This book focuses on the recovery and new normal in a post-Covid scenario, drawing important lessons from the pandemic and proposing new ideas for sustainable development, endogenous dynamism, and inclusive growth. The book presents different ideas and perspectives about the present and the future, reflecting on four main fields of our economic reality: macroeconomics,

governments, technology, and society. It discusses important topics for future economic scenarios, beginning with an estimation of the economic consequences of the absence of an equitable distribution of vaccines. Further topics discussed include the government's debts sustainability, the probability of an inflation/deflation or of a stagflation scenario, as well as the impact of US and European economic policies on economic growth. The book further investigates the economic costs of the pandemic, which have fallen most heavily on those least able to bear them. It examines governments subsidies, which supported people and firms through wage subsidies, unemployment benefits, and other fiscal measures, and discusses the question of whether more investment in health care, education, and other public services will still be needed. In a time of immense change and global challenges, this book is a must-read for scholars, researchers, and students of economics, as well as policy-makers interested in a better understanding of economic growth, energy, environment, migration, development, digital transformation, and

demography.

Angebot und Nachfrage, Rezession und Inflation sind Begriffe, die täglich und nicht nur im Wirtschaftsteil der Tageszeitung auftauchen. Aber was verbirgt sich hinter diesen Begriffen? Und was versteht man unter Makro- und Mikroökonomie? Welche Faktoren führen zu einer Inflation, warum gibt es Rezessionen und, last but not least, warum lieben Ökonomen freie Märkte und Konkurrenz? Sean Masaki Flynn gibt die Antworten auf diese Fragen und bringt Ihnen damit die Grundzüge der Wirtschaft näher.

In this text, real-world examples and applications from economics and business illustrate topics in international economics. Topics covered include: the spread of protectionism around the world, the establishment of a single market in the European Community, economic reforms in Eastern Europe and the former Soviet Republics, optimum currency areas, the

European monetary system, exchange rate fluctuations, and international monetary and financial adjustments. Coverage of economies of scale, imperfect competition and international trade reflect developments in trade theory. This edition contains a new section which identifies the major international (trade and financial) problems facing the US and the world, and then suggests possible solutions.

Learn to apply the strategies used in East Asia's phenomenal economic expansion. The phenomenal economic growth of many countries in East Asia has no historic parallel. *Globalization and East Asia: Opportunities and Challenges* examines different aspects of the economic performance of the region over the past three decades, with a focus on what it takes to replicate the experience elsewhere. Nineteen of the finest presentations from the 12th International Conference of the International Trade and Finance Association in Bangkok, Thailand, have been carefully selected and revised by their expert authors, providing

powerful, practical economic development approaches that can be used to develop other economies. This comprehensive volume presents an insightful four-part view of the intricate economic workings of East Asia. The first part introduces the distinctive qualities of the policies that sparked economic growth and development. Part two provides comparative studies of different countries and industries in the region and an in-depth study of the East Asian area over the past fifty years. Part three presents sector specific studies within several countries, focusing on international finance. The fourth part spotlights important industry-specific elements and explores the future of globalization in relation to its effects on East Asia. Each chapter is extensively referenced, and several use tables and charts to clearly reinforce crucial points. *Globalization and East Asia* includes topics such as: the characteristics of East Asian economic growth—and how other areas will benefit the rapid economic growth of the region since the end of World War II; an evaluation of efficiency and leveraging of assets; comparing the United States and the Four

Dragon (FD) industries; structural weaknesses within Asian countries; trade flows between the United States and Thailand—a bilateral study; the progress of APEC's environmental cooperation; financial resource flows during the 1990s; Malaysian financial markets and the Asian financial crisis; China's economic transition and exchange rate policies; the use of dual production theory as a model in the world economy; Thailand's telecommunications sector—and how it provides illustration for other sector specific industries in developing countries; development of bilateral trade negotiations between the United States and Vietnam; the status of United States apparel imports.

Globalization and East Asia is important, insightful reading for researchers, scholars, and professionals specializing in regional economics and economic development.

Approximately two years ago, the Guido Carli Association charged a group of distinguished economists with studying

various aspects of the international monetary system and proposing ways to improve it. The studies were presented at a conference in Florence, Italy, on June 19, 1998 and their edited versions are published in this volume. Ideas for the Future of the International Monetary System consists of two parts: Part I contains the studies commissioned by the Carli Association - those by Dominick Salvatore; Koichi Hamada; Forrest Capie; Michele Fratianni, Andreas Hauskrecht and Aurelio Maccario; Jrgen von Hagen and Ingo Fender, Michael Artis, Marion Kohler and Jacques Mlitz; Barry Eichengreen; Michele Fratianni and Andreas Hauskrecht; Paolo Savona and Aurelio Maccario; and Elvio Dal Bosco - and the comments by Paul De Grauwe and William Branson, and the editors' conclusions. Part II contains three papers presented at the Florence conference, by Antonio Fazio, Carl Scognamiglio, and Alberto Predieri.
