

9 2 Study And Intervention

Semaglutide in people with obesity: boosts wellbeing and ability to perform daily physical activities
 France-sized forests regrown since 2000 - study
 Trial tests intervention to reduce sedentary time in patients with kidney disease
 Support Notes: May 9-15
 What Patients Know About Their Implanted Coronary Stents: Not Enough, According to Morristown Medical Center Study
 Early bradycardia detection and therapeutic interventions in preterm infant monitoring
 Cultivating 'multilingual identities' in schools could improve language-learning abilities
 Study: ISCHEMIA trial represents small fraction of patients undergoing intervention
 Reduction in the Incidence of Type 2 Diabetes with Lifestyle Intervention or Metformin
 Tricuspid Trio: TRISCEND, CLASP TR, and TriBAND Studies Show Advances
 Meta-analyses: Mitral contour system delivers good clinical, patient-centered results
 A digital intervention targeting cognitive control network dysfunction in middle age and older adults with major depression
 9 2 Study And Intervention
 Multifactorial Intervention and Cardiovascular Disease in Patients with Type 2 Diabetes
 Study: BMI Measurements Should Be Tailored To Race and Ethnicity
 Common antibiotic effective in healing coral disease lesions
 Text-Based Intervention Prompts Young Adults to Quit Vaping
 Forests the size of France regrown since 2000, study suggests
 Coronary artery disease in East and South Asians: differences observed on cardiac CT

RACHAEL DOMINGUEZ

Semaglutide in people with obesity: boosts wellbeing and ability to perform daily physical activities
 9 2 Study And Intervention
 In the Steno-2 Study, we compared the effect of a targeted, intensified, multifactorial intervention with that ... up period of 7.8 years (range, 6.9 to 8.8) are shown in Table 3.
 Multifactorial Intervention and Cardiovascular Disease in Patients with Type 2 Diabetes
 To prevent one case of diabetes during a period of three years, 6.9 persons ... of type 2 diabetes. The study was designed to answer the following primary questions: Does a lifestyle intervention ...
 Reduction in the Incidence of Type 2 Diabetes with Lifestyle Intervention or Metformin
 Nonpharmacological interventions targeting putative network mechanisms of major depressive disorder (MDD) may represent novel treatments. This mechanistic study investigates how a video game-like ...
 A digital intervention targeting cognitive control network dysfunction in middle age and older adults with major depression
 An interactive text message-based intervention proved successful in helping young adults quit vaping, providing a potential avenue for cost-effective vaping cessation efforts across the population, ...
 Text-Based Intervention Prompts Young Adults to Quit Vaping
 In very preterm infants, cardio-respiratory events and associated hypoxemia occurring during early postnatal life have been associated with risks of retinopathy, growth alteration and neurodevelopment ...
 Early bradycardia detection and therapeutic interventions in preterm infant monitoring
 We have to really push the boundaries to make the tricuspid options available, feasible, and safe," says Thomas Modine.
 Tricuspid Trio: TRISCEND, CLASP TR, and TriBAND Studies Show Advances
 A new study finds that BMI measurement cutoffs to measure certain health risks weren't accurate for people who aren't White.
 Study: BMI Measurements Should Be Tailored To Race and Ethnicity
 To be Presented at American College of Cardiology 70th Annual Scientific Sessions, Study Led by Dr. Jordan Safirstein Suggests Keeping Stent Info on Smartphones ...
 What Patients Know About Their Implanted Coronary Stents: Not Enough, According to Morristown Medical Center Study
 A recent randomized trial tested an intervention to reduce sedentary time ...
 Amherst and Colorado State University) designed a study to see whether light intensity casual stepping could decrease ...
 Trial tests intervention to reduce sedentary time in patients with kidney disease
 Results from a new study ... 2% left main disease, 43.7% left ventricular systolic dysfunction, 16.8% end-stage renal disease), 17.3% had SIHD with negative or low-risk functional testing, and 31 ...
 Study: ISCHEMIA trial represents small fraction of patients undergoing intervention
 Epidemiological studies have observed East Asians (EAs) are significantly less likely to develop or die from coronary artery disease (CAD) compared with Caucasians. Conversely South Asians (SAs) ...
 Coronary artery disease in East and South Asians: differences observed on cardiac CT
 The objective of the study, published in Scientific Reports, was to experimentally assess the effectiveness of two intervention treatments ...
 conducted approximately 2 kilometers offshore ...
 Common antibiotic effective in healing coral disease lesions
 Novo Nordisk today announced new results from the STEP phase 3a clinical trial programme, demonstrating potential benefits beyond weight loss for people with obesity being treated with semaglutide 2.4 ...
 Semaglutide in people with obesity: boosts wellbeing and ability to perform daily physical activities
 An area of forest the size of France has regrown naturally across the world in the last 20 years, a study suggests. The restored forests have the potential to soak up the equivalent of 5.9 gigatonnes ...
 Forests the size of France regrown since 2000, study suggests
 More young people may choose to study foreign languages to ... compared with a 2.5-point rise in the partial intervention, and a one-point fall in the control group. Significantly, pupils in ...
 Cultivating 'multilingual identities' in schools could improve language-learning abilities
 Al-Anon: 12 step support groups for families and friends of alcoholics. Info line (479) 441-9705 or (888) 425-2666 or visit al-anon.org. • Get A Life Step Study: 12 p.m. Monday at Community Bible ...
 Support Notes: May 9-15
 Additionally, after the procedure, nearly half of the cohort experienced a NYHA class improvement of 1 or more at 1 month (67.9% ... the study, the prevalence of all-cause mortality was 2.2% ...
