HALLIE LILLIANNA

Geography Review Magazine Volume 32, 2018/19 Issue 4 Teacher Created Materials
 "'Teaching the Humanities and Social Sciences 6E' prepares teachers to develop and implement programs in the humanities and social sciences learning area from F-10. It successfully blends theory with practical approaches to provide a basis for teaching that is engaging, inquiry-based and relevant to students' lives."--Publisher's website.

Environmental Learning Routledge

For the past 2 decades, the field of social studies education has seen an increase in research on the use of discussions as an essential instructional technique. This book examines the importance of using quality dialogue as a tool to help students understand complex issues in social studies. This edited volume provides a collection of well-known, evidence-based discussion techniques, as well as classroom examples showing the methods in use. While using discussion as an instructional method is widely considered a best practice of civic learning, actual high-quality discussions are rare and notoriously difficult to facilitate. *Making Classroom Discussions Work* is designed to guide teacher educators and classroom teachers in facilitating equitable and productive discussions that will boost learning and democratic engagement. **Book Features:** Emphasizes the rationale for using discussion in social studies teaching. Collects strategies that have been proposed in disparate journal articles and books in one convenient volume. Presents research-based challenges and supports for conducting and assessing discussions in the social studies. Includes methods and tips to help teachers make discussions more equitable in their classrooms.

Measuring History Cambridge University Press

An examination of the growth and development of alternative schools in American society and their role in the public school environment. In *Alternative Schools: A Reference Handbook*, educator Brenda Edgerton Conley surveys the emerging alternatives to our conventional educational system—a system that is not only costly, but ineffective for many children. In a resource aimed at a broad audience—school administrators, politicians, and, most important, parents—Conley offers both a historical and a present-day perspective on alternative educational programs. What sets the alternative education movement apart, she argues, is its acknowledgment that we all learn differently. That knowledge has given rise to an explosion of exciting alternatives—from open schools to home schooling, from charter schools to church schools. These alternative schools are smaller and less bureaucratic, more responsive to the community, and more receptive to change. **Concept-Based Instruction** John Wiley & Sons

Introducing Human Geographies is the leading guide to human geography for undergraduate students, explaining new thinking on essential topics and discussing exciting developments in the field. This new edition has been thoroughly revised and updated and coverage is extended with new sections devoted to biogeographies, cartographies, mobilities, non-representational geographies, population geographies, public geographies and securities. Presented in three parts with 60 contributions written by expert international researchers, this text addresses the central ideas through which human geographers understand and shape their subject. Part I: Foundations engages students with key ideas that define human geography's subject matter and approaches, through critical analyses of dualisms such as local-global, society-space and human-nonhuman. Part II: Themes explores human geography's main sub-disciplines, with sections devoted to biogeographies, cartographies, cultural geographies, development geographies, economic geographies, environmental geographies, historical geographies, political geographies, population geographies, social geographies, urban and rural geographies. Finally, Part III: Horizons assesses the latest research in innovative areas, from mobilities and securities to non-representational geographies. This comprehensive, stimulating and cutting edge introduction to the field is richly illustrated

throughout with full colour figures, maps and photos. These are available to download on the companion website, located at www.routledge.com/9781444135350.

Making Classroom Discussions Work Crown House Publishing Ltd

"A highly readable and superbly fun guide to the why and how of doing fieldwork in human geography... I recommend it highly to any geographer-wannabes and practicing-geographers. The latter group, including myself, might well rediscover the fun of doing geography." - Professor Henry Yeung, National University of Singapore "An excellent introduction to the art and science of fieldwork. It makes clear that fieldwork is not just about getting out of the classroom and gaining first-hand experience of places, it is about instilling passion about those places." - Professor Stuart C. Aitken, San Diego State University "An indispensable guide to fieldwork that will enrich the practice of geography in a myriad of different ways. In particular, the diverse materials presented here will encourage students and academics alike to pursue new approaches to their work and instil a greater understanding of the conceptual and methodological breadth of their discipline." - Professor Matthew Gandy, University College London "If fieldwork is an indispensable component of geographical education then this book is equally essential to making the most of fieldwork...This book gives students the tools to realise the full potential of what, for many, is the highlight of their geography degree." - Professor Noel Castree, Manchester University Fieldwork is a core component of Human Geography degree courses. In this lively and engaging book, Richard Phillips and Jennifer Johns provide a practical guide to help every student get the most out of their fieldwork. This book: Encourages students to engage with fieldwork critically and imaginatively Explains methods and contexts Links the fieldwork with wider academic topics. It looks beyond the contents of research projects and field visits to address the broader experiences of fieldwork: working in groups, understanding your ethical position, developing skills for learning and employment and opening your eyes, ears and minds to the wider possibilities of your trip. Throughout the book, the authors present first person descriptions of field experiences and predicaments, written by fieldtrip leaders and students from around the world including the UK, Canada, Singapore, Australia and Africa.

The Kindness Principle Bloomsbury Publishing

Teachers need realistic ideas to help them the day-to-day challenges of inclusion. Written by an experienced and sympathetic Inclusion Coordinator, *Inclusion* covers planning and setting targets using P scales and IEPs, photocopiable sheets and templates. The book helps teachers and TAs work together to best support students and promotes successful communication between teachers and students, and students and students.

Reflective Teaching of Geography 11-18 Pearson Education

THIS IS THE SERIES BLURB...LIST ALL BOOKS TOGETHER:Continuum Studies in Reflective Practice and Research is a new series of textbooks aimed at teaching students. As with Andrew Pollard's books, they use the idiom of reflective teaching. In other words, they avoids the two extreme views about learning to teach, namely that it is best done simply through acquiring practical "tricks of the trade" without any theory or that it is best done applying sytematized, objective theory. The distinctive feature of relective teaching is that it encourages practitioners to develop by continually inter-relating theory and research findings to their own practice, situation and style.These comprehensive textbooks provide an accessible guide to all those who are new to teaching in secondary schools. Covering all aspects of job, from planning through to teaching and assessment, the authors provide constructive, accessible and, above all, practical advice to help subject teachers become more effective in their work.

Resources in Education Cengage AU

This book brings together recent papers which make important contributions to understanding and developing primary geography. It considers primary teachers' and trainee teachers' knowledge of geography; how the primary curriculum uses geography; teachers' planning of geography teaching; the way in which aspects of geography are taught; what high quality geography might look like; and

children's geographical understanding and voices. Though geography curricula change quite often in countries around the world, the core matters noted above remain of constant and vital importance. The papers in this book either concern research with primary teachers and children, or consider key concerns in primary geography, providing important perspectives for thinking about future developments in geography teaching and curriculum initiatives in primary schools. This is a stimulating and enticing collection written by leading exponents of, and experts in, primary geography education. This book was originally published as a special issue of *Education* 3-13.

Introducing Human Geographies IAP

180 Days of Social Studies is a fun and effective daily practice workbook designed to help students build social studies content knowledge. This easy-to-use fourth grade workbook is great for at-home learning or in the classroom. The engaging standards-based activities cover grade-level skills with easy to follow instructions and an answer key to quickly assess student understanding. Each week students explore a new topic focusing on one of the four social studies disciplines: history, civics, geography, and economics. Watch student's confidence soar as they build analytic skills with these quick independent learning activities. Parents appreciate the teacher-approved activity books that keep their child engaged and learning. Great for homeschooling, to reinforce learning at school, or prevent learning loss over summer. Teachers rely on the daily practice workbooks to save them valuable time. The ready to implement activities are perfect for daily morning review or homework. The activities can also be used for intervention skill building to address learning gaps. Supports the C3 Framework and aligns to the NCSS curriculum standards.

Geographers Scarborough, Ont. : Prentice Hall Ginn

Geography is not only the study of the surface of the planet and the exploration of spatial and human - environment relationships, but also a way of thinking about the world. Guided by the Australian Curriculum and the Professional Standards for Teaching School Geography (GEOGstandards), *Teaching Secondary Geography* provides a comprehensive introduction to both the theory and practice of teaching Geography. This text covers fundamental geographical knowledge and skills, such as working with data, graphicacy, fieldwork and spatial technology, and provides practical guidance on teaching them in the classroom. Each chapter features short-answer and 'Pause and Think' questions to enhance understanding of key concepts, and 'Bringing It Together' review questions to consolidate learning. Classroom scenarios and a range of information boxes are provided throughout to connect students to additional material. Written by an author team with extensive teaching experience, *Teaching Secondary Geography* is an exemplary resource for pre-service teachers.

This book supports trainee and beginning teachers to develop their knowledge and understanding and enable them to plan and teach outstanding geography lessons in primary schools.

Research and Debate in Primary Geography Routledge

A new series of full-coverage resources developed for the AQA 2016 A/AS Level Geography specification. This full-colour Student Book covers all core and optional units for the AQA AS and A Level Geography specification for first teaching from September 2016. Students are encouraged to develop links between physical and human topics, understand systems, processes, and acquire geographical skills. Helping to bridge the gap from GCSE to A Level, it also provides support for fieldwork skills and for the geographical investigation at A Level. A 'Maths for geographers' feature helps students develop and apply their mathematical and statistical skills, and a range of assessment-style questions support students in developing their exam skills.

A/AS Level Geography for AQA Student Book Human Kinetics

What is the role of the humanities in the modern school? Should geography, history, RE and Citizenship teachers remain faithful to long-standing subject cultures and pedagogies? Or is there another way to consider how the curriculum, and the notion of individual subjects and teachers' pedagogy, could be constructed? Drawing on case studies taken from a range of innovative secondary schools, and interrogating the use of cross-curricular approaches in UK schools, *Cross-Curricular Teaching and Learning in Humanities* constructs a research based pedagogy with practical steps for students and teachers as they consider how cross-curricular approaches can be implemented in their own subject areas. Key features include: Clear theoretical frameworks for cross-curricular processes of teaching and learning in the humanities Lively and engaging text that blends key issues with stories of current practice An analysis of the use of assessment, enquiry, and pupil talk as key components in building a cross-curricular approach to the humanities Practical and reflective tasks that enable to reader to apply their reading to day to day practice, alongside links to professional standards Summaries of key research linked to suggestions for further reading Professional development activities to promote cross-curricular dialogue Part of the *Cross-Curricular Teaching and Learning in the Secondary School* series, this timely interdisciplinary textbook is essential reading for all students on Initial Teacher Training courses and practising teachers looking to holistically introduce cross-curricular themes and practices in secondary Humanities teaching.

Social Studies for Secondary Schools Teacher Created Materials

This book revolves around the idea that making personal connections with the material to be learned is what creates powerful learning experiences. *Making Connections in Elementary and Middle School Social Studies* is a comprehensive, reader-friendly text that demonstrates how personal connections can be incorporated into social studies education while meeting the National Council for the Social Studies' thematic, pedagogical, and disciplinary standards. The book examines a variety of methods both novice and experienced teachers alike can use to make social studies more interesting and to help students make their own personal connections.

Written by Dave Whitaker, *The Kindness Principle: Making relational behaviour management work in schools* advocates a behaviour management approach rooted in values, acceptance and a genuine understanding of children's behaviour. In an education system that too often reaches for the carrot-and-stick approach to dealing with poor pupil behaviour, an approach built on kindness and compassion might just provide the cure. *The Kindness Principle* begins with the idea that relationships should be at the heart of behaviour management and culture, and sets out the ways in which the adoption of relational approaches can help create safer and happier schools. Schools where all staff and learners are valued and understood, where expectations and standards are high, and where kindness and acceptance matter. Dave Whitaker explores why it is so important to understand children - offering techniques and advice on how to work effectively with all children (even the most challenging and troubled ones) without resorting to zero-tolerance, no-excuses and consequence-driven practices. Dave also shares a wealth of real-life experiences from some of the most challenging schools in the country, along with research-informed insights that will help teachers understand children's behaviour in a new light. To this end he provides a wealth of guidance to help develop effective practice and learn from people who have actually walked the walk and don't just talk the talk. Furthermore, the topics covered in the book include: restorative approaches, unconditional positive regard, building personal resilience, structures and routines, and the ins and outs of rewards and sanctions. Suitable for teachers, school leaders and anyone working with children.
