The difference between seeing and looking is essential—much like the difference, in music, between hearing and listening. In *Creative Visualization*, master photographer, photo educator and photo instructor Rick Sammon presents his proven methodology for creative digital photography. His signature inspiring and motivating approach opens creative avenues for photographers in a variety of genres. With easy-to-follow examples, Sammon shows you how simple changes—with

visualization, composition, post-processing, and more—can mean the difference between a snapshot and a great shot. This book, illustrated with more than 300 of Rick's photographs, includes invaluable information about exposure, composition, subject choice, lighting, mood, and depth. In the Food for Thought section, Rick offers guidelines for setting goals, getting motivated, connecting with a subject, learning, painting with light, thinking like a painter and more. In *Develop Your Creative Vision*, Rick takes you on an exploration of composition, exposure, making images with impact, creating a mood, altering reality, and pursuing your passion. Corrective and creative image processing techniques, as well as HDR, EDR, panoramas and black-and-white imaging, are covered in the *Image Processing Specialties* section. Rick also shares a chapter on self-assignments - photo challenges - that you can use to expand your photographic horizons. *Canon Explorer of Light* and master photographer Rick Sammon shares the secrets behind learning to see photographically, to make the necessary changes that will have a noticeable impact on your photographs. Includes easy-to-follow instruction for post-processing techniques in Lightroom and Photoshop. Tips for making the best HDR and EDR images are also included, as well as illustrations of how plug-ins can help photographers awaken the artist within. Uses clear, visual examples of "photo failures" photographs side-by-side with successful ones, outlining the small, but important changes—to composition, framing, exposure, etc.—that can immediately make a significant difference

How many times a day do you do something only to end up regretting it a moment or two later? How often do you struggle with negativity in your mind? If you are like most people, the answers to these two questions are "many" and "very," respectively. To make a real, lasting change in your life, you need to change the patterns of your thoughts. That doesn't mean you reach inside your head and poke around. No, it's nothing that complex. Changing the patterns of your thoughts is as simple as telling

yourself the right things, affirming the positivity, reminding yourself of what you want, visualizing what you want to happen in your life. Your mind is a simple thing in one way at least: it believes the images that you show to it. It reacts to those images emotionally and then seeks to manifest those images throughout your life. By working with *The Affirmations & Creative Visualization Workbook*, you will set yourself up for lasting change by signaling to your mind that this is what you want it to do. This book guides you toward a daily routine of written positive affirmations and visualizations that will change your life. You'll keep a monthly log of accomplishments and review your entries periodically, getting a clear picture of just how far you have come in your journey. If you want to make a difference for yourself, only you can do it, but this workbook will help you along the way.

This book is about how to consciously use our natural ability to create visualization, as a way to create what we truly desire - love, fullness of life, pleasure, good relationships, rewarding work, self-expression, health, beauty, success, inner peace and harmony - all that our heart desires. Using creative visualization is the key to natural kindness and abundance of life. Imagination is the ability of the mind to create ideas or mental images. In creative visualization, we use imagination to create a distinct image of what we want. Then we focus on this idea or picture constantly, giving it positive energy until it becomes a reality; in other words, until we really achieve what we have visualized.
