The fabulous success of Ford's Mustang in America inspired Ford's British and German branches to do likewise. The sporty coupe they created, the Ford Capri, was launched in 1969 as the first joint production of the brand-new Ford of Europe. Billed as "The car you always promised yourself", the Capri was a signal success with almost 1.9 million made when production ended in 1987. Its rakish lines, keen pricing and broad power offerings gave the Capri wide appeal not only in Europe but also in America, which imported the Mark I and II versions from 1970 to 1977 for sale through Lincoln-Mercury dealers. The Mark III for Europe followed in 1978. No paper tigers, these classy coupes were formidable rally and racing cars as this book's illustrations reveal. A Capri insider, former Ford of Europe executive Karl Ludvigsen introduces the Capri saga and illuminates the many rare images from his world-famous Ludvigsen Library. A feast for fans of the Blue Oval, this book's pages bring to life the exciting story of one of the best-loved Fords of all time.

PERFECT FOR A WRITTEN FOLLOW-UP OF YOUR CAR'S MAINTENANCE. The maintenance log is the health log of your vehicle. It lists all the revisions you have made and tells you the dates of the next maintenance. AN EXCELLENT ALLY IN CASE OF PURCHASE OR SALE. An up-to-date maintenance log is a big advantage. In the event of resale, it allows the owner to prove his good faith and indicate that his used car has been regularly maintained and overhauled. But it will also be a means of verification for a buyer before deciding. Log all your Vehicle Procedures on detailed forms like: Oil Changed Rotate / Balance Tires Tire Replaced Wheel Alignment Air Filter Fuel Filter Spark Plugs Brakes Serviced Transmission Wiper Blades Batteries Radiator Belts / Hoses Composed of 100 pages, it will accompany the vehicle throughout its life.

The Zero Carbon Car examines the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint, and the adaptation of the automotive industry to changing technology in a world where environmental issues are becoming ever more prevalent. The book's in-depth research into green car technology shows that manufacturers make concerted efforts, but sometimes also defeat the gains of their innovation. Topics covered include: What is meant by the terms 'global warming' and 'green', and how these can be defined; An account of the long history of green automotive technology; Alternative fuels, including diesel and hydrogen; Developments in environmentally friendly engine technology; Electric cars; Environmental issues in material usage and car body manufacture. A wide-ranging survey of the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint. Written in an easy-to-understand manner, the book enables the reader to fully understand what is meant by 'global warming'. Examines alternative fuels, material usage and the motive power options available to us. Superbly illustrated with 350 colour photographs. Brian Long is a professional writer and motoring historian with over sixty books to his credit.
