Reclaiming Our Passion, Purpose, and Sanity Orion Indonesian Islam is often portrayed as being intrinsically moderate by virtue of the role that mystical Sufism played in shaping its traditions. According to Western observers--from Dutch colonial administrators and orientalist scholars to modern anthropologists such as the late Clifford Geertz--Indonesia's peaceful interpretation of Islam has been

perpetually under threat from outside by more violent, intolerant Islamic traditions that were originally imposed by conquering Arab armies. The Makings of Indonesian Islam challenges this widely accepted narrative, offering a more balanced assessment of the intellectual and cultural history of the most populous Muslim nation on Earth. Michael Laffan traces how the popular image of Indonesian Islam

was shaped by encounters between colonial Dutch scholars and reformist Islamic thinkers. He shows how Dutch religious preoccupations sometimes echoed Muslim concerns about the relationship between faith and the state, and how Dutch-Islamic discourse throughout the long centuries of European colonialism helped give rise to Indonesia's distinctive national and religious culture. The Makings of Indonesian Islam presents Islamic

and colonial history as an integrated whole, revealing the ways our understanding of Indonesian Islam, both past and present, came to be.

The 10 Habits of Happy Mothers Andrews McMeel Publishing

When *Men in Groups* was first published in 1969, the New York Times daily critic titled his review "The Disturbing Rediscovery of the Obvious." What was so obvious was male bonding, a phrase that entered the language. The

links between males in groups Tiger describes extend through many other primate species, through our evolution as hunters/gatherers, and cross-culturally. Male bonding characterizes human groups as varied as the Vatican Council, the New York Yankees, the Elks and Masons the secret societies of Sierra Leone and Kenya. The power of Tiger's book is its identification of the powerful links between men and the impact of females and families on essentially male groups.

While the world has changed much, the argument of the book and its new introduction by the author suggest that a species-specific pattern of female bonding continues to be part of the human default system. Perhaps one day concrete evidence of its location will emerge from the startling work on the human genome, just as the elaborate and consequential sex differences to which *Men in Groups* drew such pioneering attention have already become part of

the common wisdom. Meanwhile, *Men in Groups* remains a measured and responsible but intrepid inspection of a major aspect of human social organization and personal behavior. The book was controversial when it first appeared, and often foolishly and unduly scorned. But it has remained a fundamental contribution to the emerging synthesis between the social and natural sciences. Being Nikki Bloomsbury Publishing USA
"So funny, smart,

sophisticated, and captivating, you just want to spend your whole life with it."--Kevin Kwan, author of *Crazy Rich Asians* In this modern reimagining of Jane Austen's *Emma*, Delhi's polite society is often anything but polite. Beautiful, clever, and more than a little bored, Ania Khurana has Delhi wrapped around her finger. Having successfully found love for her spinster aunt, she sets her sights on Dimple: her newest, sweetest, and most helpless friend. But

when her aunt's handsome nephew arrives from America, the social tides in Delhi begin to shift. Surrounded by old money and new; relentless currents of gossip; and an unforgettable cast of socialites, journalists, gurus, and heirs, Ania discovers that her good intentions are no match for the whims and intrigues of Delhi's high society--or for her own complicated feelings toward her cherished childhood friend, Dev. Pairing razor-sharp

observation and social comedy with moments of true tenderness, this delicious whirl through the mansions of India's dazzling elite celebrates that there's no one route to perfect happiness. *Sad Girls* Routledge Called "a warm and well-written case for love affairs in later life" (Daily Telegraph), Thursdays in the Park was a runaway best-seller in the united Kingdom. Boyd's debut novel is a touching, romantic tale of new attraction and old loyalties. Jeanie is on the

brink of turning sixty, and the man she's been married to for more than half of her life has suddenly abandoned the marital bed. When Jeanie's husband George retreats from his conjugal duties, she is deeply hurt and very confused: Has she done something wrong? Is he in love with someone else? Her pained bewilderment turns to anger as he remains unable, or unwilling, to provide answers. The bright spot of Jeanie's week is Thursday, the day she takes her

granddaughter to the park. There, one day, she meets Ray--age-appropriate, kind-hearted, easygoing, and downright sexy. In short, he is everything that George is not. As her relationship with Ray begins to blossom and she begins to think that her life might hold in store a bold second act, she begins to wonder if she has the courage to take a step off the precipice of routine and duty and into the swirling winds of romance. From the Trade Paperback edition.

What is the use of social theory to historians, and of history to social

theorists? In clear and energetic prose, a pre-eminent cultural historian here offers a far-reaching response to these deceptively simple questions. In this classic text, now revised and updated in its second edition, Peter Burke reviews afresh the relationship between the fields of history and the social sciences and their tentative convergence in recent decades. Burke first examines what uses historians have made - or might make - of the

models, methods, and concepts of the social sciences, and then analyzes some of the intellectual conflicts, such as the opposition between structure and human agency, which are at the heart of the tension between history and social theory. Throughout, he draws from a broad range of cultures and periods to illustrate how history, in turn, has been used to create and validate social theories. This new edition brings the book up to date with the addition of

examples and discussions of new topics such as social capital, globalization and post-colonialism. The second edition of *History and Social Theory* will continue to stimulate both students and scholars across a range of disciplines with its challenging assessment of the roles of history and social science today. *Cherry Crush* Iman Publication Sdn Bhd
In the village of Waterslain in Norfolk, in the 1950s, a fragment from a carved angel's wing is discovered. Maybe

the wooden angels that once supported the church roof were not, after all, destroyed centuries ago, but spirited away to safety. Two children decide to find them. There are few clues, but a strange inscription on the church wall leads them into terrifying places - up to the top of the church tower, down a tunnel where they are nearly drowned. Annie dreams of the man who was sent in by Cromwell to smash up the church, and of angels flying and falling. For

Sandy, whose father, an American airman, was recently killed, the angels bring comfort. The whereabouts of the angels become clear to them - but then they discover that other people are hunting for them, and are determined to stop the children at all costs. The friendship between the boy adjusting to a new life in his mother's village, and the girl whose family have always lived on their remote farm, the haunting atmosphere of the Norfolk saltmarshes, and the strong sense of the past

still present, give richness to a tense and fast-paced story of detection for younger readers.

How did cranes come to symbolize matrimonial happiness? Why were magpies the only creatures that would not go inside Noah's Ark? Birds and bird imagery are integral parts of our language and culture. With her remarkable ability to dig up curious and captivating facts, Diana Wells hatches a treat for active birders

and armchair enthusiasts alike. Meet the intrepid adventurers and naturalists who risked their lives to describe and name new birds. Learn the mythical stories of the gods and goddess associated with bird names. Explore the avian emblems used by our greatest writers--from Coleridge's albatross in "The Ancient Mariner" to Poe's raven. A sampling of the bird lore you'll find inside: Benjamin Franklin didn't want the bald eagle on our National Seal because of its "bad moral

character," (it steals from other birds); he lobbied for the turkey instead. Chaffinches, whose Latin name means "unmarried," are called "bachelor birds" because they congregate in flocks of one gender. Since mockingbirds mimic speech, some Native American tribes fed mockingbird hearts to their children, believing it helped them learn language. A group of starlings is called a murmuration because they chatter so when they roost in the thousands. Organized alphabetically,

each of these bird tales is accompanied by a two-color line drawing. Dip into 100 Birds and you'll never look at a sparrow, an ostrich, or a wren in quite the same way.

The Bugis, who number about three million, live for the most part in the Indonesian province of South Sulawesi: they are among the most fascinating peoples of maritime Southeast Asia, and the least known. Their

image in legend and modern fiction is of bold navigators, fierce pirates and cruel slave traders, but most are in fact farmers, planters and fishermen. Although they are an Islamic people, they maintain such pre-Islamic relics as transvestite pagan priests and shamans. Their colorful nobility claims descent from the ancient gods, yet owes its power to social consensus. This book is the first to describe the history of the Bugis. It ranges from their origins 40,000 years ago

to the present and provides a complete picture of contemporary Bugis society. It is based on the author's extensive field research over the last 30 years, on oral tradition, written epics and chronicles, on travellers' tales from the sixteenth to the nineteenth centuries, and on the latest research by Western and Asian scholars in the fields of archaeology, history, linguistics and anthropology. The author reveals the brilliance of Bugis civilization in all its

exotic and extraordinary manifestations, and its survival through Dutch colonization, Japanese invasion and the incursions of modernity. This is a work of outstanding scholarship, interest and originality. *A Comprehensive Study of Zakah Regulations and Philosophy in the Light of the Qur'an and Sunna* Point

This book is the most comprehensive empirical study to date of the social and technical aspects of milling during the ancient and medieval

periods. Drawing on the latest archaeological evidence and historical studies, the book examines the chronological development and technical details of handmills, beast mills, watermills and windmills from the first millennium BCE to c. 1500. It discusses the many and varied uses to which mills were turned in the civilisations of Rome, China, Islam and Europe, and the many types of mill that existed. The book also includes comparative

regional studies of the social and economic significance of milling, and tackles several important historiographical issues, such as whether technological stagnation was a characteristic of late Antiquity, whether there was an industrial revolution" in the European Middle Ages based on waterpower, and how contemporary studies in the social shaping of technology can shed light on the study of pre-modern technology."
