The definitive guide to the graphic presentation of information. Yet information graphics is rarely taught in schools or is the focus of on-the-job training. Now, for the first time, Dona M. Wong, a student of the information graphics pioneer Edward

Tufte, makes this material available for all of us. In this book, you will learn: to choose the best chart that fits your data; the most effective way to communicate with decision makers when you have five minutes of their time; how to chart currency fluctuations that affect global business; how to use color effectively; how to make a graphic "colorful" even if only black and white are available. The book is organized in a series of mini-workshops backed up with illustrated examples, so not only will you learn what works and what doesn't but also you can see the dos and don'ts for yourself. This is an invaluable reference work for students and professional in all fields.

How's Business? Simon and Schuster
Obwohl Effia und Esi Schwestern sind, lernen sie sich nie kennen, denn ihre Lebenswege verlaufen von Anfang an getrennt. Im Ghana des 18. Jahrhunderts heiratet Effia einen Engländer, der im Sklavenhandel zu Reichtum und Macht gelangt. Esi dagegen wird als Sklavin nach Amerika verkauft. Während Effias Nachkommen über Jahrhunderte Opfer oder Profiteure des Sklavenhandels werden, kämpfen Esis Kinder und Kindeskinde ums Überleben: auf den Plantagen der Südstaaten, während des Amerikanischen Bürgerkrieges, der Großen Migration, in den Kohleminen Alabamas und dann, im 20. Jahrhundert, in den Jazzclubs und Drogenhäusern Harlems. Hat die vorerst letzte Generation schließlich die Chance, einen Platz in der Gesellschaft zu finden, den sie Heimat nennen kann und wo man nicht als Menschen zweiter Klasse angesehen wird? Mit einer enormen erzählerischen Kraft zeichnet Yaa Gyasi die Wege der Frauen und ihrer Nachkommen über Generationen bis in

die Gegenwart hinein. »Heimkehren« ist ein bewegendes Stück Literatur von beeindruckender politischer Aktualität. New-York-Times-Bestseller

It could happen when you make a routine withdrawal from an ATM, respond to an e-mail asking for information about an online account, or leave a new box of checks unattended in your mailbox. Identity theft is one of the easiest crimes to commit in America—and one of the hardest to prosecute. As thieves become increasingly clever, Americans have more reasons than ever to fear this elusive, ubiquitous crime. Now there's a book to help you beat it. In two easy-to-understand sections, Terri Cullen, The Wall Street Journal's expert on identity theft, first walks you through the most common types of identity theft and how to arm yourself against them, and then leads victims step-by-step through the process of reclaiming a stolen identity. The average victim loses more than \$6,000 and spends approximately 600

hours negotiating the complex bureaucracies and paperwork—this book will help save time and effort by laying out the process. And by following the advice in the first half, you may never need the second! You'll learn: • how to avoid the most common scams, from “phishing” to “dumpster diving” • why children under eighteen are the fastest-growing target, and how you can protect your family • why your credit report is the single most important document for protecting your identity • how to use the sample letters, forms, and other useful tools inside for recovering from identity theft In today's marketplace, your two most valuable assets are your credit and your identity. No one should be without this vital guide to protecting them.

The Wall Street Journal Premium Daily Crosswords Three Rivers Press (CA)

A wonderfully irreverent and endlessly entertaining guide—with more than 80,000 copies sold worldwide in multiple languages—about the indicators most investors aren't following, but should be! In order to make the best possible investment decisions, savvy investors know that they must pay close attention to economic indicators. But while most are looking at conventional barometers like unemployment rates and housing statistics, the smartest investors are following the curious and often ignored indicators that offer a true sense of where the economy is and where it's heading. These factors have been proven to provide the vital information needed to beat the market. Dow Jones columnist Simon Constable and respected financial historian Robert E. Wright offer valuable tips and insight to help investors forecast and exploit sea changes in the global macroeconomic climate. Unlike other investment handbooks, Constable and Wright's

guide explores the little-known economic indicators that the smartest investors watch closely in order to beat the stock market—from “Big Macs” to “zombie banks.” This valuable and informative read entertains and enlightens while offering essential advice on navigating the global economic climate.

The WSJ Guide to the 50 Economic Indicators That Really Matter Currency Need to spice up your solving? Try the pure puzzling pleasure of cryptic crosswords, where each clue offers double the dose of wordplay. To find the answer, it's necessary to do additional deciphering--recognizing a homophone or working out a charade. And these cryptics have something more: along with the extra wordplay, every puzzle includes a theme that can bend the rules. Special instructions help solvers find their way through the trickery.

Most people return to business school for an M.B.A. degree to increase their marketability in a highly competitive business environment. How well they achieve their goal depends in large measure on how the business world views the schools they attended. For the first time ever, The Wall Street Journal, the world's most respected business publication, along with Harris Interactive, the organization that created the well-known Harris poll, tells you what corporate recruiters from a wide variety of fields think about the M.B.A. programs they know so intimately. Nearly two years in the making, this is the only major survey that focuses exclusively on the opinions of recruiters -- the buyers of M.B.A. talent. Twenty-seven variables for each school were evaluated, variables that drive a recruiter to hire a particular graduate, such as their company's long-

term success with a school's M.B.A. graduates and the students' communication and interpersonal skills, analytical and problem-solving abilities and leadership potential. This groundbreaking volume used the evaluations of more than sixteen hundred recruiters, appraising twenty-seven variables for more than two hundred schools in order to arrive at statistically valid ratings for fifty U.S. and international M.B.A. programs, as well as recruiters' observations on thirty-five more business schools and brief profiles on an additional seventy schools. In addition to the overall rankings, The Wall Street Journal Guide to Business Schools ranks the best public and private schools, the top schools by region, the top large and small schools, the top schools on top attributes, schools that are "hidden gems" and business schools by industry. Also evaluated are schools' academic excellence, the collegiality (and competitiveness) of each school and the most important school attributes. The corporate recruiters even list their personal favorites...and go on the record with extremely candid observations about both the business schools and their graduates. The first guide to business schools published exclusively as an e-book, The Wall Street Journal Guide to Business Schools will prove to be an invaluable resource for prospective students, school faculty and administrators -- and recruiters themselves.

Bringing home your bouncing baby boy or girl should be an exciting time of celebration--not cause for worry about how you're going to pay for feeding, clothing, and caring for your new bundle of expenses.
