India's recent growth rate has been impressive, with real GDP rising by over 8

percent a yearsince 2004. The country is also becoming a top global innovator for high-tech products andservices. Still, India is underperforming relative to its innovation potential. Even a dynamicyoung population--more than half of whom are under 25 years of age--is constrained when skillstraining and higher education are insufficient. To sustain competitiveness, economic growth, andrising living standards over the long term, India needs to aggressively harness its innovation potential. The term innovation is broadly defined in this book to include both the creation andcommercialization of new knowledge and the diffusion and absorption of existing knowledge in newcontexts. A unique feature is the book's focus on inclusive innovation, that is, knowledge creationand absorption activities most relevant to the needs of the poor. Concrete recommendations aremade for increasing productivity and welfare through the disciplining role of competition, includingtraining and education, information infrastructure, and public and private finance as supportmechanisms for broad-based

innovation. 'Unleashing India's Innovation: Toward Sustainable and Inclusive Growth' provides nationaland local policy makers, private sector enterprises, academic and research institutions, international organizations, and civil society with a better understanding of the power of innovation to fuel economic growth and poverty reduction. Schaum's Outline of Theory and Problems of Beginning Calculus Schaum's Outline Series Apache Jakarta-Tomcat, the official reference implementation for the Java servlet and JavaServer Pages technologies, has long been heralded as an excellent platform for the development and deployment of powerful Web applications. Version 4.0 offers not only numerous enhancements in flexibility and stability, but also an array of features that expand upon the Tomcat developer's already wealthy toolset. In this namesake title, best-selling author James Goodwill provides readers with a thorough introduction to Jakarta-Tomcat, offering instruction on topics ranging from the basic installation and configuration process and Web application deployment

to advanced concepts of integration with other popular Apache Foundation projects such as the Apache Web server, Struts, Log4J, and the Apache XML SOAP Project. In addition to an already comprehensive introduction to core Tomcat functionality, readers also benefit from a valuable primer of what is offered in version 4.0, as Goodwill takes care to thoroughly discuss new features such as valves, security realms, persistent sessions, and the Tomcat Manager Application. In summary, Apache Jakarta-Tomcat offers both novice and advanced Jakarta-Tomcat users a practical and comprehensive guide to this powerful software. "Many young people around the world --- especially the disadvantaged --- are leaving school without the skills they need to thrive in society and find decent jobs. As well as thwarting young people's hopes, these education failures are jeopardizing equitable economic growth and social cohesion, and preventing many countries from reaping the potential benefits of their growing youth populations. The 2012 Education for All Global Monitoring Report examines how skills development programmes can be improved to boost young people's opportunities for decent jobs and better lives."--Publisher's description

C is the programming language of choice when speed and reliability are required. It is used for many low-level tasks, such as device drivers and operating-system programming. For example, much of Windows and Linux is based on C programming. The updated 4th edition of Beginning C builds on the strengths of its predecessors to offer an essential guide for anyone who wants to learn C or desires a 'brush-up' in this compact, fundamental language. This classic from author, lecturer and respected academic Ivor Horton is the essential guide for anyone looking to learn the C language from the ground up.

During the 1980s and 1990s the elaboration of a reformed system of vocational qualifications was perhaps the most controversial of all the governments efforts to improve the provision of vocational education and training. Based largely on interviews with nearly 100 individuals who were closely involved with these reforms, this book provides an in-depth account of the origins, development and implementation of NVQ and GNVQ policies. In accounting for the progress of vocational qualifications policy three main areas are covered by the book. Firstly the

authors look at the origins of the reformed system, then examine the initial implementation of the NVQ and GNVQ policies in the late 1980s and early 1990s and identify the considerable problems that accompanied the reform process. Thirdly, the book focuses on the ways in which the reformed policy was sustained during the 1990s.

Experts analyze the policy challenges of taxation in developing countries, including corruption, tax evasion, and ineffective political structures. Many developing countries find it difficult to raise the revenue required to provide such basic public services as education, health care, and infrastructure. Complicating the policy challenges of taxation in developing countries are issues that most developed countries do not face, including widespread corruption, tax evasion and tax avoidance, and ineffective political structures. In this volume, experts investigate crucial challenges confronted by developing countries in raising revenue. After a comprehensive and insightful overview, each chapter uses modern empirical methods to study a

single critical issue essential to understanding the effects of taxes on development. Topics addressed include the effect of taxation on foreign direct investment; forms of corruption, tax evasion, and tax avoidance that are specific to developing countries; and issues related to political structure, including the negative effects of fiscal decentralization on the effectiveness of developmental aid and the relationship between democracy and taxation in Asian, Latin American, and European Union countries that have recently experienced both political and economic transitions.
