Springer Science & Business Media
 A considerable amount of public debate and media print has been devoted to the "war between science and religion." In his accessible and eminently readable new book, Stephen M. Barr demonstrates that what is really at war with religion is not science itself, but a philosophy called scientific materialism. Modern Physics and Ancient Faith argues that

the great discoveries of modern physics are more compatible with the central teachings of Christianity and Judaism about God, the cosmos, and the human soul than with the atheistic viewpoint of scientific materialism. Scientific materialism grew out of scientific discoveries made from the time of Copernicus up to the beginning of the twentieth century.

These discoveries led many thoughtful people to the conclusion that the universe has no cause or purpose, that the human race is an accidental by-product of blind material forces, and that the ultimate reality is matter itself. Barr contends that the revolutionary discoveries of the twentieth century run counter to this line of thought. He uses five of these discoveries—t

he Big Bang theory, unified field theories, anthropic coincidences, Gödel's Theorem in mathematics, and quantum theory—to cast serious doubt on the materialist's view of the world and to give greater credence to Judeo-Christian claims about God and the universe. Written in clear language, Barr's rigorous and fair text explains modern physics to general readers

without oversimplification. Using the insights of modern physics, he reveals that modern scientific discoveries and religious faith are deeply consonant. Anyone with an interest in science and religion will find *Modern Physics and Ancient Faith* invaluable. *An Alternative History of Portugal and the Portuguese Aftershock Comics* French film comedies have always

been extremely popular with English-speaking audiences, especially in America with the numerous Hollywood remakes of comedies from France. These films occupy a specific cultural space and are influenced by national traditions and shared cultural references, but at the same time they have always been difficult to classify. Often a combination of several

genres, they can be described as a hybrid art form, incorporating basic slapstick elements (the Lumière's brothers' *L'arroseur arrosé*, 1895) all the way to rather daring, even delicate subjects such as war (Autant-Lara's *La traversée de Paris*, 1956) or racism (Philippe de Chauveron's *Qu'est-ce qu'on a fait au Bon Dieu?* 2014). The diversity of disciplines - history, linguistics,

and social and political sciences - that form the background of this analysis guarantees a variety of approaches. French Comedy on Screen investigates the different methods in which these comedies textually inscribed and exemplified an array of cultural and historical landmarks. *Le Nouvel économiste* Penguin UK Paris MatchJeune Afrique L'intelligentAc tion auto

Restoration Book Arcadia Publishing From the author of *Argo* comes an unforgettable behind-the-scenes story of espionage in action. In the first ever memoir by a top-level operative to be authorized by the CIA, Antonio J. Mendez reveals the cunning tricks and insights that helped save hundreds from deadly situations. Adept at creating new identities for anyone, anywhere, Mendez was

involved in operations all over the world, from "Wild West" adventures in East Asia to Cold War intrigue in Moscow. In 1980, he orchestrated the escape of six Americans from a hostage situation in revolutionary Tehran, Iran. This extraordinary operation inspired the movie *Argo*, directed by and starring Ben Affleck. *The Master of Disguise* gives us a privileged look at what really happens at the highest levels of international espionage: in the field, undercover, and behind closed doors.

The book titled *The Collaborative Economy in Action: European Perspectives* is one of the important outcomes of the COST Action CA16121, *From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy* (short name: *Sharing and Caring*; sharingandcaring.eu) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST (www.cost.eu/actions/CA16121). The main objective of the COST Action *Sharing and Caring* is the development of a European network of researchers

and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action Sharing and Caring helped to connect research initiatives across Europe and enabled scientists to develop their ideas by collaborating

with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for

country reports was distributed among the members of the COST Action Sharing and Caring. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the

level of detail included, in accordance with how much information was available in each respective country at the time of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The Member Countries Report on the Collaborative Economy, edited by Gaia Mosconi, Agnieszka Lukaszewicz, and Gabriela Avram (2018) that was published on the Sharing and Caring website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio Nassare-Aznar, Kosjenka Dumančić, and Giulia Priora compiled a Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy (2018). In 2018, after undertaking an analysis of the previous reports' strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The

<p>template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments , Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka</p>	<p>Dumančić, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team was formed by volunteers from the participants of the COST Action: Andrzej Klimczuk, Vida Česnuityte,</p>	<p>Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary</p>
--	---	--

y analysis on the state of the CE in 2019, when the reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the intention was to update these reports again just before the end of the COST Action Sharing and Caring in 2021 and to produce a third edition. However, the COVID-19

pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors-and consists of reports on 27 countries participating in the COST Action.

Harper Collins The inside track to India's most powerful tycoons The eight business maharajas profiled here are among Asia's most powerful industrial tycoons, Their combined turnover runs into billions of

rupees, and between them they employ some 650,000 people, while indirectly affecting the lives of millions more. Sip a cup of tea, drive to work, listen to music, build a house and the chances are that in these and a myriad other ways you are using products that they manufacture or market. By any yardstick, the achievements of these men would rank among the great business stories of our time. How did

these men build their enormous empires? What are their management secrets? How did they thrive and prosper even as others failed? What is their vision for the future? Top business writer and industry insider Gita Piramal draws on exhaustive interviews and in-depth research to discover the answers to these and related questions in her profiles of the men who will lead the country's push to become an	industrial superpower in the 21st century. <i>New and Old Routes of Portuguese Emigration</i> Paris MatchJeune Afrique L'intelligentAc tion auto motoLe figaro magazineAuto motoLe MondelIndexJe une AfriqueRepère Le Nouvel economisteBib liographie nationale françaisenotic es établies par la Bibliothèque nationale. Business Legends is a compelling Account of ambition and achievement. <i>Grid-Scale Energy Storage Systems and Applications</i> Oxford University Press</p>	<p>This open access book offers a comparative overview on Portuguese emigration in Europe and outside the EU in times of recession. It looks at Portuguese emigrants who, after the crisis of 2008, moved both intra-EU, such as UK, France, Switzerland, Germany and Spain, but also into countries with historical links, such as the USA and Canada, and to Portuguese speaking countries such as Brazil, Angola and</p>
--	---	---

Mozambique, as well as the processes of return. In addition to the dynamics of movement, the book provides an in-depth analysis of the heterogeneity of this emigration. It deepens the multifaceted identities concerning social and professional pathways among highly skilled and less skilled emigrants. The labour market continues to be the main regulatory force of Portuguese

emigration, which helps to explain the outflow and the processes of settlement and return. Nonetheless, this book demonstrates that non-economic factors have likewise been of great importance in the decision to emigrate. As such this book will be a valuable read to policy makers, students and scholars in migration. Hamish Hamilton Comprising clear full-colour maps, this mini atlas

covers Spain and Portugal and is ideal for the general motorist. Montreal's Expo 67 Palgrave Macmillan The essential book for Chevrolet Corvette C3 owners. In 1967, Canada celebrated the 100th anniversary of its founding with a spectacular party, and the whole world was invited. Montreal's Expo 67 was the first world's fair held in Canada, and it was a huge success, attracting over 50 million visitors. The 1,000-acre site was built on two man-

made islands in the St. Lawrence River and incorporated 90 futuristic pavilions created by some of the world's greatest architects and designers. Over 60 countries were represented, along with many private, corporate and thematic pavilions, all brought together under the theme "Man and his World." With performers and entertainers of all varieties, restaurants,

cultural attractions, exhibitions and a world-class amusement park, Expo 67 was literally the party of the century, exceeding all expectations.

Createspace
Independent Publishing Platform
Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This

shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation. *Auto moto* University of Notre Dame Press Grid-Scale Energy

Storage Systems and Applications provides a timely introduction to state-of-the-art technologies and important demonstration projects in this rapidly developing field. Written with a view to real-world applications, the authors describe storage technologies and then cover operation and control, system integration and battery management, and other topics

important in the design of these storage systems. The rapidly-developing area of electrochemical energy storage technology and its implementation in the power grid is covered in particular detail. Examples of Chinese pilot projects in new energy grids and micro grids are also included. Drawing on significant Chinese results in this area, but also including data from abroad,

this will be a valuable reference on the development of grid-scale energy storage for engineers and scientists in power and energy transmission and researchers in academia. Addresses not only the available energy storage technologies, but also topics significant for storage system designers, such as technology management, operation and control,

system integration and economic assessment Draws on the wealth of Chinese research into energy storage and describes	important Chinese energy storage demonstration projects Provides practical examples of the	application of energy storage technologies that can be used by engineers as references when designing new systems
