Bulk Material Handling W.E. Upjohn Institute

Today's world is full of ups and downs and young people must guard their mental health. Whether it is dealing with the realities of COVID-19, depression, anxiety, anger, grief, guilt, low self-esteem, or the stresses of everyday life, a person's mental health can suffer. There is no better way to guard mental health than through journaling. Unlike the complexity of other journals that prompt writing about something that is irrelevant to a person's life or steers them away from what they are truly feeling or experiencing, this journal is simple and open. It allows for TRUE expression. This journal was composed by the award-winning team at The Therapy Institute. The Therapy Institute boasts nearly two decades of working with children from all walks of life and their tried-and-true methods have been utilized to maintain the mental and physical health of children from around the world.

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

Educational Administration and Leadership Identity Formation explores approaches and issues that arise in leadership identity formation in a variety of educational contexts. Bringing together a range of national and international contributions, this volume provides a global perspective on this multi-dimensional topic. This book examines the theoretical foundations relevant to identity and identity formation, and their implications for researching and teaching in educational administration and leadership. It includes a range of sociological, psychological, political, cultural, and socio-linguistic approaches to examining leadership identity formation. It also addresses models, practices and experiences that vary according to identity politics, cultural difference, and historical and contemporary privilege in leadership identity formation. Working from theoretical and practice-base perspectives, this book will be of great interest for researchers, practitioners, policy-makers and academics, as well as students in teacher education programs and graduate courses in educational administration and leadership, organisational studies, and educational ethics for broad international use.
