Information
professionals should be able to take a proactive role as a strategic partner in their organization's competitive intelligence. Their role needs to focus on the "outside-in" approach, based on their organization's strategic needs and objectives. Competitive Intelligence for Information Professionals explores the role of strategic

information and intelligence in organizations, and assesses the values and needs of intelligence in organizations. The book provides guidance on how to work strategically with competitive intelligence, methods for monitoring and analysis and a process-oriented approach. Chapters include discussions on how news monitoring and competitive intelligence interact and how this offers opportunities for cooperation between

different departments. Cases from the authors' own experiences when working with competitive intelligence in international corporations are also included. Competitive intelligence (CI) is a new area for Information professionals Offers perspectives on a new trend within the library and information sector Provides a comprehensive approach to CI

Knowledge Management in Organizations

Academic Conferences Limited

This book constitutes the refereed proceedings of the 10th International Conference on Blended Learning, ICBL 2017, held in Hong Kong,

China, in June 2017. The 42 papers presented were carefully reviewed and selected from 100 submissions. The papers are organized in topical sections named: Keynotes; Experiences in Blended Learning; Strategies in Blended Learning; Assessment for Blended Learning; Computer-Support Collaborative Learning; Improved Flexibility of Learning Processes; Open Educational Resources; Pedagogical and Psychological Issues.

An introduction to the field of knowledgemanemen

t.
ECKM2010 Routledge
In order to remain
competitive,
organizations must
adapt to transforming
environments at a
rapid pace. As such,
managers and
employees need to
constantly update their
knowledge and skills,
particularly as
businesses become
more digital and
global. Educational and
Social Dimensions of
Digital Transformation
in Organizations
provides emerging
research exploring the
theoretical and
practical aspects of
evolving organizations
and maintaining
sustainable business
strategies through
digital environments.
Featuring coverage on
a broad range of topics
such as consumer
relationships,

organizational
knowledge, and
enterprise social
networks, this
publication is ideally
designed for graduate-
level students,
managers, educational
administrators, IT
professionals,
researchers, and
system developers
seeking current
research on
organizational
preparedness and
technological
adaptation.
ECKM MIT Press
Modern marketing
practices have evolved
to become a dynamic
meeting point for
technology
practitioners and
business professionals.
Digital technologies
have added a new
paradigm to the way
businesses are
projected,
communicated, and

developed through their marketing activities, from message delivery to content production. Digital Marketing Strategies and Models for Competitive Business is a collection of innovative research that seeks to connect theory with application, identifying best practices over digital marketing to business purposes. While highlighting topics including consumer analysis, search engine marketing, and marketing communications, this book is ideally designed for marketers, managers, executives, advertisers, graphic designers, researchers, practitioners, entrepreneurs, policymakers, and educators.

Becoming a Knowledge-Sharing Organization

Academic Conferences and publishing limited This book explores, describes and explains the predictors essential for the acceptance of social media as a digital platform to share professional knowledge in the field of automotive repair in Germany. It reports a rigorous literature review covering key elements of social media, knowledge management and technology acceptance studies. The book assumes a pragmatist approach and applies mixed methods in an exploratory sequential design, combining qualitative and quantitative methods to ensure robust collection and analysis of the collected data.

Based on a survey on German automotive repair shops, the author provides a framework, for various stakeholders, to comprehend the motivations for knowledge sharing for automotive repair professionals in Germany. This book not only adds to the existing academic body of knowledge but also provides implications for industry and legislation on a European scale.

The proceedings of the 6th International Seminar & Conference on Learning Organization (ISCLLO) with the theme

“Enhancing Organization’s Competitiveness through Knowledge Sharing and Learning Culture in the 4.0 Era” provides research results from scientists, scholars and practitioners, exchanging information and discussing the latest issues related to topics such as Marketing, Human Resources, Industrial Behavior and Knowledge Management, Entrepreneurship and Strategic Management, IT and Operations Management Economics, Financial and Accounting. These papers will contribute to the enhancement of the organization's competitive advantage with technology serving as a supporting system for knowledge

sharing and learning culture. These proceedings will be of interest to scholars, practitioners, government and the industry employees, taking part in increasing Global Competitiveness in the coming years.

International Journal of Knowledge

Management

Routledge

The authors examine theories and models that help to understand individual and social aspects of processes of learning, development of expertise, knowledge creation, and innovation. These processes are studied both in the contexts of education and work, and are illuminated with numerous examples, and interview data.

Effective Knowledge

Management Systems in Modern Society MIT Press

Knowledge

Management in

Libraries: Concepts, Tools and Approaches brings to the forefront

the increasing

recognition of the value of knowledge

and information to

individuals,

organizations, and

communities, providing

an analysis of the

concepts of Knowledge

Management (KM) that

prevails among the

Library and Information

Science (LIS)

community. Thus, the

book explores

knowledge

management from the

perspective of LIS

professionals.

Furthermore, unlike

most books on the

topic, which address it

almost exclusively in

the context of a firm or

an organization to help gain a competitive advantage, this book looks at knowledge management in the context of not for profit organizations such as libraries. Describes the theory and approaches of knowledge management in the context of librarianship Seeks to identify and explain the principles that underlie the different processes of knowledge management Combines the theoretical and practical perspectives of the topic Provides a comprehensive and methodological approach to support librarians and information science professionals in the implementation of knowledge management in libraries and

information centers Proposes a model for libraries and information centers which may be used as a guide for implementation Incorporates illustrations where necessary to provide a clear understanding of the concepts
Proceedings of the International Seminar and Conference on Learning Organization (ISCLO 2019), Bandung, Indonesia, October 9-10, 2019 Academic Conferences Limited International Conference on Industrial Engineering and Engineering Management is sponsored by Chinese Industrial Engineering Institution, CMES, which is the unique national-level

academic society of Industrial Engineering. The conference is held annually as the major event in this area. Being the largest and the most authoritative international academic conference held in China, it supplies an academic platform for the experts and the entrepreneurs in International Industrial Engineering and Management area to exchange their research results. Many experts in various fields from China and foreign countries gather together in the conference to review, exchange, summarize and promote their achievements in Industrial Engineering and Engineering Management fields. Some experts pay special attention to the current situation of the

related techniques application in China as well as their future prospect, such as Industry 4.0, Green Product Design, Quality Control and Management, Supply Chain and logistics Management to cater for the purpose of low-carbon, energy-saving and emission-reduction and so on. They also come up with their assumption and outlook about the related techniques' development. The proceedings will offer theatrical methods and technique application cases for experts from college and university, research institution and enterprises who are engaged in theoretical research of Industrial Engineering and Engineering Management and its technique's application

in China. As all the papers are feathered by higher level of academic and application value, they also provide research data for foreign scholars who occupy themselves in investigating the enterprises and engineering management of Chinese style. Handbook of Personality at Work World Bank Publications Within the past 10 years, tremendous innovations have been brought forth in information diffusion and management. Such technologies as social media have transformed the way that information is disseminated and used, making it critical to understand its distribution through

these mediums. With the consistent creation and wide availability of information, it has become imperative to remain updated on the latest trends and applications in this field. Information Diffusion Management and Knowledge Sharing: Breakthroughs in Research and Practice examines the trends, models, challenges, issues, and strategies of information diffusion and management from a global context. Highlighting a range of topics such as influence maximization, information spread control, and social influence, this publication is an ideal reference source for managers, librarians, information systems specialists,

professionals, researchers, and administrators seeking current research on the theories and applications of global information management.

Professional and Educational

Perspectives Springer
From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say.

Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when

- coworkers push their work on you—then take credit for it
- you accidentally trash-talk someone in an email then hit "reply all"
- you're being micromanaged—or not being managed at all
- you catch a colleague in a lie
- your boss seems unhappy with your work
- your cubemate's loud speakerphone is making you homicidal
- you got drunk at the holiday party

Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be

professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “The author’s friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers’ lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience.”—Library Journal (starred review) “I am a huge fan of Alison Green’s Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little

problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together
How Firms Compete Through Strategic Alliances Academic Conferences Limited Knowledge in its pure state is tacit in nature—difficult to formalize and communicate—but can be converted into

codified form and shared through both social interactions and the use of IT-based applications and systems. Even though there seems to be considerable synergies between the resulting huge data and the convertible knowledge, there is still a debate on how the increasing amount of data captured by corporations could improve decision making and foster innovation through effective knowledge-sharing practices. *Big Data and Knowledge Sharing in Virtual Organizations* provides innovative insights into the influence of big data analytics and artificial intelligence and the tools, methods, and techniques for knowledge-sharing

processes in virtual organizations. The content within this publication examines cloud computing, machine learning, and knowledge sharing. It is designed for government officials and organizations, policymakers, academicians, researchers, technology developers, and students.

A Handbook for Scaling Up Solutions through Knowledge Capturing and Sharing IGI Global

"This book explores and defines the relationship between organizational culture and knowledge management, identifying strategies and best practices to aid practitioners in implementing successful knowledge management strategies, especially

during times of crisis like major digital transformations brought on by the Covid-19 pandemic"--
IFIP WG 8.6 International Conference on Transfer and Diffusion of IT, TDIT 2014, Aalborg, Denmark, June 2-4, 2014, Proceedings
Chandos Publishing
Personality has emerged as a key factor when trying to understand why people think, feel, and behave the way they do at work. Recent research has linked personality to important aspects of work such as job performance, employee attitudes, leadership, teamwork, stress, and turnover. This handbook brings together into a single volume the diverse areas of work psychology where

personality constructs have been applied and investigated, providing expert review and analysis based on the latest advances in the field.
Managing Subsidiary Dynamics Springer Science & Business Media
This volume offers a simple, systematic guide to creating a knowledge sharing practice in your organization. It shows how to build the enabling environment and develop the skills needed to capture and share knowledge gained from operational experiences to improve performance and scale-up successes. Its recommendations are grounded on the insights gained from the past seven years of collaboration between

the World Bank and its clients around the world—ministries and national agencies operating in various sectors—who are working to strengthen their operations through robust knowledge sharing. While informed by the academic literature on knowledge management and organizational learning, this handbook’s operational background and many real-world examples and tips provide a missing, practical foundation for public sector officials in developing countries and for development practitioners. However, though written with a public sector audience in mind, the overall concepts and approaches will also hold true for most

organizations in the private sector and the developed world. *ECKM Springer*

 A Handbook for Scaling Up Solutions through Knowledge Capturing and Sharing
 World Bank Publications
13th International Conference, KMO 2018, Žilina, Slovakia, August 6-10, 2018, Proceedings
 Elsevier
 These proceedings represent the work of researchers participating in the 11th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning - ICICKM 2014, which this year is being held at The University of Sydney Business School, The

University of Sydney, Australia. The Conference Co-Chairs are Dr John Dumay from Macquarie University, Sydney, Australia and Dr Gary Oliver from the University of Sydney, Australia. The conference will be opened with a keynote by Goran Roos, Advanced Manufacturing Council, Adelaide, Australia who will address the topic of "Intellectual capital in Australia: Economic development in a high cost economy." The second day will be opened with a from James Guthrie, University of Sydney, Australia on the topic of "Intellectual Capital and the Public Sector Research: Past, Present, and Future."

From Knowledge Objects to

Knowledge

Processes Ballantine Books

This book constitutes the refereed proceedings of the IFIP WG 8.6 International Working Conference "Creating Value for All Through IT" on Transfer and Diffusion of IT, TDIT 2014, held in Aalborg, Denmark, in June 2014. The 18 revised full papers presented together with 5 research-in-progress papers, 2 experience reports and a panel were carefully reviewed and selected from 37 submissions. The full papers are organized in the following topical sections: creating value; creating value through software development; and creating value through applications.

ICICKM2014 Oxford

University Press
 This book readdresses fundamental issues in knowledge management, leading to a new area of study: knowledge processes. McInerney's and Day's superb authors from various disciplines offer new and exciting views on knowledge acquisition, generation, sharing and management in a post-industrial environment. Their contributions discuss problems of knowledge acquisition, handling, and learning from a variety of perspectives.
