The augurs, the official Roman diviners, had a significant role in the public life of the Roman Republic. However, to recover the facts concerning their rites and doctrine is a difficult task because of the defectiveness and the fragmentary nature of our sources. This book offers the first

thorough examination of the ways in which the augural doctrine has been treated by the Greek historians who have written about Rome. The main bulk of its material derives from four prominent writers of the Roman period: Dionysius of Halicarnassus, Plutarch, Appian and Cassius Dio. Analysing the Greek sources from the point of view of language, style, bilingualism, and cultural context, the author not only sheds light on disputed matters of augural doctrine and Roman constitution, but also offers a good deal of new material that in various ways clarifies

the meeting of the two cultures.

The present publication arose from the two-day conference “Learning through Sharing: Open Resources, Open Practices, Open Communication” organised jointly by the EUROCALL Teacher Education and Computer Mediated Communication Special Interest Groups at the University of Bologna (Italy) on 29-30 March 2012. The main objective was to showcase the many ways in which practitioners in different settings are engaging with the concepts of open resources and practices, and to provide ideas for language teachers who might want to dip their toes into the Open Educational Resources/Open Educational Practices world, or experiment further.

What if you could experience another person's memory? Good or bad? Would you want to? What if you didn't have a choice? Sixteen-year old Emily Chandler

would love to be normal. But every night, instead of fantasizing about her own life, she dreams the memories of dead people, reliving their happiest moments... and their most painful experiences. But when Emily begins to have consecutive dreams of Victorian era Lucy, she finally finds an escape from her own friendless waking life. And the dreams get even better when Lucy meets her fiancé's cousin—a handsome bachelor Emily doesn't mind seeing every night. But when Emily accidentally changes the outcome of one of her dreams, thereby shifting reality, she has to make important decisions about choices and control. And what she believes is right.

The scientific dialogue linking America, Asia and Europe between the 12th and the 20th Century. Walter de Gruyter

Concentrating on the Korean language as it is spoken in contemporary North and South Korea, this work is invaluable for students of modern Korean. Sections on the history of Middle Korean, dating from the fifteenth century, as well as detailed descriptions of the influence and use of Chinese characters and vocabulary, make it essential reading for advanced students,

linguists, and historians.

Pass on the Baton is about Southwest Academy, a high school community that mirrors the larger society. It is a story of a patriotic repairman, Desmond Odu, who combined hard work, selfless love and devotion to duty in his strides to improve his classroom constituency. How Teacher Desmond and his crew surmounted the obstacles ready to thwart their noble intentions are strands with which this stimulating story is written. The story celebrates good leadership and motivated followers in their transformation strides to a better future. In this fast-paced, humorous, entertaining and romantic school classic, the author brings to life dream characters - the expectation of a society yearning for direction.

This reference grammar is the first description of the endangered Oceanic

language Daakaka. This language is spoken by about 1000 speakers on the island of Ambrym, Vanuatu. The data on which the analysis is based were collected by the author during a documentation project between 2009 and 2012. All structural levels of the language are discussed, including discussions of reduplication patterns and orthography design, nominal and verbal subclasses, clause types and information structure and the different types of subordinate clauses. Particular emphasis is given to the intricate system of nominal possession, the system of TAM- and polarity markers and serial verb constructions. Literary genres of the region and related art forms such as songs and the symbolic sand drawings are discussed in the final chapter. The grammar will be especially relevant to readers with an interest in Oceanic languages, general typology and theoretical linguistics as well as those with a broader interest in the region.

Comprehensive and up-to-date, Transformational Teaching provides a survey of instructional design and

effective pedagogy that incorporates a biblical worldview throughout, making it especially useful for education courses at Christian colleges, Christian teachers who desire further training or ACSI certification, and homeschooling parents using a faith-based curriculum. The book explores philosophical and psychological foundations underlying teaching approaches, interprets the latest findings in neurological and educational research, and weaves InTASC standards throughout select chapters. Additionally, the final section is devoted to specific disciplines to offer strategies for effective teaching and faith integration in each subject area. Most chapters also feature a worldview foundations section, current research on best practices, case studies, and challenges for reflection and application. Written by authors with more than a century of combined teaching experience, including K-12 classrooms in both public and Christian schools, higher education, online instruction, and international training conferences, Transformational Teaching sets a new standard for teacher training that is specifically geared to a Christian educator.

Silent Teachers considers for the first time the influence of Ottoman scholarly practices and reference tools on oriental learning in early modern Europe. Telling the story of oriental studies through the annotations, study notes, and correspondence of European scholars, it demonstrates the central but often overlooked role that Turkish-language manuscripts played in the achievements of early orientalists. Dispersing the myths and misunderstandings found in previous scholarship, this book offers a fresh history

of Turkish studies in Europe and new insights into how Renaissance intellectuals studied Arabic and Persian through contemporaneous Turkish sources. This story hardly has any dull moments: the reader will encounter many larger-than-life figures, including an armchair expert who turned his alleged captivity under the Ottomans into bestselling books; a drunken dragoman who preferred enjoying the fruits of the vine to his duties at the Sublime Porte; and a curmudgeonly German physician whose pugnacious pamphlets led to the erasure of his name from history. Taking its title from the celebrated humanist Joseph Scaliger's comment that books from the Muslim world are 'silent teachers' and need to be explained orally to be understood, this study gives voice to the many and varied Turkish-language books that circulated in early modern Europe and proposes a paradigm-shift in our understanding of early modern erudite culture.

Reference Point and Case Cambridge University Press

This monograph answers the rarely discussed questions of why complicated grammatical case phenomena exist in

Korean and what the connection is between the case forms and their functions. The author argues that the case forms in Korean reflect patterns of the human cognitive process. While this approach may seem rather obvious to non-linguists, it is indeed a novel claim in contemporary linguistic theory. In order to provide technical analyses of Korean case phenomena such as multiple nominative/accusative, non-nominative subject, and adverbial case constructions,

this book adopts an independently established descriptive construct known as reference point in the framework of Cognitive Grammar. The author demonstrates that the notion of reference point not only explains a substantially wider set of data, but also leads to a more reasonable generalization. The intended readership of this book are researchers who are interested in case phenomena, irrespective of their theoretical orientation. **Silent Teachers** Transformational

The series is a platform for contributions of all kinds to this rapidly developing field. General problems are studied from the perspective of individual languages, language families, language groups, or language samples. Conclusions are the result of a deepened study of empirical data. Special emphasis is given to little-known languages, whose analysis may shed new light on long-standing problems in general linguistics.
