Directed by Richard Donner and written by David Seltzer, *The Omen* (1976) is perhaps the best in the devil-child cycle of movies that followed in the wake of *Rosemary's Baby* and *The Exorcist*. Released to a highly suggestible public, *The Omen* became a major commercial success, in no small part due to an elaborate pre-sell campaign that played and preyed on apocalyptic fears and a renewed belief in the Devil and the supernatural. Since polarising critics and religious groups upon its release, *The Omen* has earned its place in the horror film canon. It's a film that works on different levels, is imbued with nuance, ambiguity and subtext, and is open to opposing interpretations. Reflecting the film's cultural impact and legacy, the name 'Damien' has since become a pop culture byword for an evil child. Adrian Schober's *Devil's Advocate* entry covers the genesis, authorship, production history, marketing and reception of *The Omen*, before going on to examine the overarching theme of paranoia that drives the narrative: paranoia about the 'end times'; paranoia about government and conspiracy; paranoia about child rearing (especially, if one strips away the layer of Satanism); and paranoia about imagined threats to the right-wing Establishment from liberal and post-counter-cultural forces of the 1970s.

Wie aktuell ist die Antike? Können wir Modernen von Homer etwas lernen und können wir mit Hilfe der antiken Tragödien einige tiefstehende Mißverständnisse unserer Zeit von uns abschütteln? Auf diese Fragen antwortet Bernard Williams in einer faszinierenden Studie, die als sein Hauptwerk gilt, indem er insbesondere die antike Literatur von einseitigen modernen Deutungen befreit. Die Antike ist uns nicht nur viel näher als wir glauben, sie verfügt auch über Begriffe, die unser moralisches Selbstverständnis und die damit verbundenen unausweichlichen Konflikte besser beschreiben als unsere eigenen Begriffe.

Die in diesem Band enthaltenen Beiträge gehören in den Umkreis von Waldenfels' 1987 erschienenem Buch *Ordnung im Zwielficht*. Der dort vorgelegte Grundriß wird hier auf mannigfache Weise ausgeführt und fortgeführt - ein Materialienband also zu *Ordnung im Zwielficht*, doch gleichzeitig ein Vorbereitungsband zur Behandlung dessen, was Waldenfels dort responsive Rationalität genannt hat.

In *This Much I Know about Mind Over Matter* John Tomsett addresses, with refreshing honesty, the growing problem of the mental health issues experienced by children and young people, offering up a plan for averting a mental health crisis in our schools. Tomsett interweaves his formative and professional experience with strategies for addressing students' mental health issues and insights from his interviews with high profile thinkers on the subject including Professor Tanya Byron, Natasha Devon, Norman Lamb, Tom Bennett, Claire Fox and Dr Ken McLaughlin. The book is replete with truths about the state of children's mental wellbeing, about creating a school culture where everyone can thrive and about living in the shadow of his mother's manic depression. With his typical mixture of experience, wisdom and research-based evidence, Tomsett explains how he manages the pressure of modern day state school headship in a climate where you are only as good as your last set of examination results, a pressure which acutely affects staff and students too. He outlines his strategies for mitigating this pressure and turning the tide of students' mental health problems. The autobiographical narrative modulates between self-effacing humour and heart-wrenching stories of his mother's life, blighted by mental illness. His professional reflections are a

wisdom-filled blend of evidence-based policy and decades of experience in teaching and school leadership. Tomsett writes with genuine humility. His prose is beautiful in its seeming simplicity. When you pick up one of his books you will find you have read the first fifty pages before you have even noticed: surely the hallmark of truly great writing. Topics covered include: the real state of the nation's mental health, the perfect storm that is precipitating a mental health crisis in schools, the problems of loose terminology what do we really mean when we talk about a mental health epidemic? and poor understanding of mental health problems and mental illness, the disparity between mental and physical health in public discourse, treatment and funding, beginning the conversation about mental health, the philosophical and psychological principles underpinning the debate, strategies to support students in managing their own mental health better, resilience, growth mindset, mindfulness, grit, failure and mistakes, coping with pressure, York's school wellbeing workers project, evidence-based strategies that have worked in Huntington School, metacognitive strategies for improving exam performance, interviews with professionals in the field, the reality of living with a serious mental illness, self-concept and achievement, perfectionism, the relationship between academic rigour and therapeutic education and, significantly, what the research says, what the experts say and what Tomsett's experience says about averting a mental health crisis in schools. Suitable for teachers, leaders and anyone with an interest in mental health in schools.

Antigone Kefala is one of the most significant of the Australian writers who have come from elsewhere; it would be difficult to overstate the significance of her life and work in the culture of this nation. Over the last half-century, her poetry and prose have reshaped and expanded Australian literature and prompted us to re-examine its premises and capacities. From the force of her poetic imagery and the cadences of her phrases and her sentences to the large philosophical and historical questions she poses and to which she responds, Kefala has generated in her writing new ways of living in time, place and language. Across six collections of poetry and five prose works, themselves comprising fiction, non-fiction, essays and diaries, she has mapped the experience of exile and alienation alongside the creativity of a relentless reconstitution of self. Kefala is also a cultural visionary. From her rapturous account of Sydney as the place of her arrival in 1959, to her role in developing diverse writing cultures at the Australia Council, to the account of her own writing life amongst a community of friends and artists in *Sydney Journals* (2008), she has reimagined the ways we live and write in Australia.

A practical guide to facilitating philosophical conversations with groups (especially in schools) based on philosophical and pedagogical principles derived from the ancient Greek philosophers but supported my modern-day research and pedagogical practices. It divides facilitation up into basic, expert and advanced levels, allowing a teacher to get going with some basic moves and principles allowing for development of facilitation over time. As well as being packed with practical strategies, questioning prompts and methods for developing metacognition and critical thinking in pupils, it also has brand new session plans published nowhere else previously.

This book argues for a mixed theory of legal punishment that treats both crime reduction and retribution as important aims of the state. A central question in the philosophy of law is why the state's punishment of its own citizens is justified. Traditionally, two theories of punishment have dominated the field: consequentialism and retributivism. According to consequentialism, punishment is justified when it maximizes positive outcomes. According to retributivism, criminals should be punished because they deserve it. This book recognizes the strength of both positions. According to the two-tiered model, the institution of punishment and statutory penalties, as set by the legislature, are justified based on their costs and benefits, in terms of deterrence and rehabilitation. The law

exists to preserve the public order. Criminal courts, by contrast, determine who is punished and how much based on what offenders deserve. The courts express the community's collective sense of resentment at being wronged. This book supports the two-tiered model by showing that it accords with our moral intuitions, commonly held (compatibilist) theories of freedom, and assumptions about how the extent of our knowledge affects our obligations. It engages classic and contemporary work in the philosophy of law and explains the theory's advantages over competing approaches from retributivists and other mixed theorists. The book also defends consequentialism against a longstanding objection that the social sciences give us little guidance regarding which policies to adopt. Drawing on recent criminological research, the two-tiered model can help us to address some of our most pressing social issues, including the death penalty, drug policy, and mass incarceration. This book will be of interest to philosophers, legal scholars, policymakers, and social scientists, especially criminologists, economists, and political scientists.

"In this book, Diana Senechal confronts a culture that has come to depend on instant updates and communication at the expense of solitude. Schools today emphasize rapid group work and fragmented activity, not the thoughtful study of complex subjects. The Internet offers contact with others throughout the day and night; we lose the ability to be apart, even in our minds. Yet solitude plays an essential role in literature, education, democracy, relationships, and matters of conscience. Throughout its analyses and argument, the book calls not for drastic changes but for a subtle shift: an attitude that honors solitude without descending into dogma"--Provided by publisher.

The great war epic of Western literature, in a stunning translation by acclaimed classicist Robert Fagles A Penguin Classic Dating to the ninth century B.C., Homer's timeless poem still vividly conveys the horror and heroism of men and gods wrestling with towering emotions and battling amidst devastation and destruction, as it moves inexorably to the wrenching, tragic conclusion of the Trojan War. Renowned classicist Bernard Knox observes in his superb introduction that although the violence of the Iliad is grim and relentless, it coexists with both images of civilized life and a poignant yearning for peace. Combining the skills of a poet and scholar, Robert Fagles brings the energy of contemporary language to this enduring heroic epic. He maintains the drive and metric music of Homer's poetry, and evokes the impact and nuance of the Iliad's mesmerizing repeated phrases in what Peter Levi calls "an astonishing performance." For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

The Enlightenment is generally painted as a movement of ideas and society lasting from the late seventeenth to the early nineteenth century, but this book argues that the Enlightenment is an essential component of modernity itself. In the course of the study, Martin Davies offers an original world-view and a critique of some recent interpretations of the Enlightenment.

Asian cinemas are connected to global networks and participate in producing international film history while at the same time influenced and engaged by spatial, cultural, social and political transformations. This interdisciplinary study forwards a productive pairing of Asian cinemas and space, where space is used as a discursive tool to understand cinemas of Asia. Concentrating on the performative potential of cinematic space in Asian films, the contributors discuss how space (re)constructs forms of identities and meanings across a range of cinematic practices. Cities, landscapes, buildings and interiors actively shape cinematic performances of such identities and their significances. The essays are structured around the spatial themes of ephemeral, imagined and contested spaces. They deal with struggles for identity, belonging, autonomy and mobility within different national and transnational contexts across East, Southeast and parts of South Asia in particular, which are complicated by micropolitics and subcultures, and by the interventions and interests of global lobbies.

"The first complete account of the ideas and writings of a major figure in twentieth-century intellectual life. Walter Kaufmann (1921-1980) was a charismatic philosopher, critic, translator, and poet who fled Nazi Germany at the age of eighteen, emigrating alone to the United States. He was astonishingly prolific until his untimely death at age fifty-nine, writing some dozen major books, all marked by breathtaking erudition and a provocative essayistic style. He single-handedly rehabilitated Nietzsche's reputation after World War II and was enormously influential in introducing postwar American readers to existentialism. Until now, no book has examined his intellectual legacy. Stanley Corngold provides the first in-depth study of Kaufmann's thought, covering all his major works. He shows how Kaufmann speaks to many issues that concern us today, such as the good of philosophy, the effects of religion, the persistence of tragedy, and the crisis of the humanities in an age of technology. Few scholars in modern times can match Kaufmann's range of interests, from philosophy and literature to intellectual history and comparative religion, from psychology and photography to art and architecture. Corngold provides a heartfelt portrait of a man who, to an extraordinary extent, transfigured his personal experience in the pages of his books. This original study, both appreciative and critical, is the definitive intellectual life of one of the twentieth century's most engaging yet neglected thinkers. It will introduce Kaufmann to a new generation of

Addressing a gap in political thought, this book examines the interplay between ethos and practical reason in everyday life. It suggests that the burgeoning literature on the 'ethotic' dimension of democracy leaves untreated the issue of practical reason and how it infuses political judgment and action.

The heroic Greek dramas that have moved theatergoers and readers since the fifth century B.C. Towering over the rest of Greek tragedy, the three plays that tell the story of the fated Theban royal family—Antigone, Oedipus the King and Oedipus at Colonus—are among the most enduring and timeless dramas ever written. Robert Fagles's authoritative and acclaimed translation conveys all of Sophocles's lucidity and power: the cut and thrust of his dialogue, his ironic edge, the surge and majesty of his choruses and, above all, the agonies and triumphs of his characters. This Penguin Classics edition features an introduction and notes by the renowned classicist Bernard Knox. "Following a desperate night-long battle, a group of beleaguered soldiers in an isolated base in Kandahar are faced with a lone woman demanding the return of her brother's body. Is she a spy, a black widow, a lunatic or what she claims to be: a grieving sister intent on burying her brother according to local rites? As she persists, single-minded in her mission, the camp's tense, claustrophobic atmosphere comes to a boil as the men argue about what to do next."--Back cover.

The great epic of Western literature, translated by the acclaimed classicist Robert Fagles A Penguin Classic Robert Fagles, winner of the PEN/Ralph Manheim Medal for Translation and a 1996 Academy Award in Literature from the American Academy of Arts and Letters, presents us with Homer's best-loved and most accessible poem in a stunning modern-verse translation. "Sing to me of the man, Muse, the man of twists and turns driven time and again off course, once he had plundered the hallowed heights of Troy." So begins Robert Fagles' magnificent translation of the Odyssey, which Jasper Griffin in the New York Times Book Review hails as "a distinguished achievement." If the Iliad is the world's greatest war epic, the Odyssey is literature's grandest evocation of an everyman's journey through life. Odysseus' reliance on his wit and willness for survival in his encounters with divine and natural forces during his ten-year voyage home to Ithaca after the Trojan War is at once a timeless human story and an individual test of moral endurance. In the myths and legends retold here, Fagles has captured the energy and poetry of Homer's original in a bold, contemporary idiom, and given us an Odyssey to read aloud, to savor, and to treasure for its sheer lyrical mastery. Renowned classicist Bernard Knox's superb introduction and textual commentary provide insightful background information for the general reader and scholar alike, intensifying the strength of Fagles's translation. This is an Odyssey to delight both the classicist and the general reader, to captivate a new generation of Homer's students. A Theory of Legal Punishment Hachette UK

In late 19th century England, Oscar Wilde popularized aestheticism, also known as art-for-art's-sake - the idea that art, that beauty, should not be a vehicle for morality or truth, but an end in-and-of-itself. Rothko and Jackson Pollock enthroned the idea, creating paintings that are barely graded panels of color or wild splashes. Today, pop culture is aestheticism's true heir, from the perfect charismatic emptiness of Ocean's Eleven to the hyper-choreographed essentially balletic movements in the best martial arts movies. But aestheticism has a dark core, one that Social Justice Activists are now gathering to combat, revealing the damaging ideology reflected in or concealed by our most beloved pop culture icons. Taking Bryan Fuller's television version of Hannibal "The Cannibal" Lecter as its main text - and taking Žižek-style illustrative detours into Malcolm in the Middle, Dark Knight Rises, Harry Potter, Interview with a Vampire, Dexter and more - this book marshals Walter Pater, Camille Paglia, Nietzsche, the Marquis de Sade, Kant and Plato, as well as Dante, Shakespeare, Milton, Blake, Baudelaire, Beckett, Wallace Stevens and David Mamet to argue that Fuller's show is a deceptively brilliant advance of aestheticism, both in form and content - one that investigates how deeply art-for-art's-sake, and those of us who consciously or unconsciously worship at its teat, are necessarily entwined with evil.
