Pershing vs Tiger Morgan James Publishing

Peaceful parenting is hard enough for the average parent. Imagine trying to do it when you have the instincts of a tiger mother. In *Untigering*, Iris Chen shares her journey of leaving behind authoritarian tiger parenting to embrace a respectful, relational way of raising children. As a Chinese American mom, she draws from her experiences of living in both North America and Asia and offers insights and practices to: ?Heal from your childhood wounds?Change your beliefs about yourself and your children?Parent through connection instead of control?Redefine your understanding of success?Navigate and challenge cultural norms Iris calls for a radical shift from parenting that is rooted in power to one that is grounded in partnership, but she does so with humor, humility, and empathy. This book is her invitation to you to begin your own journey of transformation as a parent.

Proceedings - United States Naval Institute Tiger Books
 The U.S. Navy is ready to execute the Nation's tasks at sea, from prompt and sustained combat operations to every-day forward-presence, diplomacy and relief efforts. We operate worldwide, in space, cyberspace, and throughout the maritime domain. The United States is and will remain a maritime nation, and our security and prosperity are inextricably linked to our ability to operate naval forces on, under and above the seas and oceans of the world. To that end, the Navy executes programs that enable our Sailors, Marines, civilians, and forces to meet existing and emerging challenges at sea with confidence. Six priorities guide today's planning, programming, and budgeting decisions: (1) maintain a credible, modern, and survivable sea based strategic deterrent; (2) sustain forward presence, distributed globally in places that matter; (3) develop the capability and capacity to win decisively; (4) focus on critical afloat and ashore readiness to ensure the Navy is adequately funded and ready; (5) enhance the Navy's asymmetric capabilities in the physical domains as well as in cyberspace and the electromagnetic spectrum; and (6) sustain a relevant industrial base, particularly in shipbuilding.

 Will you be LinkedIn or linked out? Learn to dominate in an age of digital noise and competition with *Tactical LinkedIn Secrets*. In his debut book, *Tactical LinkedIn Secrets*, David Cobb teaches business professionals to stand out and gain competitive dominance. The advice and knowledge provided through read-worthy mixed metaphors, humor, and rants prepares readers with, what Cobb coins as, arrows for digital quiver. *Tactical LinkedIn Secrets* educates, creates awareness, advances businesses, assists career seekers, and simply makes an impact on the industry—affecting empathic voices, futures, and financials. Cobb illustrates strategic tactics to maximize the use of LinkedIn for any motivated individual. This text is a digitally immersive experience for business professionals, and tantamount to developing one's Digital Quiver—an ever-evolving skillset.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning,

and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Asia-Pacific Defence Reporter Bloomsbury Publishing
 This compilation probably looks like one of the craziest things a human being could spend his or her time on. Yet nobody would wonder at someone taking a short walk every day - after twenty five years that person would have covered a surprisingly long distance. This is exactly the story behind this list, which appeared first as a few pages within the directory *StarGuides* (or whatever name it had at that time) and as a distinct sister publication since 1990. The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations, acronyms, contractions and symbols which they might encounter in all aspects of the vast range of their professional activities, including traveling. Perhaps it is a bit paradoxical, but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline, they will probably encounter more difficulties when dealing with adjacent fields. It is for this purpose that this dictionary might be most often used. Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions.

An Illustrated History of Their Impact Independently Published
 Linked Open Data (LOD) is a pragmatic approach for realizing the Semantic Web vision of making the Web a global, distributed, semantics-based information system. This book presents an overview on the results of the research project "LOD2 -- Creating Knowledge out of Interlinked Data". LOD2 is a large-scale integrating project co-funded by the European Commission within the FP7 Information and Communication Technologies Work Program. Commencing in September 2010, this 4-year project comprised leading Linked Open Data research groups, companies, and service providers from across 11 European countries and South Korea. The aim of this project was to advance the state-of-the-art in research and development in four key areas relevant for Linked Data, namely 1. RDF data management; 2. the extraction, creation, and enrichment of structured RDF data; 3. the interlinking and fusion of Linked Data from different sources and 4. the authoring, exploration and visualization of Linked Data.

SP's Military Yearbook Government Printing Office
 During the final battles on World War II's Western Front, the

legendary German Tiger I heavy tank clashed with the brand-new M26 Pershing fielded by the United States. The Tiger I had earned a formidable reputation by the end of 1944, although its non-sloped armour and poor mobility meant it was being superseded by the Tiger II or 'King Tiger'. While the Tiger I had been in the front lines since 1942, the US Pershing first entered combat in late February 1945, and more than 20 Pershings would see action before war's end. This book examines the dramatic Tiger/Pershing duel at Elsdorf in Germany, and also assesses the clashes between German armour and the sole 'Super Pershing' deployed to Europe. Featuring full-colour artwork, carefully chosen photographs and specially commissioned maps, this is the story of the first US heavy tanks in combat with the fearsome Tiger I during the last months of World War II in Europe.

Helicopters: An Illustrated History of Their Impact covers the development of helicopters from the first successful machines in the early 1900s to their current status as a key component of combat planning around the world and as one of the military's most versatile and effective tools. Helicopters is a story of ongoing innovation in the face of stubborn resistance. Time and again, helicopter designers developed more capable rotorcraft and then had to lobby skeptical military planners to get them deployed. With expert analysis of all significant models, colorful portrayals of key figures in the evolution of helicopters, and vivid images of rotorcraft on the drawing board and in action, this revealing volume shows how an often denigrated machine became an essential military asset around the world, as well as an important tool in a number of areas, from police work to medical evacuation to farming.

"[Seize the high ground is a] narrative history of the Army's aerospace experience from the 1950s to the present. The focus is on ballistic missile defense, from the early NIKE-HERCULES missile program through the SAFEGUARD acquisition site allowed by the 1972 ABM Treaty to the more advanced 'Star Wars' concepts studies toward the end of the century. [What is] covered is not only the technological response to the threat but the organizational and tactical development of the commands and units responsible for the defense mission"--CMH website.
