integrating Racial Justice and Restorative Justice Chapter 4: Race, Restorative Justice, and Schools Chapter 5: Restorative Justice and Transforming Mass Incarceration Chapter 6: Toward a Racial Reckoning: Imagining a Truth Process for Police Violence Chapter 7: A Way Forward She looks at initiatives that strive to address the historical harms against African Americans throughout the nation. This newest addition the Justice and Peacebuilding series is a much needed and long overdue examination of the issue of race in America as well as a beacon of hope as we learn to work together to repair damage, change perspectives, and strive to do better.

The late Edmond Jabes was a major voice in French poetry in the latter half of this century. An Egyptian Jew, he was haunted by the question of place and the loss of place in relation to writing. He focused on the space of the book, seeing it as the true space in which exile and the promised land meet in poetry and in

question. Jabes's mode of expression has been variously described: a new and mysterious kind of literary work - as dazzling as it is difficult to define, cascading aphorisms, a theater of voices in a labyrinth of forms. The manner of his writing embodies the meaning of his writing. Jabes's book is a manifesto not only of his own poetry, but of the most advanced critical poetry written during this century, one in which he engages in dialogue with some of its outstanding philosophers (Blanchot, Levinas, and Derrida)

Here's a call to colleges and universities to consider implementing restorative practices on their campuses, ensuring fair treatment of students and staff while minimizing institutional liability, protecting the campus community, and boosting morale. From an associate dean of student affairs who has put these models to work on his campus.

Restorative justice is a collaborative decision-making process that includes victims, offenders, and others who are seeking to hold offenders accountable by having them (a) accept and acknowledge responsibility for their offenses, (b) to the best of their ability, repair the harm they caused to victims and communities, and (c) work to reduce the risk of re-offense by building positive social ties to the community. David Karp writes in his introduction, "As a student affairs administrator, I have become deeply committed to the concept and practice of restorative justice. I have experienced how it can work given the very real pressures among campus conduct administrators to manage high case loads, ensure fair treatment, minimize institutional liability, protect the campus community, boost morale in a division with high turnover, and help students learn from their mistakes without creating insurmountable obstacles to their future successes."

The word "dialogue" suffers from over-use, yet its practice is as transforming and as freshly hopeful as ever. Authors Schirch and Campt demonstrate dialogue's life and possibilities in this clear and absorbing manual: "Dialogue allows people in conflict to listen to each other, affirm their common ground, and

explore their differences in a safe environment." Schirch has worked throughout the Southern hemisphere in peacebuilding projects. Campit has focused on racial and class reconciliation in American cities.

Can community-building begin in a classroom? The authors of this book believe that by applying restorative justice at school, we can build a healthier and more just society. With practical applications and models. Can an overworked teacher possibly turn an unruly incident with students into an "opportunity for learning, growth, and community-building"? If restorative justice has been able to salvage lives within the world of criminal behavior, why shouldn't its principles be applied in school classrooms and cafeterias? And if our children learn restorative practices early and daily, won't we be building a healthier, more just society? Two educators answer yes, yes, and yes in this new addition to The Little Books of Justice and Peacebuilding series.

Amstutz and Mullet offer applications and models. "Discipline that restores is a process to make things as right as possible." This Little Book shows how to get there.

Our ancestors gathered around a fire in a circle, families gather around their kitchen tables in circles, and now we are gathering in circles as communities to solve problems. The practice draws on the ancient Native American tradition of a talking piece. Peacemaking Circles are used in neighborhoods to provide support for those harmed by crime and to decide sentences for those who commit crime, in schools to create

positive classroom climates and resolve behavior problems, in the workplace to deal with conflict, and in social services to develop more organic support systems for people struggling to get their lives together. A title in The Little Books of Justice and Peacebuilding Series.

A practical guide to implementing the rich theory of attachment for treating mental health challenges in children. This book both explains and illustrates how the practice of child mental health professionals can be enhanced, whatever their treatment approach, to encourage engagement, resilience, and development in children with mental health problems. Alongside practical recommendations, Daniel Hughes and Ben Gurney-Smith use dialogue from clinical work to illustrate applications of these principles from Dyadic Developmental Psychotherapy as well as other attachment-based practices with parents and children. This "little book" will demystify how attachment theory—one of today's most in-demand approaches—can actually be brought into clinical work. Topics include regulating emotional states; repairing ongoing relationships; establishing an attachment-based therapeutic relationship; accepting a child's inner life; assessing the caregiver's need for safety, regulation, and reflection; the importance of nonverbal and verbal conversations in facilitating secure attachment; and strengthening the mind of the child.

Suppose you could ask God any question and get an answer. What would it be? Young people all over the world have been asking those questions. So Neale Donald Walsch, author of the internationally bestselling Conversations with God series had another conversation. Conversations with God for Teens is a simple, clear, straight-to-the-point dialogue that answers teens questions about God, money, sex, love, and more. Conversations with God for Teens reads like a rap session at a church youth group, where teenagers discuss everything they ever wanted to know about life but were too afraid to ask God. Walsch acts as the verbal conduit, showing teenagers how easy it is to converse with the divine. When Claudia, age 16, from Perth, Australia, asks, "Why can't I just have sex with everybody? What's the big deal?", the answer God offers her is: "Nothing you do will ever be okay with everybody. 'Everybody' is a large word. The real question is can you have sex and have it be okay with you?" There's no doubt that the casual question-and-answer format will help make God feel welcoming and accessible to teens. Conversations with God for Teens is the perfect gift

purchase for parents, grandparents, and anyone else who wants to provide accessible spiritual content for the teen(s) in their lives.
