Since 1989 initial teacher training courses in England and Wales have included teacher preparation for taking a lead in a school subject area in their first appointment. There is no longer a place for a teacher newly qualified or not in primary schools whose sole responsibility is for his or her own class. A teacher must have specific specialist knowledge and expertise in particular subjects which must be shared with all staff.; This text contains the latest curriculum and assessment changes. It aims to help students and newly qualified teachers to understand the complexities of being a co-ordinator of the National Curriculum subjects in the early years of schooling and reports on best practice.

Listening Skills Nelson
Thornes

The national curriculum requirements for

technology cover design and technology capability (D&T) and information technology capability (IT). This report reveals that many teachers have found the D&T aspects of the order unhelpful and difficult to understand. In both D&T and IT the order is, in places, open to differences of interpretation. The report focuses on particular problems experienced in primary, middle and secondary schools as well as in special schools.

Developing Thinking Skills Through Mathematics
Routledge

Litigation and alleged cases of educational malpractice are on the rise. Headteachers and governors are more aware of legal requirements, but this new book addresses the needs of teachers. The book introduces a framework for safe practice, then the 'high risk' subjects of Science, ICT, Design and Technology, and PE and outdoor activities in separate chapters. The implications for classroom practice of recent legal developments are examined, and three more chapters look at what can be expected in

the process of litigation. Sound advice for those wishing to make schools safer, and useful guidance for those having to deal with the aftermath of a safety problem.

Everything you need to know to pass verbal reasoning tests Nelson
Thornes

For those teaching and coordinating Physical Education in the primary phase, this book will provide guidance on how to implement the National Curriculum at Key Stages 1 and 2, and offers advice to help curriculum coordinators address issues.

A Handbook For Students And Newly Qualified Teachers

David Fulton Pub
Help your child be the top of the class with the best-selling home-study series from Carol VordermanLet Carol Vorderman help your child succeed in Maths. Maths Made Easy is one of Carol Vorderman's series of workbooks packed with notes and tips to make learning about Maths easy and fun! Follow the exercises and activities with your child to strengthen their learning in school, then reward

them with gold stars for their efforts. Each title contains a progress chart so your child can keep track of all the exercises they have completed and parents' notes explain what children need to know at each stage and what's being covered in the curriculum so you can support your child. This book provides your child with lots of multiplication practise using the 2,3,4,5, and 10 times tables.

Developed in consultation with leading educational experts to support curriculum learning, *Maths Made Easy* (previous ISBN 9781405363464) is a great way to improve your child's maths skills - "the more you practise, the better you'll be!" Carol Vorderman

Developing A Leadership Role Within The Key Stage 2 Curriculum Nelson Thornes

This handbook has been specially written for primary teachers who have responsibility for coordinating English at Key Stage 1. It goes step by step through every stage of coordinating English in primary schools and provides valuable information for teachers who are new to being a subject leader, as well as those with more

experience. Full of accessible advice and suggestions for improving practice, the handbook shows how a coordinator can create policies and links that work, exploit resources to the best effect, and develop the knowledge and expertise that will raise school standards.

Teaching Reading at Key Stage 1 and Before
McGraw-Hill Education (UK)

The national curriculum provides an outline of core knowledge around which teachers can develop exciting and stimulating lessons to promote the development of pupils' knowledge, understanding and skills as part of the wider school curriculum. The Teachers' Standards underpin professional practice and all teachers need to work towards and within this framework. This two-in-one handbook presents the National Curriculum Programmes of Study for ALL curriculum subjects for Key Stages 1, 2 and 3 PLUS the complete Teachers' Standards, making it a handy reference copy whether you are in training or practice. Also included is an introduction by renowned education theorists Dylan Wiliam

focusing on the need for a broad and balanced curriculum in schools. A must-have resource for all teachers and trainee teachers!

Key Stage 1 DIANE

Publishing

Substantially revised to incorporate the contents of the 1995 Revised Order and its major implications for geography teaching. Includes two brand new chapters on the growing early years sector and OFSTED inspections. A whole range of different ways to organise the geography curriculum is discussed, with examples. The resources sections have been updated and expanded.

Maths and Art (Key Stage 1 And 2) SAGE

The requirements of the National Literacy Strategy are fully addressed in this book on teaching reading at Key Stage 1 and before. It features coverage of the structure and use of the English language and gives an explanation of classroom planning and management, based on an understanding of how children learn and progress. Included is also practical guidance on effective teaching practice, embedded in a modern theoretical framework.

A Handbook for Students and Newly Qualified Teachers Policy Press

Developing a Leadership Role Within the Key Stage 1 Curriculum

Learning Matters

The essential subject knowledge text for primary English. Secure subject knowledge and understanding is the foundation of confident, creative and effective teaching. This comprehensive text

includes interactive tasks, a self assessment section to allow trainees to better understand their level of knowledge and M level extension boxes to provide further challenge in all chapters. This 7th edition has been updated in line with the new primary English curriculum and offers comprehensive coverage and research summaries reflecting the latest thinking. This highly recommended text helps trainee primary teachers develop and consolidate their knowledge of English.

What Teachers Do

McGraw-Hill Education (UK)

Offers fun tasks which encourage children to listen carefully, while also giving them practice at mental arithmetic. This title contains instructions about how children's understanding and listening skills can be evaluated by observing how they complete the tasks.

Key stage 1 Learning Matters

Graded activities reinforcing calculation skills; reading is kept to a minimum.

Key Stages 1 & 2 Alfred Music Publishing

This book is a comprehensive do-it-

yourself handbook for in-service education in mathematics, directed at teachers of children between 5 and 13 years. It covers all the Programmes of Study and Attainment Targets of the National Curriculum in mathematics for Key Stages 1 to 3.

Throughout, the emphasis is on problem-solving to enable teachers to understand concepts and subsequently to help their pupils to do so, instead of relying on memorization alone. The many practical activities (most designed to be worked by teachers at their own level) are introduced by problems devised to create interest and stimulate thought. Teachers are encouraged to proceed by problem-solving, rather than by rote learning, and are also shown how to frame questions which will ensure progress and how to assess the understanding of concepts. By using this text, teachers will acquire the necessary background for understanding the mathematics which is new to most primary schools: algebra, geometry and data-handling (including probability).

A Handbook for Students and Newly Qualified Teachers

Routledge
Intended for Key Stage Level 1, this book features exercises that help build children's confidence in their mental maths skills. These exercises cover a range of key areas from the National Curriculum such as Number Sequences, Money, Measurement, Times Tables, and more.

Physical Education for Teachers and Coordinators at Key Stages 1 and 2 Routledge

'The book takes a deeper insight into the role of the practitioner and provides invaluable information' - Nursery Education
'I think the book would be good value for money for anyone working within a foundation stage team' - Foundation Stage File
'The Foundation Stage Teacher in Action is one of the definitive texts on the foundation stage, in which Margaret Edgington deals with the realities of practice based on theory and early years principles. It is immensely practical and easy to read, and while it deserves to be read from cover to cover, this New Edition is particularly accessible for those who want to dip in or who need to refer to a specific chapter' - Early Education
'If you are new to the Foundation Stage,

have been working in the Early Years for a few years, or for longer than you care to remember, if you have responsibility for employing staff for the Foundation Stage within your setting or if you work in a different key stage but have co-ordinator responsibility for the Foundation Stage, you should buy this book!' - National Campaign for Nursery Education Newsletter
'This is classic in the world of nursery education and this Third Edition, with its new title reflecting the changes in that world, is as exciting and challenging as earlier versions. Margaret Edgington's campaigning zeal is undiminished as she asserts the prime need for specialist teachers to work with young children in the Foundation Stage and backs this claim with authoritative research references. This is a strong, passionate authoritative text and I shall keep it close to hand for my own work' - Marian Whitehead, Nursery World
'This is the third generation of books dealing with the pedagogy of the early years from Margaret Edgington, the first two being her editions of The Nursery Teacher in Action,

originally published under the name Margaret Lally. The changes that have come about in early years education - notably the introduction of the Foundation Stage with its accompanying curriculum guidance and assessment requirements - meant that many early years books have needed updating. This Third Edition is more than an update; it represents some very hard thinking about what practitioners now need to know to be effective, and presents this by revisiting the original book's themes' - Escalate `Paul Chapman Publishing and Margaret Edgington have pulled off a real gem of a book, with updated sections (thank you for the Forest school stuff, for example!) and fresh insights. The hard work has really paid off - thanks so much' - Nick Swarbrick, Oxford Brookes University `This Third Edition brings a broader perspective to the early years world. Margaret's years of experience as a practitioner and consultant in the field are evident and she manages to blend good practice, policy and theoretical aspects, bringing an astute yet sensitive approach to the early years practitioners' varied

experiences and qualifications. The book reaches not only those who are starting on their careers as early years practitioners, but also those who have been there a long time and witnessed many, often bewildering changes, where their beliefs and practice have been challenged. The new edition should be essential reading not only for those working in the field, whatever stage in their careers, but also for anyone who seeks to understand small children and support them in the best way possible' - Angela D Nurse, Head of Department of Childhood Studies, Canterbury Christ Church University This is a fully revised and updated edition of the author's best selling book *The Nursery Teacher in Action*, Second Edition. This book now includes an extended section on leadership, on managing the foundation stage and involving the team in monitoring and evaluating foundation stage practice. Curriculum, planning and assessment now reflect the new statutory guidance on the Foundation Stage Curriculum and Profile. The author reviews the implementation of the

Foundation Stage and the Profile - positive developments and areas which are still proving challenging. New material is included on the broadening role of the foundation stage teacher in integrated, multi-disciplinary services and providing support in other settings. The book has been updated to include recent findings from Effective Pedagogy projects and other research on learning styles. The Foundation Stage Teacher is essential reading for all early years students and practitioners; early years course tutors, and teachers new to working with 3-5 year olds and also primary headteachers. Brilliant Verbal Reasoning Tests Listening Skills Key Stage 1 Helps to develop children's listening skills. This pack includes games which are designed for children at Key Stages 1 and helps teachers to establish effective listening skills with children of a range of abilities. It includes photocopiable worksheets which are accompanied by step-by-step instructions for the teacher to read out. Science Assessment Key Stage 1 Teacher's
