Irregular Migration from the Former Soviet Union to the United States

Aspen Publishing

This book is the first in English to examine irregular migration from post-Soviet states, focusing in particular on migration to the United States. Due to globalization and the end of the Cold War, citizens of the former Soviet Union are on the move as never before. The political, economic, and social changes that followed the collapse of the Soviet Union resulted in widespread poverty

and unemployment and also created a large pool of potential migrants. Thousands of individuals from poor post-Soviet countries migrate to the West in search of better-paid work in an effort to provide for themselves and their families both through legal channels, and in their absence, illegally. In recent years immigration has become a topic of heated debate in many Western countries: the estimated number of undocumented immigrants in the United States has reached 11 million, precipitating a new legislative focus on reforming the immigration system, culminating in the highly controversial Border Protection, Antiterrorism, and Illegal Immigration Control Act passed by the House of Representatives in 2005 but eventually "killed" in the Senate.

This book examines all these issues, discussing the reasons for migration, the profile of the migrants, how the process of migration works and how the migrants obtain their U.S. visas, where they work once in the United States and their intentions with regards to their possible return home. This book explores the reality of post-Soviet migration where the mostly well-educated former professionals end up in low-wage unskilled jobs as domestic workers, child care givers, and construction workers, sometimes in exploitative labor situations. Overall, this book provides a detailed account of post-Soviet illegal migration to the United States, focusing in particular on Central Asian and Georgian migrants, and will be of interest to scholars of US politics as well

as Russia, Central Asia, and the Caucasus specialists.

President Obama's Trade Policy

Agenda Atlantic Publishing Company

The book is dedicated to the real life issues in the process of human migration. It discusses people movement that is tied to immigration and trade policy, where workers are treated as a commodity and is not just about selling a product or a service. It is about finding the future. It explores the future of the workers, the corporations and the society at large. The primary objective however is in finding the future. Not just a future in general, but specific futures for the individuals under the care of policies that govern people movement. The focus is the future in the sense that it makes a prediction about where the

future lies and then takes specific steps to make that future happen. That is where the subject of human migration comes in. The globalized political and economic system creates illegality by displacing people and then denying the workers rights and equality as they have to do what they have to do in order to survive. Globalization forces people into migration into countries where the ideas of divide and rule have been codified as a legal justification for the injustices. Inequality therefore is re-created and re-introduced by a global economic system. In the realm of social reality - this social inequality creates a caste system, where one class of workers is pitted against the other for personal gain. Where when one side of the coin gets tainted, the other side shines brightly, putting the society

at large in a conundrum. This book examines the function of social inequality in a modern world of high-tech guest workers and India's increasing dependence on exporting people to the labor pool in the global North. This book is titled Green Carrot - America's Work Visa Crisis in recognition of this reality. While Indian workers serving with employers in the United States has been used as a case study, it aims to drive home a point - Should the human migration exports rest only on the economic needs or should they be more focused on the human rights of its workers? Through the book an attempt is made to explore the politics of the debate over immigration and trade policies between India and the United States. The book examines closely the

cultural factors associated with the brokerage of intellectual capital and rights to intellectual property - two distinct yet, vulnerable areas in the political debate on immigration reform. The book examines body shopping as a business model that promotes the brokerage of intellectual capital and ends with the need for innovation, bringing focus on generating intellectual property. The book begins with examining what it means to be an indentured guest worker in labor bondage with a foreign employer - how immigration status is used to keep people vulnerable, to criminalize them and punish them when they try to improve their conditions. The narrative travels to examine how the visa status is used to control the movement of its

foreign employee and how the brokerage of intellectual capital allows subjugation for personal gain and its consequences on family life. The book traces back in history to explore America's dependence on foreign labor and examines how the present day system of body shopping in fact creates an economic system that benefit from the changes causing displacement, and also benefits from the labor displacement produces, especially those on the foreign work visas. It traces the development of the employer lobby set up to win expansion of the work visa programs. How the immigration policies have all but been about low salaries for foreign workers, excluding the local workers from competing for jobs thus dividing the work forces Finally the book

suggests some alternatives, always the hardest part in the immigration debate. It concentrates on some of the most progressive ideas, which have been put forward by immigration and human rights activists.

Brief to a New Book "Life Journey through Three Regimes, Two Countries, and Two Systems" This book is an autobiography. It vividly describes author's complex life journey. The author was born in a remote mountain village in

China. He went to a university in Beijing and worked in Chinese Academy of Science in Beijing for many years after graduation. The author came to study in the United States of America in 1981, obtained Ph. D in physics. He later taught at American universities. He went from the son of a farmer in a mountain village to a professor in the United States of America. His childhood was in the era of Kuomintang rule, of Communist Mao Zedong rule, and then of Deng Xiaoping's reform. The United States is his current country of citizenship and residence. He loves this country. But it somehow is still like a foreign country to him. The United States is also typical of the capitalist system. So the author experienced three regimes and two countries and two

systems. In his earlier life, it is the richest part of Chinese history and also the richest part of world history. He has been through all these. The course of his life is very complex, rich, and colorful. A lot of living things happen at his feet. These stories have love and hate, there is history, and there is something personal. Among them, there is success, there is failure, there is experience, there is a lesson, and its path is rondo and fold. Sometimes it is smooth sailing, sometimes the waves roll, sometimes it is breezy and sunny, and sometimes is stormy. In 1994, the author returned to his long-lost hometown. This was the second time he had come back after nearly twenty years. The last time was in 1975. The author saw his classmates and friends when he was a kid. Of

course, the American professor returning to his hometown still caused a lot of sensation in the village. Some people who used to bully his family had also come to visit. After a few decades, the hometown had been unrecognizable. After the reform and opening up, the people's lives had improved considerably. However, local governments were lacking environmental awareness and the concept of uniform logging. The construction of houses was extremely disorganized, turning the beautiful mountain village into a mess. The author was very sad seeing this. He is always dreaming. If he has hundreds of millions of dollars, he must first go to transform his hometown. He is going to dedicate this book to his hometown. If only his

book could be published, he is going to use all his contributions as a fund to raise money for rebuilding his hometown. This book is written in chronological order. It is divided into eleven chapters: Chapter 1, Childhood, from Birth to Graduation from Elementary School, 1941 to 1954; Chapter 2, Middle School and High School, 1954 to 1960; Chapter 3, At a Chinese University in Beijing, 1960 to 1965; Chapter 4, First Year in the Institute, 1965 to 1966; Chapter 5, The Terrible Cultural Revolution, 1966 to 1970; Chapter 6, The Exile Life in Yanjiang "57 Cadre School," 1970 to 1972; Chapter 7, Life in Beijing after Returning from the 57 Cadre School, 1972 to 1976; Chapter 8, Mao's Death, Deng Xiaoping's Return to Power,

Reform and Opening Up, and the Third Regime, 1976 to 1981; Chapter 9, Arrived in The United States of America—Some Reflections, 1981 to 1986; Chapter 10, Some Memories in That Small Town, 1981 to 1986; and Chapter 11, Working at Different Institutions, 1986 to 2017. Green Card Fraud - The Ugly Truth About Immigration Fraud In America American Work Permit

Mobile Selves illuminates how transnational communicative practices and forms of exchange produce new forms of kinship, social relations, and subjectivities for global labor migrants. It shows how migrants create and circulate

new portrayals of themselves, which work both to challenge the class and racial biases that they had faced in their home country and to shape how they construct and experience their mobility, and reenvision themselves and their communities in the process. In this engaging volume Ulla D. Berg examines the conditions under which racialized Peruvians of rural and working-class origins leave the central highlands of Peru to migrate to the United States, how they fare, and what constrains their movement and their attempts to maintain meaningful social relations across borders. By exploring the ways in which migration is mediated between the Peruvian Andes and the United States-by documents, money, and images and objects in circulation-this

book makes a major contribution to the documentation and theorization of the role of technology and, more broadly, of communicative practices in fostering new forms of migrant sociality and subjectivity. In its focus on the forms of person-hood and belonging that these mediations enable, the volume adds to key anthropological debates about affect, subjectivity, and sociality in today's mobile world. It also makes significant contributions to studies of inequality in Latin America, showcasing the intersection of transnational mobility with structures and processes of exclusion in both national and global contexts.
