Matthew Ferry presents his Rapid Enlightenment Process inside his new book Quiet Mind Epic Life."Enlightenment is not a place. It's not a destination. It's a state. It's a point of view.

Enlightenment is a contextual framework that makes living an epic life possible. Let me give you my definition of Enlightenment so you understand our endgame together...Enlightenment is the recognition that the source of life within you... is also the source of life in everyone else... and everything else. We are all one thing expressing itself with infinite variety.When you truly see that the source of life within you is also the source of life in everyone else, and everything else, you enter into an enlightened state. When you see that we are all one thing expressing itself with an infinite variety, and the only thing that makes us different, is our perspective about it.... boom!

Everything changes and fear disappears.From this new perspective, you rise above the limitations of cultural conditioning. You don't have to follow the rules anymore. Everything is up for evaluation. You see dogma for what it is, just stories that were made up by well-meaning people. But stories none the less. Not valid. Not true. Not real. Finally, you feel free. The invisible barriers disappear.This is what I want for you. This is the promise of Quiet Mind Epic Life." - Matthew Ferry [Land Rover Series 3 Workshop Manual](#) Motorbooks

Published to coincide with the launch of NASA's Perseverance rover mission this summer, the definitive account of our quest to find life on the Red Planet. From The War of the Worlds to The Martian and to the amazing photographs sent back by the robotic rovers Curiosity and Opportunity, Mars has excited our imaginations as the most likely other habitat for life in the solar system. Now the Red Planet is coming under scrutiny as never before. As new missions are scheduled to launch this year from the United States and China, and from Kazakhstan in 2022, this book recounts in full the greatest scientific detective story ever. For the first time in forty years, the missions heading to Mars will look for signs of ancient life on the world next door. It is the

latest chapter in an age-old quest that encompasses myth, false starts, red herrings, and bizarre coincidences—as well as triumphs and heartbreaking failures. This book, by two journalists with deep experience covering space exploration, is the definitive story of how life's discovery has eluded us to date, and how it will be found somewhere and sometime this century. The Search for Life on Mars is based on more than a hundred interviews with experts at NASA's Jet Propulsion Laboratory and elsewhere, who share their insights and stories. While it looks back to the early Mars missions such as Viking 1 and 2, the book's focus is on the experiments and revelations from the most recent ones—including Curiosity, which continues to explore potentially habitable sites where water was once present, and the Mars Insight lander, which has recorded more than 450 marsquakes since its deployment in late 2018—as well as on the Perseverance and ExoMars rover missions ahead. And the book looks forward to the newest, most exciting frontier of all: the day, not too far away, when humans will land, make the Red Planet their home, and look for life directly.

This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression.

Written and curated by recognized historians of space exploration, *NASA Space Shuttle: 40th Anniversary* is the authoritative photo history of the iconic space program. Officially known as the Space Transportation System (STS), the Space Shuttle program operated from 1981 to 2011. During that time, five Shuttle systems took part in 135 missions under the operation of NASA. This approach—namely reusable spacecraft—revolutionized space exploration. *NASA Space Shuttle: 40th Anniversary* traces the STS's 30-year operational history. Essays by former NASA chief historian Roger Launius are accompanied by a collection of incredible Shuttle photography and imagery mined from the depths of NASA's archives by aerospace historian Piers Bizony—all of it presented in large-format color. Readers will witness the pre-1981 evolution, the missions, astronauts, ground personnel and infrastructure, and amazing accomplishments of the Shuttle program and its spacecraft: Columbia, Challenger, Discovery, Atlantis, and Endeavour. From the launch site at Cape Kennedy, Florida, to mission control in Houston, Texas, to the landing site at Edwards Air Force Base, all aspects of Shuttle operation are covered, including key roles in efforts such as the Hubble Telescope and International Space Station, as well as the tragedies of Challenger and Columbia disasters. Every carefully chosen image in *NASA Space Shuttle: 40th Anniversary* tells an aspect of the Shuttle story. The resulting book is not only a unique view of a key chapter of NASA history—it's a compelling collection of stunning NASA photography and illustrations.

Revealed to the world in 1948, the Land-Rover not only revived the Rover Company's fortunes in an austerity-riddled post-war period, but galvanized its future, thanks to the model's almost immediate success. With the manufacture of an initial 48 'pre-production' examples coming to a close, the first official production models were assembled - starting with chassis 860001. As original factory records prove, this pivotal vehicle was destined for His Royal Highness King George VI, but the decision was made to postpone the presentation and instead, 'number one' was retained by the factory until 1950, when it was registered JUE 477 before leaving Rover Company ownership. After decades left out in the cold and exposed to the elements, 860001 had certainly seen better days, but thanks to the determination of Sir Jim Ratcliffe, founder and Chairman of INEOS, the future of JUE 477 was secured in 2017. Over the next two years, a dedicated team of experts, led by chief restorer, Julian Shoolheifer set about restoring the vehicle while retaining as much of its original DNA as was physically, and safely, possible and making sure that this remarkable vehicle's history and past life was still worn with pride.

Jane Eyre Simon and Schuster

Drawing on 15 months of ethnographic research in one of the most under-developed regions in the Caribbean island of Trinidad, this book describes the uses and consequences of social media for its residents. Jolynna Sinanan argues that this semi-urban town is a place in-between: somewhere city dwellers look down on and villagers look up to. The complex identity of the town is expressed through uses of social media, with significant results for understanding social media more generally. Not elevating oneself above others is one of the core values of the town, and social media becomes a tool for social visibility; that is, the process of how social norms come to be and how they are negotiated. Carnival logic and high-impact visuality is pervasive in uses of social media, even if Carnival is not embraced by all Trinidadians in the town and results in presenting oneself and association with different groups in varying ways. The study also has surprising results in how residents are explicitly non-activist and align themselves with everyday values of maintaining good relationships in a small town, rather than espousing more worldly or cosmopolitan values.

Bringing Up Bébé meets Last Child in the Woods in this “fascinating exploration of the importance of the outdoors to childhood development” (Kirkus Reviews) from a Swedish-American mother who sets out to discover if the nature-centric parenting philosophy of her native Scandinavia holds the key to healthier, happier lives for her American children. Could the Scandinavian philosophy of “There’s no such thing as bad weather, only bad clothes” hold the key to happier, healthier lives for American children? When Swedish-born Linda Åkeson McGurk moved to Indiana, she quickly

learned that the nature-centric parenting philosophies of her native Scandinavia were not the norm. In Sweden, children play outdoors year-round, regardless of the weather, and letting babies nap outside in freezing temperatures is common and recommended by physicians. Preschoolers spend their days climbing trees, catching frogs, and learning to compost, and environmental education is a key part of the public-school curriculum. In the US, McGurk found the playgrounds deserted, and preschoolers were getting drilled on academics with little time for free play in nature. And when a swimming outing at a nearby creek ended with a fine from a park officer, McGurk realized that the parenting philosophies of her native country and her adopted homeland were worlds apart. Struggling to decide what was best for her family, McGurk embarked on a six-month journey to Sweden with her two daughters to see how their lives would change in a place where spending time in nature is considered essential to a good childhood. Insightful and lively, *There’s No Such Thing as Bad Weather* is a fascinating personal narrative that illustrates how Scandinavian culture could hold the key to raising healthy, resilient, and confident children in America.

From the #1 internationally bestselling author of *Five Days* and *The Blue Hour*, “a racy page-turner” (London Daily Express) about a Hollywood screenwriter whose overnight success brings about his biggest downfall. I always wanted to be rich. I know that probably sounds crass, but it’s the truth. A true confession. Like all would-be Hollywood screenwriters, David Armitage wants to be rich and famous. But for the past eleven years, he’s tasted nothing but failure. Then, out of nowhere, big-time luck comes his way when one of his scripts is bought for television. Before you can say “overnight success,” he’s the new toast of Hollywood as the creator of a hit series. Suddenly a major player, he finds that he’s reinventing himself at a great speed, especially when it comes to walking out on his wife and daughter for a young producer who worships only at the altar of ambition. But David’s upward mobility takes a decidedly strange turn when a billionaire film buff named Philip Fleck barges into his life, proposing a very curious collaboration. David takes the bait and suddenly finds himself inadvertently entering into a Faustian pact and an express ride to the lower depths of the Hollywood jungle.

Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were ‘just too many rivers and too few roads’. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, ‘First Overland’, is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.
