Careers in astronomy for  
women (as in other  
sciences) were a rarity in  
Britain and Ireland until  
well into the twentieth  
century. The book  
investigates the place of  
women in astronomy

before that era, recounted  
in the form of biographies  
of about 25 women born  
between 1650 and 1900  
who in varying capacities  
contributed to its progress  
during the eighteenth,  
nineteenth and early  
twentieth centuries. There  
are some famous names  
among them whose  
biographies have been  
written before now, there  
are others who have  
received less than their  
due recognition while  
many more occupied  
inconspicuous and  
sometimes thankless  
places as assistants to  
male family members. All  
deserve to be  
remembered as  
interesting individuals in  
an earlier opportunity-  
poor age. Placed in  
roughly chronological  
order, their lives  
constitute a sample  
thread in the story of  
female entry into the  
male world of science.  
The book is aimed at  
astronomers, amateur  
astronomers, historians of  
science, and promoters of  
women in science, but  
being written in non-  
technical language it is  
intended to be of interest  
also to educated readers  
generally.

Most students struggle with learning how to find references, use them effectively, and cite them appropriately in a required format. One of the most common formats is that of APA. The authors all have vast experience teaching writing courses to various levels of students from undergraduates to graduates in other countries. However, there was lacking a book that could explain the basics of APA in simple, easy-to-understand language for non-native speakers of English, who are often unfamiliar with using references and formatting an essay in a particular method. In order to offer English Learner student writers a source of information that is appropriate for their level, and is cost-effective, this updated APA 7th edition guidebook provides students with important information in clear,

concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials on the market targets native speakers of English. The problem with this is that they present the nitpicky details of APA in ways that do not make sense to native speakers of English, let alone to those for whom English is not their first language, because the information is presented in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that make sense to both native and non-native English speaking student writers. Additionally, student writers often struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this important information that is concise and easy to understand. NOTE: This is a REVISED edition of our original The

Concise APA Handbook, which has been updated for APA 7th edition, which was issued in the fall, 2019.

Flourishing in Emerging Adulthood highlights the third decade of life as a time in which individuals have diverse opportunities for positive development. There is mounting evidence that this time period, at least for a significant majority, is a unique developmental period in which positive development is fostered. Dr. Lene Arnett Jensen highlights the importance of this work in an engaging foreword, and chapters are written by leading scholars in diverse disciplines who address various aspects of flourishing. They discuss multiple aspects of positive development including how young people flourish in key areas of emerging adulthood (e.g., identity, love, work, worldviews), the various unique opportunities afforded to young people to flourish, how flourishing might look different around the world, and how flourishing can occur in the face of challenge. Most chapters are accompanied by first-person essays written by

a range of emerging adults who exemplify the aspect of flourishing denoted in that chapter and make note of how choices and experiences have helped them transition to adulthood. Taken together, this innovative collection provides rich evidence and examples of how young people are flourishing as a group and as individuals in a variety of settings and circumstances. This unique resource will be useful to students, faculty, professionals, clinicians, and university personnel who work with young adults or who study development during emerging adulthood.

"Entertainers and trainers have a lot in common. Both require an audience. Both require a polished, professional delivery. And both must attract -- and keep -- attention. Or else the show is over. Unlike the audience at a show, training participants are often disinterested and easily distracted. In order to keep them tuned in and help them retain information, trainers are constantly in search of new ways to engage learners. Grounded in the latest adult learning and training theories, "Show Biz Training" provides creative techniques that use comedy, props, magic, theater, and music, giving readers all the tools they need to

perform the many activities found inside. The book uses specific examples and provides step-by-step instructions, resource lists, and worksheets to help trainers support and further learning by engaging emotion, building rapport, creating the proper atmosphere, and crafting lessons out of a host of entertainment-inspired ideas. Packed with fun, original concepts for serious educators, "Show Biz Training" is a highly informative way to set the stage for exciting, effective learning."

"Reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor. Recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts, the Publications and Communications (P&C) Board of the American Psychological Association (APA) invited two task

forces of researchers to develop standards for reporting quantitative and qualitative research in journal articles. The Quantitative Journal Article Reporting Standards Working Group developed standards for quantitative research, and a separate book details those standards. This book discusses the reporting standards. It permits the space to expand on the ideas in those standards and to articulate the rationale behind each. It articulates decisions one may need to make as an author as one decides how to present their work. It also provides examples to illustrate a strong presentation style, and these can serve as helpful models. It provides the conceptual undergirding for the reporting decisions that authors make during the writing process. The book considers the typical sections of a qualitative research paper: the introductory sections, Method, Results, and Discussion. Guidance is provided for how to best present qualitative research, with rationales and illustrations. The book presents reporting standards for qualitative meta-analyses, which are integrative analyses of

findings from across primary qualitative research. The book includes a discussion of objectivist and constructivist rhetorical styles in research reporting."--Preface. The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to

uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

 "This book offers practical  
 guidance for understanding and  
 implementing the American

 Journal Article Reporting  
 Standards for Quantitative  
 Research (JARS-Quant)

and Meta-Analysis Reporting  
 Standards (MARS). These  
 standards lay out the essential  
 pieces of information researchers  
 need to report, including  
 detailed accounts of the  
 methods they followed, data  
 results and analysis, interpretations  
 of their findings, and implications  
 for future research. The book  
 reflects updates to the original  
 JARS and the MARS that meet  
 researchers' developing needs  
 in the behavioral, social,  
 educational, and medical  
 sciences. It analyzes examples  
 from APA journals, offering  
 readers easy-to-read advice  
 for implementing these revised  
 standards in their own writing
