LACI ELLIS

Memories of 60 Years of Shock Wave Research at Sandia National Laboratories Springer Science & Business Media

A monumentally devastating plague leaves only a few survivors who, while experiencing dreams of a battle between good and evil, move toward an actual confrontation as they migrate to Boulder, Colorado.

Mobilities and Foucault Univ of California Press

This comprehensive treatment of legal philosophy and general jurisprudence is designed for jurists as well as legal and practical philosophers. The treatise is presented in two sections: The 5-volume Theoretical part (2005) covers topics of contemporary debate; The 6-volume Historical part (2006-2007) traces the development of legal thought from ancient Greece through the twentieth century. This release incorporates Vol. 6: A History of the Philosophy of Law from the Ancient Greeks to the Scholastics; Vol. 7: The Jurists' Philosophy of Law from Rome to the Seventeenth Century; and

Vol 8: A History of the Philosophy of Law in the Common Law World, 1600-1900.

Our Hearts Are Restless Till They Find Their Rest in Thee Wipf and Stock Publishers

This book presents a history of shock compression science, including development of experimental, material modeling, and hydrodynamics code technologies over the past six decades at Sandia National Laboratories. The book is organized into a discussion of major accomplishments by decade with over 900 references, followed by a unique collection of 45 personal recollections detailing the trials, tribulations, and successes of building a world-class organization in the field. It explains some of the challenges researchers faced and the gratification they experienced when a discovery was made. Several visionary researchers made pioneering advances that integrated these three technologies into a cohesive capability to solve complex scientific and engineering problems. What approaches worked, which ones did not, and the applications of the research are described. Notable applications include the turret explosion aboard the USS Iowa and the Shoemaker-Levy comet impact on Jupiter. The personal anecdotes and recollections make for a fascinating account of building a world-renowned capability from meager beginnings. This book will be inspiring to the expert, the non expert, and the early-career scientist. Undergraduate and graduate students in science and engineering who are contemplating different fields of study should find it especially compelling.

Best American Poetry 2016 SAGE

In this latest edition of *Key Thinkers on Space and Place*, editors Phil Hubbard and Rob Kitchin provide us with a fully revised and updated text that highlights the work of over 65 key thinkers on space and place. Unique in its concept, the book is a comprehensive guide to the life and work of some of the key thinkers particularly influential in the current 'spatial turn' in the social sciences. Providing a synoptic overview of different ideas about the role of space and place in contemporary social, cultural, political and economic life, each portrait comprises: Biographical information and theoretical context. An explication of their contribution to spatial thinking. An overview of key advances and controversie. Guidance on further reading. With 14 additional chapters including entries on Saskia Sassen, Tim Ingold, Cindi Katz and John Urry, the book covers ideas ranging from humanism, Marxism, feminism and post-structuralism to queer-theory, post-colonialism, globalization and deconstruction, presenting a thorough look at diverse ways in which space and place has been theorized. An essential text for geographers, this now classic reference text is for all those interested in theories of space and place, whether in geography, sociology, cultural studies, urban studies, planning, anthropology, or women's studies.

[World Animal Review](#) ABC-CLIO

Philosophers of science frequently bemoan (or cheer) the fact that today, with the supposed collapse of logical empiricism, there are now ;;10 grand systems. However, although this mayor may not be true, and if true mayor may not be a cause for delight, no one should conclude that the philosophy of science has ground to a halt, its problems exhausted and its practioners dispirited. In fact, in this post Kuhnian age the subject has never been more alive, as we work with enthusiasm on special topics, historical and conceptual. And no topic has grown and thrived quite like the philosophy of biology, which now has many students in the field producing high-quality articles and monographs. The success of this subject is due above all to the work and influence of one man: David Hull. In his own writings and in the support he has given to others, he has shown true leadership, in the best Platonic sense. It is now twenty years since Hull fnt gave his seminal paper 'What the philosophy of biology is not', and to mark that point and to show our respect, gratitude and affection to its author, a number of us who owe much to Hull decided to produce a volume of essays on and around themes to which Hull has spoken.

Comparative Criticism: Volume 3 Bloomsbury Publishing

Social policy and human geography are intimately intertwined yet frequently disconnected fields. Whilst social policies are always conceived, implemented and experienced in and through geography, the role of place in social policy scholarship and practice is frequently overlooked. Bringing together experts from both fields, this collection illuminates the myriad of ways that human geography offers rich insights conceptually, empirically and methodologically into the neglected spatialities of policy scholarship, practice and experience. By building the necessary bridges towards a spatial social policy, this book enables the enhanced design, performance and understanding of social policies once properly rooted in their multiple spatialities.

Armor and weaponry were central to Islamic culture not only as a means of conquest and the spread of the faith, but also as symbols of status, wealth, and power. The finest arms were made by master craftsmen working with the leading designers, goldsmiths, and jewelers, whose work transformed utilitarian military equipment into courtly works of art. This book reveals the diversity and artistic quality of one of the most important and encyclopedic collections of its kind in the West. The Metropolitan Museum's holdings span ten centuries and include representative pieces from almost every Islamic culture from Spain to the Caucasus. The collection includes rare early works, among them the oldest documented Islamic sword, and is rich in helmets and body armor, decorated with calligraphy and arabesques, that were worn in Iran and Anatolia in the late fifteenth century. Other masterpieces include a jeweled short sword (yatagan) with a blade of "watered" steel that comes from the court of Süleyman the Magnificent, a seventeenth-century gold-inlaid armor associated with Shah Jahan, and two gold-inlaid flintlock firearms belonging to the guard of Tipu Sultan of Mysore. Presenting 126 objects, each handsomely photographed and richly documented with a detailed description and discussion of its technical, historical, and artistic importance, this overview of the Met's holdings is supplemented by an introductory essay on the formation of the collection, and appendixes on iconography and on Turkman-style armor.

[Vinaver Plays: 2](#) Cambridge University Press

This *Perversion Called Love* positions one of Japan's most canonical and best translated 20th century authors at the center of contemporary debates in feminism. Examining sexual perversion in Tanizaki's aesthetic essays, cultural criticism, cinema writings and short novels from the 1930s, it argues that Tanizaki understands human subjectivity in remarkably Freudian terms, but that he is much more critical than Freud about what it means for the possibility of love. According to Tanizaki, perversion involves not the proliferation of interesting gender positions, but rather the tragic absence of even two sexes, since femininity is only defined as man's absence, supplement, or complement. In this fascinating work, author Margherita Long reads Tanizaki with a theoretical complexity he demands but has seldom received. As a critique of the historicist and gender-focused paradigms that inform much recent work in Japanese literary and cultural studies, *This Perversion Called Love* offers exciting new interpretations that should spark controversy in the fields of feminist theory and critical Asian studies.

Towards a Spatial Social Policy Simon and Schuster

The premier anthology of contemporary American poetry continues—guest edited this year by award-winning poet Edward Hirsch, a Chancellor of the Academy of American Poets and the president of The John Simon Guggenheim Memorial Foundation. The *Best American Poetry* series is “a vivid

snapshot of what a distinguished poet finds exciting, fresh and memorable” (Robert Pinsky); a guiding light for the mood and shape of modern American poetry. Each year, this series presents essential American verse and the poets who create it. Truly the “best” American poetry has appeared in this venerable collection for over twenty-five years. A poet of decided brilliance since his 1981 debut collection, *For the Sleepwalkers*, Edward Hirsch curates a thoughtful selection of poetry for 2016 and an Introduction to be savored. Jumpha Lahiri said of Hirsch, “The trademarks of his poems are...to be intimate but restrained, to be tender without being sentimental, to witness life without flinching, and above all, to isolate and preserve those details of our existence so often overlooked, so easily forgotten, so essential to our souls.” Hirsch’s choices for this collection reflect the soul of poetry in America. As ever, series editor David Lehman opens this year’s edition with an insider’s guide and a thoughtful contemplation of poetry today.

What the Philosophy of Biology Is New York : Bowker

Although Foucault’s work has been employed and embraced enthusiastically by some ‘mobilities’ scholars, discussion across these two traditions to date has mostly been partial and unsystematic. Yet Foucault’s work can make critical contributions, for example, to thinking about governing mobilities in contemporary societies, while conversely mobilities research opens up new perspectives on Foucault. In combination these bodies of work can illuminate issues as diverse as: the greater interdependencies between mobility systems (e.g. transport, tourism, trade, internet use); the proliferation of the undesired mobilities of viruses, of natural phenomena like fire, of (what is taken to be) criminality and other seemingly inevitable by-products of globalisation; the perceived threats to desirable forms of mobility as constituted by climate change, peak oil and energy security, and terrorism and warfare; and the increased popularity of logics of governance premised on choice, responsabilisation and the (re)coding of phenomena in economic terms under neo-liberalism. Against this background, this book brings together the first major collection of contributions from across the social sciences with a shared interest in both mobilities and Foucauldian thinking. This book was published as a special issue of *Mobilities*.

High Places; The Neighbours; Portrait of a Woman; The Television Programme W. W. Norton & Company

"Following the financial crises in 2007, we have seen the intensification of neoliberal policies in education, with radical and potentially irrevocable shifts in the educational landscape, promoted under the auspices of ‘austerity’. This book highlights the central features of neoliberal education policies, their origins, recent developments and also their inherent weaknesses and flaws. It provides insights into the day to day realities and negative impacts of recent policies on the professional practice and work of educators, demonstrating how the changing conditions have led to de-professionalisation, alienation and a loss of professional autonomy and identity. The book also provides a set of accounts that detail the new realities emerging as a result of ‘austerity’ policies and questions the degree to which austerity has actually been developed as an ideological ‘cover story’ for the further monetisation and privatisation of public services. The various chapters challenge the common assumption that the neoliberal project is a monolithic orthodoxy by highlighting its complexities, variations and contradictions in the ways policies are refracted through action and practice in different contexts. The book also challenges the common assumption that there are no viable alternatives to neoliberal education policies, and does so by presenting a range of different examples, theoretical perspectives, discourses and alternative practices. It is argued that such alternatives not only highlight the range of different approaches, choices and possibilities but also provide the seedbed for a reimagined educational future. The authors offer a range of conceptual and theoretical insights and analyses that highlight the weaknesses and limitations inherent within the neoliberal education project and also illustrate the dangers in following the prevailing hegemonic discourse and trajectories. It is postulated that alternative educational approaches warrant greater and urgent attention because history suggests that rather than having weathered the recent economic crisis, we may well be witnessing the long tail of decline for the neoliberal project. This book will be useful for educators, researchers, students and policy makers interested in the detrimental effects of neoliberal education, the range of viable alternatives, and the routes to resistance and ways of reimagining alternative educational futures."

From Freud to Kohut Oak Knoll Press

The first-ever multivolume treatment of the issues in legal philosophy and general jurisprudence, from both a theoretical and a historical perspective. The work is aimed at jurists as well as legal and practical philosophers. Edited by the renowned theorist Enrico Pattaro and his team, this book is a classical reference work that would be of great interest to legal and practical philosophers as well as to jurists and legal scholar at all levels. The work is divided in two parts. The theoretical part (published in 2005), consisting of five volumes, covers the main topics of the contemporary debate; the historical part, consisting of six volumes (Volumes 6-8 published in 2007; Volumes 9 and 10, published in 2009; Volume 11 published in 2011 and Volume 12 forthcoming in 2015), accounts for the development of legal thought from ancient Greek times through the twentieth century. The entire set will be completed with an index. Volume 6: *A History of the Philosophy of Law from the Ancient Greeks to the Scholastics* 2nd revised edition, edited by Fred D. Miller, Jr. and Carrie-Ann Biondi Volume 6 is the first of the *Treatise's* historical volumes (following the five theoretical ones) and is dedicated to the philosophers' philosophy of law from ancient Greece to the 16th century. The volume thus begins with the dawning of legal philosophy in Greek and Roman philosophical thought and then covers the birth and development of European medieval legal philosophy, the influence of Judaism and the Islamic philosophers, the revival of Roman and Christian canon law, and the rise of scholastic philosophy in the late Middle Ages, which paved the way for early-modern Western legal philosophy. This second, revised edition comes with an entirely new chapter devoted to the later Scholastics (Chapter 14, by Annabel Brett) and an epilogue (by Carrie-Ann Biondi) on the legacy of ancient and medieval thought for modern legal philosophy, as well as with updated references and indexes.

Rereading Women: Thirty Years of Exploring Our Literary Traditions Routledge

This volume of essays examines the problem of mind, looking at how the problem has appeared to neuroscientists (in the widest sense) from classical antiquity through to contemporary times. Beginning with a look at ventricular neuropsychology in antiquity, this book goes on to look at Spinozan ideas on the links between mind and body, Thomas Willis and the foundation of Neurology, Hooke's mechanical model of the mind and Joseph Priestley's approach to the mind-body problem. The volume offers a chapter on the 19th century Ottoman perspective on western thinking. Further chapters trace the work of nineteenth century scholars including George Henry Lewes, Herbert Spencer and Emil du Bois-Reymond. The book covers significant work from the twentieth century, including an examination of Alfred North Whitehead and the history of consciousness, and particular attention is given to the development of quantum consciousness. Chapters on slavery and the self and the development of an understanding of Dualism bring this examination up to date on the latest 21st century work in the field. At the heart of this book is the matter of how we define the

problem of consciousness itself: has there been any progress in our understanding of the working of mind and brain? This work at the interface between science and the humanities will appeal to experts from across many fields who wish to develop their understanding of the problem of consciousness, including scholars of Neuroscience, Behavioural Science and the History of Science.

The Descendants of Mathew Martine Forde Vol II Generations 9-12 - Unabridged With Sources Springer Science & Business Media

The second collection of plays by one of France's most prominent playwrights High Places: "A drama which, from second to second, maintains the spectator in suspense, and which, by the same stroke, achieves the dimension of pure, great metaphysical theatre." (Le Monde); The Neighbours "bizarre contemporary vaudeville, biting, disturbing, very subtle and wildly funny" (Le Figaro); Portrait of a Woman: "An intriguing challenging piece." (Financial Times); The Television Programme: "The piece is beautifully plotted and written from the heart." (Independent on Sunday) The translators are Gideon Y. Schein (High Places); Paul Antal (The Neighbours); Donald Watson (Portrait of a Woman); David and Hannah Bradby (The Television Programme)
