Inhaltsangabe: Einleitung: Die Finanzkrise der Jahre 2007/08 und die ihr folgende, immer noch anhaltende Krise in Europa (Stand:

August 2012) hat in der internationalen Politik Zweifel hinsichtlich der Effizienz und des (sozio-)ökonomischen Nutzens freier Finanzmärkte aufkommen lassen. Folgt die Politik der meisten Industrie- und Schwellenländer in den vergangenen Jahrzehnten noch dem neoliberalen Diktat einer möglichst umfassenden Deregulierung der internationalen Finanzmärkte,

<p>so werden seit Ausbruch der Finanzkrise wieder Maßnahmen für eine verschärfte Regulierung jener Märkte diskutiert. Die Ende 2011 von der Europäischen Kommission vorgeschlagene Finanztransaktionssteuer, die sämtliche von Finanzinstituten betriebenen Wertpapier- und Derivattransaktionen mit einem Steuersatz von 0,1 % auf den Handelswert bzw. von 0,01 % auf den</p>	<p>Nominalbetrag belegen soll und v. a. auf die Einschränkung des als destabilisierenden angesehenen Hochfrequenzhandels abzielt, stellt eine solche Maßnahme dar. Zwar scheint die ursprünglich vorgesehene europaweite Einführung dieser Steuer im Rahmen einer Richtlinie gescheitert. Mehrere Länder darunter Deutschland verfolgen jedoch die Absicht, die</p>	<p>Steuer über das Verfahren der Verstärkten Zusammenarbeit dennoch zu implementieren. Das Vorhaben stößt in Deutschland allerdings nicht nur auf Zustimmung. Als einflussreiche Kritiker der Finanztransaktionssteuer treten v. a. die Finanz- und Wirtschaftsverbände auf. Deren Kritik richtet sich u. a. gegen die vorgesehene Steuerbarkeit von Derivatgeschäften, die auch regelmäßig im</p>

international business. The text is so significant because, in today's modern globalized economic environment, international transactions form an integral part of economic activities. Businesses today are no more confined to national boundaries and have become truly international. Any budding or practising manager, especially of big companies, needs to know the

It concludes with an analysis of international financial institutions and their

functioning, the participants and instruments of global financial markets where international funds are raised, the many uses of international funds in the form of portfolio investments, and direct investments in host countries. The book is primarily intended as a text for postgraduate students of commerce and management, chartered accountancy
