resource stoichiometry, top-down forces, and the relative harshness of certain cave environments. We hope this discussion both provides a broad overview of how food web dynamics influence cave community ...Food Webs in Caves | SpringerLink
 Phototrophs in caves have an impact on litholysis and lithogenesis. Biocalcified formations include calcified plant thalli, diverse forms of tuffaceous

stalactites and stromatolitic stalagmites. Sun-illuminated dry and submerged cave entrances including cenotes, ice caves and lava tubes are generally understudied. In comparison to phototrophic ...Phototrophs in Caves | SpringerLink - link.springer.com
 Cave organisms are the 'monsters' of the underground world and studying them invariably raises interesting

questions about the ways evolution has equipped them to survive in permanent darkness and low-energy environments. Undertaking ecological studies in caves and other subterranean habitats is not only challenging because they are difficult to access, but also because the domain is so ...Cave Ecology | SpringerLink
 Cave environments are characterized by darkness, low

temperature, high humidity, and oligotrophic organisms due to its relatively closed and strongly zonal environments. Up to now, 1626 species in 644 genera of fungi have been reported from caves and mines worldwide. In this study, we investigated the culturable mycobiota in karst caves in southwest China. In total, 251 samples from thirteen caves ...Culturable mycobiota from Karst caves in China

... - SpringerIt examines these caves and related topics in a format suitable for cavers, while also addressing a broad range of aspects useful for students and researchers. Since the Institute of Speleology was first established by Emil Racovita in 1920, a great deal of research has been conducted on all cave and karst types. As such, the book examines a variety of scientific

fields, including karst ...Cave and Karst Systems of Romania | SpringerLinkB ecause caves are completely or almost completely removed from the photosynthetic productivity of the sunlit realm, most cave ecosystems are supported either by inputs of organic matter from the surface or by in situ sources of inorganic chemical energy. The majority of caves have very low

energy and nutrient availability and thus, generally low biological activity and productivity. However ...The Snotty and the Stringy: Energy for ... - link.springer.comThe recent resurgence of academic interest in caves has demonstrated the central roles they played as arenas for ritual, ceremony and performance, and their importance within later prehistoric cosmologies.

Caves represent very particular types of archaeological site and require novel approaches to their recording, interpretation and presentation. This is especially true in understanding the ...Between Worlds | SpringerLinkPart of Springer Nature. Not logged in Microsoft Microsoft Bldg112 (3001871093) 207.46.13.194 .
