Submarine design and development (Book, 1984) [WorldCat.org] Designs for a battery- and diesel-propelled submarine emerged in the years following the Civil War. In 1867, an important step was made with the successful launch of the world's first steam-powered submarine, the Ictineo II, created by Spain's Narcis Monturiol [source: Holian]. This development is notable because nuclear submarines are essentially steam-powered. The first submarine design was drafted by William Borne but never got past the drawing

stage. Borne's submarine design was based on ballast tanks which could be filled to submerge and evacuated to surface - these same principles are in use by today's submarines.
