Tempo/Topaz Cengage Learning

This book examines the dominance and significance of lean organizing in the international economy. Scholars from each discipline see lean production as positive or negative; the book blends theory with practice by sorting out these different academic views and revealing how lean is implemented in different ways. The first part synthesizes academic research from a range of disciplines—including, engineering, sociology, and management—to present the reader with an integrated understanding of the benefits and drawbacks of lean management. The second part links this theory to practice, with a set of case studies from companies like Apple, Google, Nike, Toyota, and Walmart that demonstrate how lean is implemented in a variety of settings. The book concludes with three models, explaining how Toyotism, Nikefication with offshoring, and Waltonism provide full or less complete models of lean production. It clearly presents the positive and negative aspects of lean and insights into the culture of lean organizations. With its rich interdisciplinary approach, *Framing and Managing Lean Organizations in the New*

Economy will benefit researchers and students across a range of classes from management, sociology, and public policy to engineering.

In this sweeping cultural history, James Flink provides a fascinating account of the creation of the world's first automobile culture. He offers both a critical survey of the development of automotive technology and the automotive industry and an analysis of the social effects of "automobility" on workers and consumers.

In Comeback, Pulitzer Prize-winners Paul

Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. Comeback is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others -- and

their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late.
