Manual for the Medical Department iUniverse

Here is a book written without the slightest nod to political correctness. It assumes that the reader and writer are equals in every way: intelligence, experience and the ability to exert common sense. The author is not trying to sell anything or prove anything; it is presented as friends in earnest discussion with a few comic breaks thrown in. It is a collection of thoughts from a man who has done everything from work in a labor gang to founding a non-profit organization devoted to philosophy. Who worked as a janitor to get through college and became the CEO of five corporations. Who has been

rich and poor and believes that the sole primary purpose of human existence is learning. You won't have to guess about this writer's opinions, they will come to you in short, concise, clear bursts. You will love some, hate some others and, in the end, agree that you have been entertained in a stimulating fashion. Rushlow has been there, seen it, done it and now he tells it.
