**Oxford IB Diploma Programme: French B Course Book Companion** Oxford University Press The French course book and Study Guide have been written specifically for the Languages B programme which will be taught from September 2011 with first assessment from May 2013. These two components are suitable for both Higher and Standard level students. These two components provide plenty of guidance and information about topics that students need to deal with the themes, text

types and assessment required for the new Languages B Diploma programme. The course book covers all the core and optional topics and has a separate unit on literature. Students are given a wide variety of text types and assessment-style questions and are encouraged to think and reflect in an IB-inspired way. Further links are made throughout to Theory of Knowledge

and Creativity, Action, Service. The most comprehensive and written specifically for the most recent Language B syllabus, including all the options. Authentic and current French texts resonate with learners and drive discussion, strengthening critical thought. Key to Pujol and Van Norman's Complete French Class-book McGraw-Hill/Glencoe This is a rich and path-breaking

comparative study of reading tastes in the final years of old regime Europe. Based on extensive research in the account books of the Swiss publishers, the Société Typographique de Neuchâtel (STN), and related archives, it charts the dissemination of literature and reading tastes across Europe in the years leading up to the French revolution. In the process, it recasts our

understanding of late 18th-century print culture and the contours of the enlightenment . The fruit of a widely acclaimed five year database project, the STN database, it is also a story of pioneering efforts to apply the latest digital technology and GIS mapping techniques to traditional historical and bibliographic problems. Although written to serve as a standalone study, this

book is ideally complemented by its companion volume, Mark Curran's *The French Book Trade in Enlightenment Europe I: Selling Enlightenment*, which offers a radical reinterpretation of the structure and practices of the European book trade. The STN database is now recognised as a cutting-edge digital project of global significance. Robert Darnton has called it "a prodigious

accomplishment and a joy to use" while Jeremy Popkin adds, "No one working in the field of French Enlightenment studies ... can afford to ignore the rich mine of data that Simon Burrows and his collaborators have made accessible, in an eminently usable form, and the new possibilities it opens up for scholars." The *French Book Trade in Enlightenment Europe I* and *II* offer a roadmap of that data and what it can

This thoroughly revised and expanded edition of a key textbook offers an innovative and accessible account of the richness and diversity of French film history and culture from the 1890s to the present day. The contributors, who include leading historians and film scholars, provide an indispensable introduction to key topics and

debates in French film history. Each chronological section addresses seven key themes – people, business, technology, forms, representations, spectators and debates, providing an essential overview of the cinema industry, the people who worked in it, including technicians and actors as well as directors, and the culture of cinema going in France from the beginnings of

cinema to the contemporary period.
