For years people have asked me to put what I showed them into a book. This book is my contribution to music education. This concept opens up many possibilities of phrasing that develop and flow easily. This concept was developed while living, playing and tutoring in New York City. Bebop licks, lines and phrases are still used in most of today's different forms of music. In this book you'll find licks and phrases you can use for Soul, Funk, Hip Hop Jazz, Cool Jazz, Smooth Jazz and easy Bebop tunes. This book uses words to help give jazz notation easy to remember sound qualities. Just as the famous "Cry me a river" jazz lick is used to

teach a specific bebop lick, this book has many useful jazz licks. Basic Example, Notes = C D E G Numbers = 1 2 3 5 Easy to remember words, Words = "Play some be - bop" Numbers = 1 2 3 5 The above example uses the simple first 4 notes of the pentatonic scale to show the notes to words approach. This book uses many of the typical scales used in music. These scales become less simple and more musical in edited and inverted form. Most of the music we hear and play use the same scales and notes. It's usually the syncopation of the rhythm and arrangement of the notes that makes the different styles of music. This book has edited down the scales to the licks, lines and phrases used from BEBOP to FUNK, HIP HOP, NEW JACK SWING, COOL and SMOOTH JAZZ. Most of today's music still has a huge bebop influence, so first think simple bebop when reading the notes and words in this book. Once the sounds are in your ear, they'll come out naturally in other styles of music. Just follow the rhythm of the style of music you're playing. Listen to a drummer and follow his accents and you can usually play a variation of what you like to play. Written music is a good tool to show musicians the notes. Words are used to express the feeling of the music. Rhythm provides the groove and pulse of the music. Take time and try all of the examples in this book. Say the words and play the notes. Find the ones that flow freely from your instrument. This is not a technical struggle. Have fun. This book is my contribution to the "Wonderful world of jazz".

Jazz licks are among the most common patterns in improvisation-based music. These patterns are very helpful in understanding chord and note relationships, smooth transitions between chords, and are a great way to improve agility on your instrument. The purpose of this book is to develop a better understanding of how certain tensions are used on different kinds of dominant chords,

deduce situations in which certain tension combinations are 'available' over dominant chords, and learn how to apply these tension combinations to create lines and licks. This book will also help you develop your ear by applying these licks to all of the chord variations found throughout the book. Below are the fundamental methods for creating jazz licks; 1) Using diatonic notes in chord tonality 2) Incorporating non-diatonic notes into chord tonality 3) Chromatic approaches to chord tonality * Please note * If you need more information about any of the methods listed above, it is recommended that you take the studies from this book with you to a professional instructor to help connect these concepts. There are many different jazz cadences in jazz song forms (e.g., II-V7-I, I-VI-II-V7-I, I-IV-I, V7-I, and so on). In this book, you will study the most common jazz cadence: the II-V7-I chord structure. Each example has 3 variations in all 12 major keys. All examples are written in 4/4. Note that the patterns may/will contain chromatic note approaches, also known as jazz approaches in different note amounts. Once you've completed the studies in the main section, there is a bonus section containing examples with uncommon chord progressions in varying time signatures (e.g., 3/4, 7/4, 5/8, 6/8 etc.) for you to try. Here, you are encouraged to reinforce the principles learned in the main section by applying them in different harmonic and time environments. The articulations in the book are written for the flute however, you as the reader are encouraged to adjust these articulations for your convenience. Any readers playing a transposing instrument are encouraged to transpose these licks into your corresponding key. Thanks so much for investing in this book and I wish you well on your musical journey!
