One Dollar's Worth Springer Nature

Kurdish Awakening examines key questions related to Kurdish nationalism and identity formation in Syria, Iraq, Iran, and Turkey. The world's largest stateless ethnic group, Kurds have steadily grown in importance as a political power in the Middle East, particularly in light of the "Arab Spring." As a result, Kurdish issues—political, cultural, and historical alike—have emerged as the subject of intense scholarly interest. This book provides fresh ways of understanding the historical and sociopolitical underpinnings of the ongoing Kurdish awakening and its already significant impact on the region. Rather than focusing on one state or angle, this anthology fills a gap in the literature on the Kurds by providing a panoramic view of the Kurdish homeland's various parts. The volume focuses on aspects of Kurdish nationalism and identity formation not addressed elsewhere, including perspectives on literature, gender, and constitution making. Further, broad thematic essays include a discussion of the historical experiences of the Kurds from the time of their Islamization more than a millennium ago up until the modern era, a comparison of the Kurdish experience with other ethno-national movements, and a treatment of the role of tribalism in modern nation building. This collection is unique in its use of original sources in various languages. The result is an analytically rich portrayal that sheds light on the Kurds' prospects and the challenges they confront in a region undergoing sweeping upheavals.

Insights from TALIS 2013 Harper Collins

This accessible, hands-on text not only introduces students to the important topics in historical linguistics but also shows them how to apply the methods described and how to think about the issues; abundant examples and exercises allow students to focus on how to do historical linguistics. Distinctive to this text is its integration of the standard topics with others now considered important to the field, including syntactic change, grammaticalization,

sociolinguistic contributions to linguistic change, distant genetic relationships, areal linguistics, and linguistic prehistory. Examples are taken from a broad range of languages; those from the more familiar English, French, German, and Spanish make the topics more accessible, while those from non-Indo-European languages show the depth and range of the concepts they illustrate. This second edition features expanded explanations and examples as well as updates in light of recent work in linguistics, including a defense of the family tree model, a response to recent claims on lexical diffusion/frequency, and a section on why languages diversify and spread.

ACEC's Guidelines to Practice Conari Press

Schlechty shows both educators and parents how to envision reform and design quality educational systems. He explains how the visioning process must be rooted in real shared beliefs, how mission statements must unpack visions into concrete goals that are connected to action, and how the results of reform can be usefully assessed. Drawing on the author's vast experience in the day-to-day work of implementing school reform, *Inventing Better Schools* offers new approaches for setting standards and ensuring accountability—and includes samples of actual mission statements and strategic plans of successful school districts.

An Introduction HarperCollins UK

Researching Interaction in English Language Teaching Princeton University Press

An introduction to marketing within the context of the international tourism industry. Focusing on core marketing theory and practice, this text takes a critical approach to encourage greater depth of learning and includes topics of current interest, such as relationship marketing. Student learning is reinforced by the provision of numerous cases, mini-cases, summaries, reflection points, questions and exercises.

Dead Man's Island SAGE Publications

This book presents ten essays that examine the potential of digital responses to the COVID-19 pandemic. The essays explore new digital concepts for learning and teaching, provide an overview of organizational responses to the crisis through digital

technologies, and examine digital solutions developed to manage the crisis. Scientists from many disciplines work together in the fight against the virus and its numerous consequences. This book explores how information systems researchers can contribute to these global efforts. The book will be of interest to researchers and scholars in the field of digital business and education.

How Computers Are Creating the Next Job Market MIT Press

Though best known for *The Red Badge of Courage*, his classic novel of men at war, in his tragically brief life and career Stephen Crane produced a wealth of stories—among them "The Monster," "The Uprturned Face," "The Open Boat," and the title story—that stand among the most acclaimed and enduring in the history of American fiction. This superb volume collects stories of unique power and variety in which impressionistic, hallucinatory, and realistic situations alike are brilliantly conveyed through the cold, sometimes brutal irony of Crane's narrative voice.

Nation Building in a Fragmented Homeland Dragonfly

In Asia, Distance Education (DE) is providing major solutions in the areas of education and training. DE methods that are standard in other parts of the world, however, have yet to demonstrate their full potential in Asia. Covering nine DE projects by 39 researchers from 13 countries, this book analyses the DE

scenario in Asia, the successes, the failures and the reasons behind them. This book is a unique collation of the results of studies of educational technologies across an extensive network of Asian countries. It also provides a useful snapshot of DE's development in Asia in the early years of the 21st century. The surveys reported cover different DE contexts, methodologies, and levels of generalisability, and add to the existing scholarship on the subject by providing previously unavailable, firm evidence about DE's prospects in Asia. The contributors give important recommendations that can be translated into practical and political actions to help solve critical socio-economic problems of Asia as well as other parts of the world.

Physics of Devices and Materials in One Dimension Lindhardt og Ringhof

There is a need in the higher education arena for a book that responds to the need for using technology in a classroom of tech-savvy students. This book is filled with illustrative examples of questions and teaching activities that use classroom response systems from a variety of disciplines (with a discipline index). The book also incorporates results from research on the effectiveness of the technology for teaching. Written for instructional designers and re-designers as well as faculty across disciplines. A must-read for anyone interested in interactive teaching and the use of clickers. This book draws on the experiences of countless instructors across a wide range of disciplines to provide both novice and experienced teachers with practical advice on how to make classes more fun and more effective." --Eric Mazur, Balkanski Professor of Physics and Applied Physics, Harvard University, and author, *Peer Instruction: A User's Manual* "Those who come to this book needing practical advice on using 'clickers' in the classroom will be richly rewarded: with case studies, a refreshing historical perspective, and much pedagogical ingenuity. Those who seek a deep, thoughtful examination of strategies for active learning will find that here as well—in abundance. Dr. Bruff achieves a marvelous synthesis of the pragmatic and the philosophical that will be useful far beyond the life span of any single technology." --Gardner Campbell, Director, Academy for Teaching and Learning, and Associate Professor of Literature, Media, and Learning, Honors College, Baylor University

This report examines the nature and extent of support for teacher professionalism using the Teaching and Learning International Survey (TALIS) 2013, a survey of teachers and principals in 34 countries and economies around the world.

Safeguarding Your Technology Bloomsbury Publishing

Classroom observation has become a tool for analysing and improving English Language Teaching (ELT). This book represents the state of the art in language education and classroom interaction research from a data-driven empirical perspective. The micro-analytic, multimodal, and videographic approaches represented here understand classrooms as sites of complex, naturally occurring interaction. The volume demonstrates that the investigation of this communicative setting is the basis for insights into the inner workings of classrooms and the development of strategies for teacher education. The introductory article complements the volume by giving a comprehensive overview of the theories and methods that have come to bear in classroom observation.

Malaysia OUP Oxford

As the current recession ends, many workers will not be returning to the jobs they once held--those jobs are gone. In *The New Division of Labor*, Frank Levy and Richard Murnane show how computers are changing the employment landscape and how the right kinds of education can ease the transition to the new job market. The book tells stories of people at work--a high-end financial advisor, a customer service representative, a pair of successful chefs, a cardiologist, an automotive mechanic, the author Victor Hugo, floor traders in a London financial exchange. The authors merge these stories with insights from cognitive science, computer science, and economics to show how computers are enhancing productivity in many jobs even as they eliminate other jobs--both directly and by sending work offshore. At greatest risk are jobs that can be expressed in programmable rules--blue collar, clerical, and similar work that requires moderate skills and used to pay middle-class wages. The loss of these jobs leaves a growing division between those who can and cannot earn a good living in the computerized economy. Left unchecked, the division threatens the nation's democratic institutions. The nation's challenge is to recognize this division

and to prepare the population for the high-wage/high-skilled jobs that are rapidly growing in number--jobs involving extensive problem solving and interpersonal communication. Using detailed examples--a second grade classroom, an IBM managerial training program, Cisco Networking Academies--the authors describe how these skills can be taught and how our adjustment to the computerized workplace can begin in earnest.

The New Division of Labor HMH

Its a fact - youll need to continually improve your quality of service if you want to succeed. Thats why ACEC has developed this latest publication to assist you in preparing your own Quality Management plan."These guidelines, developed by principals of ACEC firms, provide a menu with numerous choices to help a firm develop or enhance its own quality management program." -Gary E. Loesch, Executive Vice President, H2M Group: Holzmacher, Mclendon & Murrell, P.C.

Developing Transferable Knowledge and Skills in the 21st Century Routledge

Work through a mix of amazing robotic projects using the Raspberry Pi Zero or the Raspberry Pi 3 About This Book Easy to follow instructions, yet the ones that help you build powerful robots, and exclusive coverage of mobile robots with the Pi Zero Build robots that can run, swim and fly and the cutting-edge dimension of robotics that is possible with the Raspberry Pi Zero and Pi 3 Interact with your projects wirelessly and make sci-fi possible, right in your home Who This Book Is For This book is for hobbyists and programmers who are excited about using the Raspberry Pi 3 and Raspberry Pi Zero. It is for those who are taking their first steps towards using these devices to control hardware and software and write simple programs that enable amazing projects. No programming experience is required, just a little computer and mechanical aptitude and the desire to build some interesting projects. What You Will Learn Control a variety of different DC motors Add a USB webcam to see what your robot can see Attach a projector to project information Insert USB control hardware to control a complex robot with two legs Include speech recognition so that your projects can receive commands Add speech output to that the robot can communicate with the world around it Include wireless communication so that you can see what the robot is seeing and control the robot from a distance In Detail This book will allow you to take full advantage of

Raspberry Pi Zero and Raspberry Pi 3 by building both simple and complex robotic projects. The book takes a mission-critical approach to show you how to build amazing robots and helps you decide which board to use for which type of robot. The book puts a special emphasis on designing mobile (or movable) robots using the Raspberry Pi Zero. The projects will show inexpensive, yet powerful, ways to take full advantage. It will teach you how to program Raspberry Pi, control the movement of your robot, and add features to your robots. Style and approach This fun and practical tutorial contain step-by-step instructions to get you hands-on building inexpensive projects. It contains mission-critical chapters and everything you need to know to get started.

Virginia Woolf's intention to publish her short stories is carried out in this volume, posthumously collected by her husband, Leonard Woolf. Containing six of eight stories from Monday or Tuesday, seven that appeared in magazines, and five other stories, the book makes available Virginia Woolf's shorter works of fiction.

52 Lessons on Success Straight from the Bible Packt Publishing Ltd

He is obsessed with her innocence. He will be destroyed by her guilt. The walls were champagne. The house was immaculate. A prosperous doctor lived there with his son and his beautiful wife.

But the elegant walls hid a family's secret, a wife's shame. And one day shots rang out in the doctor's house. Suddenly Jennifer Witt was in jail, facing the death penalty. Jennifer insisted that she had not killed her abusive husband -- and she could never have killed her own son. Dismas Hardy believed her. But Hardy was only part of the defense team, and the only lawyer who continued to believe her...even as her story was torn to pieces, even as her lies came out, even as she was found guilty of murder. Now there's only one thing Jennifer can do to save her life...and she refuses to do it. So Hardy must do it for her. And in a shocking case of violence, betrayal, and lies, his only weapon is the truth... The 13th Juror...When innocence is not enough.
