Basics and Areas of Application UNESCO

Bringing together current research, theories and methods from leading scholars in the field, this volume is a state-of-the-art study of intercultural communication competence and effectiveness. In the first part, contributors analyze the conceptual decisions made in intercultural

communication competence research by examining decisions regarding conceptualization, operationalization, research design and sampling. The second part presents four different theoretical orientations while illustrating how each person's theoretical bias directs the focus of research. Lastly, both quantitative and qualitative research approaches used in studying intercultural communication competence are examined.

An Introduction to Intercultural  
Communication John Wiley & Sons  
Today, students are more familiar with

other cultures than ever before because of the media, Internet, local diversity, and their own travels abroad. Using a social constructionist framework, Inter/Cultural Communication provides today's students with a rich understanding of how culture and communication affect and effect each other. Weaving multiple approaches together to provide a comprehensive understanding of and appreciation for the diversity of cultural and intercultural communication, this text helps students become more aware of their own identities and how powerful their identities can be in facilitating change—both in their own lives and in the lives of others.

*Manual for developing intercultural competencies* Prentice Hall

Competence in communicating across cultures is a prerequisite for success in today's fast-changing global community. In *Intercultural Communication*, Patel, Li and Sooknanan draw on their deep intercultural experience to show us how to build successful communication bridges across diverse cultures. The book explores various theoretical positions on global communication ethics and norms by providing an overview of the contemporary socio-cultural situation and seeking ways in

which common ground may be found between these different positions. The authors raise points of critical reflection on intercultural events and issues in various areas of communication including health, work, environment and education. The book also covers a range of issues, from the interactions of various cultures to the expansion of social organizations and the growing global infrastructure. By integrating 'glocal' perspectives in intercultural communication, the book addresses the long-term strategy of developing a global community without sacrificing indigenous local values.

*The SAGE Encyclopedia of Intercultural Competence* McGraw-Hill Education

The authors of the chapters in this book offer a complex landscape of professional and scholar approaches and research, in various parts of the world, including Canada, China, Estonia, France, Greece, Israel, Romania, and the United States of America.

Pedagogy, Disability and Communication  
Routledge

This book presents a structured yet flexible methodology for developing intercultural competence in a variety of contexts, both formal and informal. Piloted around the world by UNESCO, this methodology has proven to be

effective in a range of different contexts and focused on a variety of different issues. It, therefore can be considered an important resource for anyone concerned with effectively managing the growing cultural diversity within our societies to ensure inclusive and sustainable development. Intercultural competence refers to the skills, attitudes, and behaviours needed to improve interactions across difference, whether within a society (differences due to age, gender, religion, socio-economic status, political affiliation, ethnicity, and so on) or across borders. The book serves as a tool to develop those competences, presenting an innovative adaptation of what could be considered an ancient tradition of storytelling found in many cultures. Through engaging in

the methodology, participants develop key elements of intercultural competence, including greater self-awareness, openness, respect, reflexivity, empathy, increased awareness of others, and in the end, greater cultural humility. This book will be of great interest to intercultural trainers, policy makers, development practitioners, educators, community organizers, civil society leaders, university lecturers and students – all who are interested in developing intercultural competence as a means to understand and appreciate difference, develop relationships with those across difference, engage in intercultural dialogue, and bridge societal divides.

This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural

diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of

cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.
