The Human Cost of Experiments on Animals Verso

Working at the local processing plant, Marcos is in the business of slaughtering humans—though no one calls them that anymore. His wife has left him, his father is sinking into dementia, and Marcos tries not to think too hard about how he makes a living. After all, it happened so quickly. First, it was reported that an infectious virus has made all animal meat poisonous to humans. Then governments initiated the “Transition.” Now, eating human meat—“special meat”—is legal. Marcos tries to stick to numbers, consignments, processing. Then one day he’s given a gift: a live specimen of the finest quality. Though he’s aware that any form of personal contact is forbidden on pain of death, little by little he starts to treat her like a human being. And soon, he becomes tortured by what has been lost—and what might still be saved.

Death to All Sacred Cows Grand Central
Publishing

Cancer has long been cured in mice but not in people. Why? Successful laboratory treatments and cures for one species don't necessarily result in cures for humans. But, because practice has

become economically entrenched within medical industry, animal experimentation -against all medical evidence- continues. The human benefits of animal experimentation- a bedrock of the scientific age- is a myth perpetuated by an amorphous but insidious network of multibillion-dollar special interests: research facilities, drug companies, universities, scientists, and even cage manufacturers. C. Ray Greek, MD, and veterinary dermatologist, Jean Swingle Gree, DMV, show how the public has been deliberately misled and blow the lid off the vested-interest groups whose hidden agendas put human health at risk.

The Missing Ink Sacred Cows Make Gourmet Burgers Ministry Anytime, Anywhere, by Anybody
You're either a Purple Cow or you're not. You're either remarkable or invisible. Make your choice. What do Apple, Starbucks, Dyson and Pret a Manger have in common? How do they achieve spectacular growth, leaving behind former tried-and-true brands to gasp their last? The old checklist of P's used by marketers - Pricing, Promotion, Publicity - aren't working anymore. The golden age of advertising is over. It's time to add a new P - the Purple Cow. Purple Cow describes something phenomenal, something counterintuitive and exciting and flat-out unbelievable. In his new bestseller, Seth Godin urges you to put a Purple Cow into everything you build, and everything you do, to create something truly noticeable. It's a manifesto for anyone who wants to help create products and services that are worth marketing in the first place.

Turning up the Heat on Spiritual Myths

Axios Press

The Guru Papers demonstrates with uncompromising clarity that authoritarian control, which once held societies together, is now at the core of personal, social, and planetary problems, and thus a key factor in social disintegration. It illustrates how authoritarianism is embedded in the way people think, hiding in culture, values, daily life, and in the very morality people try to live by. The book unmasks authoritarianism in such areas as relationships, cults, 12-step groups, religion, and contemporary morality. Chapters on addiction and love show the insidious nature of authoritarian values and ideologies in the most intimate corners of life, offering new frameworks for understanding why people get addicted and why intimacy is laden with conflict. By exposing the inner authoritarian that people use to control themselves and others, the authors show why people give up their power, and how others get and maintain it.

Investigating Myths, Cults, and the Supernatural

Dial Press

To tithe or not to tithe? Tithing is one of the most misunderstood and abused aspects of modern day religion, and there are fine Christian leaders on both sides of the issue. Doesn't God still want us to tithe? Well, not in the way we are usually taught today. Find out for yourself how to stand firm in your freedom and enjoy being generous!

Eating Sacred Cows

Cambridge University Press

Outmoded beliefs, practices, and processes...why do so many business people cling to their established ways as if their lives depended on them? When they live in an era characterized by an unprecedented rate of change? When

the very things they refuse to give up, the sacred cows of the business world, are the lodestones that will kill their careers and block their companies' path to success? In this insightful and unique guide, Kriegel and Brandt reveal why people hold on to the old and how to inspire them to bring on the new - to the point where they're enthusiastically turning even their favorite sacred cows into burgers. Tackling one of the most important business issues of today, the authors demonstrate why the latest panaceas - reengineering, virtual teams, outsourcing, reinventing, restructuring, downsizing - almost always prove unsuccessful. They expose how these buzzword programs overlook the most fundamental element of all business: people. After all, people are the gatekeepers of change, with the power to breathe life into a new program or kill it. If they're excited and positive, it's open sesame; if they're resistant, they'll slam the door in your face. Getting to the heart of the matter, Kriegel and Brandt show you how to coach yourself and others to create Change-Ready people.

77 Eye-Opening Ways to Improve Productivity and Profits

American Society for Training and Development

Demonstrates why the latest business panaceas -- re-engineering, virtual teams, outsourcing, reinventing, restructuring, downsizing -- almost always prove unsuccessful. Exposes how these buzzword programs overlook the most fundamental element of all business: people. They offer concrete strategies to help you: discover where sacred cows hide, round them up, & put them out to pasture; prepare an environment in which new ideas can grow & flourish; conquer the 4 types of resistance; motivate people to welcome

change -- 5 surefire methods make it easy; cultivate the 7 personal characteristics of Change-Readiness; & perform at peak levels at all times.

Read this book if you are ready to let your ministry spin out of control. Then hang on, for wonderful changes are about to happen to your congregation. -- Charles Ann, Church Growth, Inc.

The Ironies of Misplaced Assumptions in Biology BenBella Books

Sacred cows--outdated and costly business practices such as the reports that are never read or a slow-down of innovative ideas--exist in every company. Inspired by insights gained from more than 450 programs conducted with all types of organizations, the authors of SACRED COWS MAKE THE BEST BURGERS show how corporations can kill off the sacred cows that are crippling them.

Supply Chain Management, a Revolutionary 26-week Action Plan Rodale Books

We're told that if we care about our health—or our planet—eliminating red meat from our diets is crucial. That beef is bad for us and cattle farming is horrible for the environment. But science says otherwise. Beef is framed as the most environmentally destructive and least healthy of meats. We're often told that the only solution is to reduce or quit red meat entirely. But despite what anti-meat groups, vegan celebrities, and some health experts say, plant-based agriculture is far from a perfect solution. In *Sacred Cow*, registered dietitian Diana Rodgers and former research biochemist and New York Times bestselling author Robb Wolf explore the quandaries we face in raising and eating

animals—focusing on the largest (and most maligned) of farmed animals, the cow. Taking a critical look at the assumptions and misinformation about meat, *Sacred Cow* points out the flaws in our current food system and in the proposed "solutions." Inside, Rodgers and Wolf reveal contrarian but science-based findings, such as: • Meat and animal fat are essential for our bodies. • A sustainable food system cannot exist without animals. • A vegan diet may destroy more life than sustainable cattle farming. • Regenerative cattle ranching is one of our best tools at mitigating climate change. You'll also find practical guidance on how to support sustainable farms and a 30-day challenge to help you transition to a healthful and conscientious diet. With scientific rigor, deep compassion, and wit, Rodgers and Wolf argue unequivocally that meat (done right) should have a place on the table. It's not the cow, it's the how!

The Riddles of Culture Hachette UK
While belief in religious supernatural claims is waning throughout the West, evidence suggests belief in nonreligious supernatural claims is on the rise. What explains this contradiction? How can a society with a falling belief in God have a rising belief in ghosts, psychic powers, ancient astronauts, and other supernatural or pseudo-scientific phenomena? Taking the same anthropological approach he employed in his notable studies of religion, atheist author and activist David G. McAfee turns his attention to nonreligious faith-based claims. Whether going undercover as a medium, getting tested at Scientology headquarters in Los Angeles, or interviewing celebrity paranormalists and famous skeptics, he leaves no stone unturned in his investigation. As in the case of religion, he finds an

unwillingness among "believers" to critically examine their most closely held convictions. Only once individuals honestly assess their own sacred cows will they be able to ensure that their beliefs conform to the known facts—and that our decisions as a society are based on the best available evidence.

Purple Cow John Wiley & Sons

Did you know God forbids the tying of shoelaces on Saturday? Or that humans emit a color aura which can only be discerned with a Third Eye? That bountiful harvest requires the flinging of a live goat from a church bell tower? That instead of wishing upon a star, we can wish upon a...cow? Well into the 21st century, our species continues to participate in beliefs and customs that seem more suited to the Bronze Age than the Information Age, some of which involve poisonous snakes, holy smoke, urine bubbles, crystals, tarot cards, aliens, costumed virgins and, of course, an offering plate. Join Seth Andrews for a random romp across the planet and a humorous look at some of humanity's sacred cows.

Rereading Ancient Philosophy

Greenleaf Book Group

As a serial entrepreneur, Kevin Kruse has seen time and again that the leadership practices that actually work are the

opposite of what is commonly taught and implemented. Close Your Open Door Policy shows how a contrarian approach can be a better, faster, and easier way to succeed as a leader. Chapter by chapter, Kruse focuses on a piece of popular wisdom, then shows with real-world case studies and quantitative research that the opposite approach will lead to better results, encouraging leaders to play favorites, stay out of meetings, and, of course, close their open doors.

How to Win Friends and Avoid Sacred Cows Pitchstone Publishing (US&CA)

A husband-and-wife doctor team offers fresh and startling perspective on one of our most cherished and misunderstood institutions. Drs. Astro and Danielle Teller know better than most that finding the right partner in life doesn't always happen the first time around. Through their own divorces they learned how widely held cultural assumptions and misinformation that nobody thinks to question—what they refer to as “sacred cows”—create unnecessary heartache for people who are already suffering through a terrible time. Do you think, for example, that the divorce rate in the United States is rising? Or that children are harmed by divorce? Most people do, but it turns out that neither of these notions is supported by the data. Combining the rigor that has established them as leaders in their respective fields along with a dose of good-natured humor, the Tellers ask readers to take a fresh look at seven common sacred cows: the Holy Cow, the Expert Cow, the Selfish Cow, the Defective Cow, the Innocent Victim Cow, the One True Cow, and the Other Cow. This is not a book that is “for” marriage or “for” divorce, but “for” the freedom to decide how to live most honestly and happily either as part of a couple or a single person.

Developing Change-Ready People and Organizations A&C Black

The Weird Adventures of Peace Corps volunteer David Macarary in India in 1967-1968. The memoir recounts the many humorous and sometimes sad experiences of that 2 year period of his life. It relates these escapades in a non-chronological and random manner in commentary form. The memoir has numerous photos and images of old and modern India.

Change the way you think about technology change Vintage

"A free-wheeling vehicle . . . an unforgettable ride!"—The New York Times
 Cat's Cradle is Kurt Vonnegut's satirical commentary on modern man and his madness. An apocalyptic tale of this planet's ultimate fate, it features a midget as the protagonist, a complete, original theology created by a calypso singer, and a vision of the future that is at once blackly fatalistic and hilariously funny. A book that left an indelible mark on an entire generation of readers, Cat's Cradle is one of the twentieth century's most important works—and Vonnegut at his very best. "[Vonnegut is] an unimitative and inimitable social satirist."—Harper's Magazine
 "Our finest black-humorist . . . We laugh in self-defense."—Atlantic Monthly

The Technology Change Book Hachette UK

This book revisits, and sheds fresh light on, some key texts and debates in ancient philosophy. Its twin targets are 'Old Chestnuts' - well-known passages in the works of ancient philosophers about which one might have thought everything there is to say has already been said - and 'Sacred Cows' - views about what ancient philosophers thought, on issues of philosophical importance, that have attained the status of near-unquestioned orthodoxy. Thirteen leading scholars respond to these challenges by offering new perspectives on familiar material and challenging some prevailing orthodoxies. On authors ranging from the Presocratics to Plotinus, the book represents a snapshot of contemporary scholarship in ancient philosophy, and a vigorous and illuminating affirmation of its continuing interest and power. The volume is dedicated to Professor M. M. McCabe, an inspiring scholar and teacher, colleague and friend to both the editors and the contributors.
