Building Surveyor's
Pocket Book is an
accessible
encyclopaedia of
matters vital to
building surveyors.
Well-illustrated with
diagrams, pictures,
tables, and graphs, it
covers all essential
elements of building
pathology, building
performance, and
building construction
terminology in a
simple, accessible way
for the practitioner and
student. This Pocket
Book provides a
practical and portable

reference text, working
as a first-stop
publication for those
wishing to refresh their
knowledge or in need
of guidance on
surveying practice.
Working through
fundamental principles
in key practice areas,
the book is not overly
bound by the
regulation and
legislation of one
region, and the
principles can be
applied internationally.
This book is ideal
reading for individual
surveyors,
practitioners, and
students in building
surveying, facilities
management,
refurbishment,
maintenance,
renovation, and
services management.

It is also of use for those interested in building forensics, building performance, pathology, and anyone studying for their RICS APC. Many other professions in architecture, contracting, engineering, and safety will also find the book of use when undertaking similar practice.

This book begins from a critical account of the final months of the Sri Lankan civil war, tracing themes of nationalism, discourse and conflict memory through this period of immense violence and into its aftermath.

Using these themes to explore state crime, atrocity and its denial and representation, Seoghe offers an analysis of how stories of conflict are authored and constructed. This book examines the political discourse of

the former Rajapaksa government, highlighting how fluency in international discourses of counter-terrorism, humanitarianism and the 'reconciliation' expected of states transitioning from conflict can be used to conceal and deny state violence. Drawing on extensive interviews with activists, academics, politicians, state representatives and international agency staff, and three months of observation in Sri Lanka in 2012, Seoighe demonstrates how the Rajapaksa government re-narrativised violence through orchestrated techniques of denial and mass ritual discourse. It drew on and perpetuated a heightened majoritarian Sinhala-

Buddhist nationalism which consolidated power under Sinhalese political elites, generated minority grievances and, in turn, sustained the repression and dispossession of the Tamil community of the Northeast. A detailed and evocative study, this book will be of special interest to scholars of conflict studies, political violence and critical criminology. Altogether Builders' Labourers and Constructional Workers' Society, Amalgamated Society of Boilermakers, Shipw New Age International A contemporary, thoroughly researched geography series for class 6-8 based on the latest ICSE syllabus, this series helps the learner to explore the

natural and human environment and understand their continuous interaction. From François Martin to Dupleix 1674-1754 CRC Press

Know news like - Karnataka government implements e-RUPI with NPCI and SBI, NPCI partners with Udemy Business to upskill employees etc. Cultural Heritage of the Tamils Notion Press, Incorporated This is a study of the colonization of Pondicherry, Tamil Nadu and South India by the French during the eighteenth century, and their interactions

with the Indian rulers and populations in the political, economic, social and religious spheres. French Governors based in Pondicherry since François Martin up to Dupleix never acquired any territory for France through outright conquest. They or their masters in France never had any grand plan to establish a French empire in India. Some Indian rulers were friendly with the French and the English as it served their interests. The study demonstrates that the French colonizers and missionaries would not have survived in India without the collaboration of the Indian dubashes, merchants, certain Indian rulers and military men. This collaboration was not

on an equal footing, as the sepoys, merchants and dubashes were always subordinate and submissive to the Europeans. Even Ananda Ranga Poullé, the most famous of the Indian dubashes had to resort to the art of flattery to be in the good books of his 'master'. European arrival and presence in India heralded the beginning of a cultural clash between the Europeans and Indians, in which the former had the upper hand. There was never any partnership or 'master-bania' relationship between the French and the Indians. Instead, the relationship had all the trappings of a 'master-subordinate' relationship, where the subordinate even though he might be a

dubash was always at the mercy of the colonizers. The element of force, aggressivity and violence was omnipresent in European presence and expansion in India, in the political, economic and religious fields. Please note: This title is co-published with X. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

both materials and construction techniques in a combined text as per the latest trends in university curriculums. It also caters to the needs of the universities where these subjects are offered across two semesters as well. Of the 32 chapters in this book, 13 are dedicated to building construction materials while the remaining 19 focus on conventional as well as modern techniques in construction. The chapters are supplemented by a plethora of self-explanatory illustrations for easy comprehension. Relevant references to IS codes and standards make this text ideal for extended learning. Oswaal Books and Learning Private

Limited
Basic Civil Engineering is designed to enrich the preliminary conceptual knowledge about civil engineering to the students of non-civil branches of engineering. The coverage includes materials for construction, building construction, basic surveying and other major topics like environmental engineering, geo-technical engineering, transport traffic and urban engineering, irrigation & water supply engineering and CAD.

War, Denial and Nation-Building in Sri Lanka Pearson

Education India
Building Materials is a textbook designed for undergraduate civil engineering students who are offered

courses on Building and Construction Materials. The book primarily covers the AICTE syllabus on Materials, Testing, and Evaluation. It provides detailed and up-to-date information on various building and construction materials, including green materials. The book discusses the usual building materials like stones, bricks, lime, cement, aggregates, mortars, concrete and special concretes, wood, ferrous materials, steel, plastics, non-ferrous materials, glass, ceramic materials, plastics, paints, etc. Wherever necessary, the substitute materials and the greenness of the material are identified and explained. The book provides a

thorough discussion of various materials using appropriate illustrations, real-life photographs, examples, and case studies for better understanding.

Dynamic QR code to keep the students updated for 2021 Exam paper or any further CISCE notifications/circulars Select Proceedings of ACMM 2021 PHI Learning Pvt. Ltd. The term Maintenance of a building refers to the work done for keeping an existing building in a condition where it can perform its intended functions. Usually, the buildings last only for 40 to 50 years in a good shape just because of regular inspection and maintenance that enable timely identification of deteriorated elements. Overlooked dilapidation,

inadequate maintenance and lack of repair works may lead to limited life span of a building. This comprehensive book, striving to focus on the maintenance, repair & rehabilitation and minor works of a building, presents useful guidelines that acquaint the readers with the traditional as well as modern techniques for upkeeping and repairing of buildings already constructed. Dexterously organised into five parts, this book in Part I deals with the maintenance of buildings. Description of the construction chemicals, concrete repair chemicals, special materials used for repair, and repair of various parts of a building is given in Part

II. Strengthening of reinforced concrete members by shoring, underpinning, plate bonding, RC jacketing and FRP methods are explored in Part III, which also highlights rebuilding of RC slabs and protection of earth slopes. Part IV of the book exposes the reader to the minor works done in a building such as construction of compound walls, gates, waters sumps, house garage, relaying of floors, joining two adjacent rooms and so on. Part V is based on some allied topics involving control on termites and fungus in buildings as well as introduction of Vaastu Shastra and its main recommendations for a single house in a plot. Using an engaging style, this book will

prove to be a must-read for the undergraduate and postgraduate students of civil engineering as well as for the polytechnic and ITI diploma students. Besides, the book will also be of immense benefit to the technical professionals across the country. **KEY FEATURES** • The text displays several figures to make the concepts clear. • Chapter-end references make the text suitable for further study. • Appendices at the end of the text provide extra information on non-destructive field tests for survey of the condition of concrete buildings and rough estimation of the construction and maintenance costs of buildings. *BUILDING*

CONSTRUCTION

Rowman & Littlefield
The Building Services Handbook summarises concisely, in diagrams and brief explanations, all elements of building services. Practice, techniques and procedures are clearly defined with supplementary references to regulations and relevant standards. This is an essential text for all construction/building services students up to undergraduate level, and is also a valuable reference text for building service professionals. This new book is based on Fred Hall's 'Essential Building Services and Equipment 2ed' and

has been thoroughly updated throughout. It is a companion volume to the highly popular textbook 'Building Construction Handbook' by Chudley and Greeno, which is now in its fourth edition.

Building Construction Handbook
