2010 mussten kapitalmarktorientierte Unternehmen, die ihre Jahresabschlüsse nach IAS/IFRS offenlegen, die Erfolgsrechnung erstmals nach dem geänderten IAS 1 (rev. 2007) erstellen. Marco Schmid unterzieht einzelne Arten von Erfolgsdeterminanten der Gesamtergebnisrechnung unter konzeptionellen und bilanztheoretischen Gesichtspunkten einer kritischen Würdigung. Der Autor untersucht, welche Implikationen der Zweck und die Zielgröße auf die konzeptionelle Ausgestaltung der Rechnungslegungsinformationen haben. Vor einem bilanztheoretischen Hintergrund wird darüber hinaus analysiert, ob durch den geänderten IAS 1 wie die Hinwendung

zum fair value accounting tatsächlich die angestrebten Ziele erreicht werden.

Schlussendlich werden die Anforderungen formuliert, die

Rechnungslegungsinformationen, insbesondere die Erfolgsrechnung und die auszuweisenden

Accounting and Debt Markets: Four Pieces on the Role of Accounting Information in Debt Markets provides novel and up-to-date evidence on the role of accounting information in debt markets. Companies and organisations worldwide rely heavily on debt markets for short, medium and long-term financing, and debt markets and financial intermediaries have significant effects on the real economy. Accounting information has various functions in debt markets, including inter alia, informing pricing decisions and credit ratings, determining the allocation of creditor control rights and establishing bank capital adequacy requirements. The chapters in this book provide illustrative discussion, analysis and evidence on the importance of accounting information in credit markets. The first of the four pieces reflects on how a conservative

financial reporting system helps firms obtain debt funds and with better conditions, and why this is the case. The second examines the effects of accounting disclosure on credit ratings of private companies and shows that accounting information is useful for credit rating agencies. The two final pieces reflect on how banks should account for credit losses, and on how regulators are tackling this issue. The chapters in this book were originally published as a special issue of Accounting and Business Research.

All You Need to Know About the Music Business CRC Press

All You Need to Know About the Music Business by veteran music lawyer Don Passman—dubbed “the industry bible” by the Los Angeles Times—is now updated to address the biggest transformation of the music industry yet: streaming. For more than twenty-five years, All You Need to Know About the Music Business has been universally regarded as the definitive guide to the music industry. Now in its tenth edition, Donald Passman leads novices and experts alike through what has been the most

profound change in the music business since the days of wax cylinders and piano rolls. For the first time in history, music is no longer monetized by selling something—it’s monetized by how many times listeners stream a song. And that completely changes the ecosystem of the business, as Passman explains in detail. Since the advent of file-sharing technology in the late 1990s to the creation of the iPod, the music industry has been teetering on the brink of a major transformation—and with the newest switch to streaming music, this change has finally come to pass. Passman’s comprehensive guide offers timely, authoritative information from how to select and hire a winning team of advisors and structure their commissions and fees; navigate the ins and outs of record deals, songwriting, publishing, and copyrights; maximize concert, touring, and merchandising deals; and how the game is played in a streaming world. “If you want to be in music, you have to read this book,” says Adam Levine, lead singer and guitarist of Maroon 5. With its proven track record, this updated

edition of All You Need to Know About the Music Business is more essential than ever for musicians, songwriters, lawyers, agents, promoters, publishers, executives, and managers—anyone trying to navigate the rapid transformation of the industry.
