*The Shaping of One Man's Game from Patient Mouse to Rabid Wolf* John Wiley & Sons

The fourth book in the NYT bestselling Expanse series, *Cibola Burn* sees the crew of the Rocinante on a new frontier, as the rush to colonize the new planets threatens to outrun law and order and give way to war and chaos. Now a Prime Original series. HUGO AWARD WINNER FOR BEST SERIES Enter a new frontier. "An empty apartment, a missing family, that's creepy. But this is like finding a military base with no one on it. Fighters and tanks idling on the runway with no drivers. This is bad juju. Something wrong happened here. What you should do is tell everyone to leave." The gates have opened the way to a thousand new worlds and the rush to colonize has begun. Settlers looking for a new life stream out from humanity's home planets. Ilus, the first human colony on this vast new frontier, is being born in blood and fire. Independent settlers stand against the overwhelming power of a corporate colony ship with only their determination, courage, and the skills learned in the long wars of home. Innocent scientists are slaughtered as they try to survey a new and alien world. The struggle on Ilus threatens to spread all the way back to Earth. James Holden and the crew of his one small ship are sent to make peace in the midst of war and sense in the midst of chaos. But the more he looks at it, the more Holden

thinks the mission was meant to fail. And the whispers of a dead man remind him that the great galactic civilization that once stood on this land is gone. And that something killed it. In the last decade, Islamophobia in Western societies, where Muslims constitute the minority, has been studied extensively. However, Islamophobia is not restricted to the geography of the West, but rather constitutes a global phenomenon. It affects Muslim societies just as much, due to various historical, economic, political, cultural and social reasons. Islamophobia in Muslim Majority Societies constitutes a first attempt to open a debate about the understudied phenomenon of Islamophobia in Muslim majority societies. An interdisciplinary study, it focuses on socio-political and historical aspects of Islamophobia in Muslim majority societies. This volume will appeal to students, scholars and general readers who are interested in Racism

Studies, Islamophobia Studies, the Middle East and North Africa (MENA) region, Islam and Politics.

Modern environmental regulation and its complex intersection with international law has led many jurisdictions to develop environmental courts or tribunals. Strikingly, the list of jurisdictions that have chosen to do this include numerous developing countries, including Bangladesh, Kenya and Malawi. Indeed, it seems that developing nations have taken the task of capacity-building in environmental law more seriously than many developed nations. Environmental Justice in India explores the genesis, operation and effectiveness of the Indian National Green Tribunal (NGT). The book has four key objectives. First, to examine the importance of access to justice in environmental matters promoting sustainability and good governance. Second, to provide an analytical and critical account of the judicial structures that offer access to environmental justice in India. Third, to analyse the establishment, working practice and effectiveness of the NGT in advancing a distinctively Indian green jurisprudence. Finally, to present and review the success and external challenges faced and overcome by the NGT resulting in growing usage and public respect for the NGT's commitment to environmental protection and the welfare of the most affected people. Providing an informative analysis of a growing judicial development in India, this book will be of great interest to students and scholars of environmental justice, environmental law, development studies and sustainable development.

Many homes across America have designs based on plans taken from pattern books or mail-order catalogs. In *Houses from Books*, Daniel D. Reiff traces the history of published plans and offers the first comprehensive survey of their influence on the structure and the style of American houses from 1738 to 1950. *Houses from Books* shows that architectural publications, from Palladio's *I Quattro Libri* to Aladdin's *Ready-Cut Homes*, played a decisive role in every aspect of American domestic building. Reiff discusses the people and the firms who produced the books as well as the ways in which builders and architects adapted the designs in communities throughout the country. His book also offers a wide-ranging analysis of the economic and social conditions shaping American building practices. As architectural publication developed and grew more sophisticated, it played an increasingly prominent part in the design and the construction of domestic buildings. In villages and small towns, which often did not have professional architects, the publications became basic resources for carpenters and builders at all levels of expertise. Through the use of published designs, they were able to choose among a variety of plans, styles, and individual motifs and engage in a fruitful dialogue with past and present architects. *Houses from Books* reconstructs this dialogue by examining the links between the published designs and the houses themselves. Reiff's book will be indispensable to architectural historians, architects, preservationists, and regional historians. Realtors and homeowners will also find it of great interest. A catalog at the end of the book can function as a guide for those attempting to locate a model and a date for a particular design. *Houses from Books* contains a wealth of photographs, many by the author, that enhance its importance as a history and guide.

It was the American Dream by Mail Order --Smithsonian Americans have ordered from Sears, Roebuck just about everything they have needed for their homes for 100 years--but from 1908 to 1940, some 100,000 people also purchased their houses from this mail-order wizard. Sears ready-to-assemble houses were ordered by mail and shipped by rail wherever a boxcar or two could pull in to unload the meticulously pre-cut lumber and all the materials needed to build an exceptionally sturdy and well-designed house. From Philadelphia, Pa., to Coldwater, Kans., and Cowley, Wyo., Sears put its guarantee on quality bungalows, colonials and Cape Cods, all with the latest modern conveniences--such as indoor plumbing. *Houses by Mail* tells the story of these pre-cut houses and provides for the first time an incomparable guide to identifying Sears houses across the country. Arranged for easy identification in 15 sections by roof type, the book features nearly 450 house models with more than 800 illustrations, including drawings of the houses and floor plans. Because the Sears houses were built to last, thousands remain today to be discovered and restored. *Houses by Mail* shows how to return them to their original charm while it documents a highly successful business enterprise that embodied the spirit and domestic design of its time. "After decades of obscurity, Sears houses have become chic." --Wall Street Journal "These were . . . spacious, solidly built homes." --Parade

"Don't be surprised if your own cozy bungalow turns up [in the book]."--Philadelphia Inquirer "A nostalgic and informative look at the tastes of Americans in the years before World War II."--Publishers Weekly "The bible to researchers of Sears' ready-cut homes."--Saturday Evening Post

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been commonly referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Today's police agencies are in a period of both crisis and reform as they try to improve their ability to deliver public safety to citizens in ways that are effective, legitimate, and sustainable. Evidence-based policing offers one such solution - an approach which emphasises the value that research can bring to police officers and, by extension, the public they serve. However, evidence-based policing is not just about the process of understanding and evaluating police practices. It is also about translating and using that knowledge in daily police activities. This unique book examines the scientific evidence for the effectiveness of various police practices and provides tools to help turn research into practice. Part I gives a practitioner's definition of evidence-based policing, a primer on how to judge and interpret research findings, and a review of the Evidence-Based Policing Matrix, a tool for translating research on police crime control interventions. In Part II the authors review the breadth of knowledge about policing interventions for people, places, communities, and technology, focusing on how to optimize operations based on this information. Tools and ideas that can assist in implementing evidence-based practices into patrol, investigations, supervision, management, crime analysis, and leadership are provided in Part III. Finally, in Part IV the authors speak to researchers about how they might continue to work with police agencies to advance evidence-based policing.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

For those of you with a taste for the mysterious, this book should prove to be a tempting prospect. Scotland has always had a reputation for holding dark secrets through the ages and Ron Halliday's new book delves into the subject with descriptive vigour and a clarity that transports the reader to the very heart of the unexplained. With Unidentified Flying Objects, ghosts, the occult and other inexplicable supernatural phenomena included, the

book deals with a wide range of well-known and much-researched cases, each strange, disturbing and fascinating in their own way. Many parts of Scotland have provided the stage for these disquieting events, and famous landmarks are mentioned alongside lesser known locations. Halliday's book is worthwhile reading for all who have an interest in the paranormal, not only because it is written in an informative and accessible style, but because it researches events from a country whose name is synonymous with a mysterious past.
