A Workbook for Clinical and Bedside Skills Lippincott Williams & Wilkins
The ultimate, case-based guide for learning and teaching the art of diagnostic reasoning for acute and critical care nurse practitioners Written by experienced nurse practitioners working in acute and critical care settings, and endorsed by the American Association of Critical-Care Nurses (AACN), *Acute & Critical Care Nurse Practitioner: Cases in Diagnostic Reasoning* presents a wide range of acute and critical care patient cases focusing on diagnosis and management. This authoritative book is designed to help nurse practitioners and students learn how to proceed from a broad differential diagnosis to a specific management plan through expert analysis of patient data. While reconstructing the course of real-life clinical cases, the authors “think out loud” and reveal how they identify pertinent positives and significant negatives to support or refute items on their differential diagnoses list, and further incorporate laboratory and diagnostic testing results to establish a medical diagnosis. Each case includes a description of the management for the identified diagnosis. INCLUDES: · 71 cases based on real-life clinical scenarios · Analysis questions and case discussions to enable learners to actively participate in inductive and deductive reasoning · Cases that can be used to support course work, certification review, and job training The first of its kind, *Acute & Critical Care Nurse Practitioner: Cases in Diagnostic Reasoning* is an essential

learning and teaching resource for students, clinicians, and clinical faculty to master the art of diagnostic reasoning.

Critical Thinking and Writing in Nursing Learning Matters

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to

meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing. *A Critical Thinking, Case Studies Approach* National Academies Press Helping today's nursing professional acquire essential critical thinking skills for solving both common and more complex health problems, this innovative and insightful workbook contains 92 real-life cases which address all aspects of nursing care (i.e., assessment, analyzing data, planning care, evaluating benefits and possible consequences of care), and

demonstrate the cognitive and affective components that influence critical thinking. KEY TOPICS: Contains an introduction to critical thinking, an historical overview of critical thinking, and an in-depth discussion on the affective and cognitive components of critical thinking. Uses critical thinking language throughout; bases all material on critical thinking theory; and fosters both attitude and cognitive critical thinking within each case. Organizes case studies by major nursing specialties--adult health, community and home-care, maternal-newborn, pediatrics, and mental health nursing--and presents many activities and questions within each case to stimulate critical thinking skills. Includes practice sessions, detailed chapter summaries, and a book/Internet link that provides regularly updated material. MARKET: For nurses specializing in adult health, community and home-care, maternal-newborn, pediatrics, and mental health. *Medical-Surgical, Pediatric, Maternity, and Psychiatric Case Studies* Mosby Containing detailed and up-to-date case studies on critical care conditions with accompanying questions and answers for applied learning of the practice of critical care nursing, this resource allows the reader to hone vital skills that are necessary in a critical care environment. *Nursing Process and Critical Thinking* Elsevier Health Sciences Resident outcomes have come under growing scrutiny, both through new quality measures and the overall star rating. Nurses are the frontline staff who engage with residents daily, and it's crucial for them to understand how to apply critical thinking. When caring for residents and creating documentation, critical thinking can improve facility and resident outcomes while reducing

medical errors, which will ultimately lead to more accurate reimbursement. Raise the standard of professional nursing practice and teach clinical care providers how to function at a higher level by developing their critical thinking abilities. *Critical Thinking in Long-Term Care Nursing, Second Edition*, provides nurse managers and educators with accessible ways to teach these valuable skills to their staff. This easy-to-read resource explains the principles of critical thinking and how to encourage nurses to use critical thinking methods. Author Shelley Cohen, RN, BS, CEN, provides guidance on how to lead classroom sessions for new graduates and experienced nurses to develop critical thinking skills, including classroom processes and learning strategies. The book includes handouts to supplement classroom training. *Psychiatric-Mental Health Nursing* Saunders

This psychiatric-mental health undergraduate textbook, based on the theories of Hildegard Peplau and Joyce Travelbee, is the first recent book devoted to interpersonal relations as the foundation for therapeutic practice in psychiatric nursing. It guides the student through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice, and provides a historical overview of the profession. The book addresses the most current ISPN and APNA competencies and presents content designed to foster self-growth, and critical thinking and decision-making skills, as well as to implement therapeutic interventions. It offers an overview of theories of mental illness and a detailed discussion of commonly seen psychiatric disorders, and addresses mental health care settings

across the lifespan and different populations. Clinical case studies and first-hand accounts vividly describe the realities of living with specific mental illnesses, "What would you do?" questions stimulate discussions, and sample and practice care plans for chronic mental illness facilitate integration of concepts into practice. Evidence-based practice summaries from psychiatric nursing and related research literature are included, and NANDA guidelines are integrated throughout. A new chapter with DSM-V updates is also available. This affordably priced text additionally comes with supplementary materials for both teachers and students, including handy review guides, summaries, drug monographs, and hyperlinks to films and video illustrating content. A test bank and PowerPoint slides are also available for instructors. Key Features: Integrates and applies the Peplau/Travelbee interpersonal relations theories to the four-step Assessment, Planning/Diagnosing, Implementation, and Evaluation (APIE) nursing process. Addresses critical thinking, clinical decision making, therapeutic interventions, case management roles, and mental health care settings across the lifespan. Features NCLEX preparation questions, vivid clinical scenarios, and evidence-based practice summaries. Addresses the most current ISPN and APNA competencies. A new chapter with DSM-V updates is available. Both student and teacher digital aids, including review guides, summaries, hyperlinks to films and video, and drug monographs are available. A test bank and PowerPoint slides are also available for instructors. eBook Features (available in all eBook formats): Bidirectional link between Key Terms and their glossary definitions.
