along with object-oriented programming in
Julia 1.0Implement macros and
metaprogramming techniques to make
your code faster, concise, and
efficientDevelop the skills necessary to
implement design patterns for creating

robust and maintainable applicationsBook
Description Design patterns are
fundamental techniques for developing
reusable and maintainable code. They
provide a set of proven solutions that
allow developers to solve problems in
software development quickly. This book
will demonstrate how to leverage design
patterns with real-world applications.
Starting with an overview of design
patterns and best practices in application

design, you'll learn about some of the most fundamental Julia features such as modules, data types, functions/interfaces, and metaprogramming. You'll then get to grips with the modern Julia design patterns for building large-scale applications with a focus on performance, reusability, robustness, and maintainability. The book also covers anti-patterns and how to avoid common mistakes and pitfalls in development. You'll see how traditional object-oriented patterns can be implemented differently and more effectively in Julia. Finally, you'll explore various use cases and examples, such as how expert Julia developers use design patterns in their open source packages. By the end of this Julia programming book, you'll have learned methods to improve software design, extensibility, and reusability, and be able to use design patterns efficiently to overcome common challenges in software development. What you will learn Master the Julia language features that are key to developing large-scale software applications Discover design patterns to improve overall application architecture and design Develop reusable programs that are modular, extendable,

performant, and easy to maintain Weigh up the pros and cons of using different design patterns for use cases Explore methods for transitioning from object-oriented programming to using equivalent or more advanced Julia techniques Who this book is for This book is for beginner to intermediate-level Julia programmers who want to enhance their skills in designing and developing large-scale applications. *Pivotal Strategies for the Educational Leader* Princeton University Press While urban settlements are the drivers of the global economy and centres of learning, culture, and innovation and nations rely on competitive dynamic regions for their economic, social, and environmental objectives, urban centres and regions face a myriad of challenges that impact the ways in which people live and work, create wealth, and interact and connect with places. Rapid urbanisation is resulting in urban sprawl, rising emissions, urban poverty and high unemployment rates, housing affordability issues, lack of urban investment, low urban financial and governance capacities, rising inequality and urban crimes, environmental degradation, increasing vulnerability to

natural disasters and so forth. At the regional level, low employment, low wage growth, scarce financial resources, climate change, waste and pollution, and rising urban peri-urban competition etc. are impacting the ability of regions to meet socio-economic development goals while protecting biodiversity. The response to these challenges has typically been the application of inadequate or piecemeal solutions, often as a result of fragmented decision-making and competing priorities, with numerous economic, environmental, and social consequences. In response, there is a growing movement towards viewing cities and regions as complex and sociotechnical in nature with people and communities interacting with one another and with objects, such as roads, buildings, transport links etc., within a range of urban and regional settings or contexts. This comprehensive MRW will provide readers with expert interdisciplinary knowledge on how urban centres and regions in locations of varying climates, lifestyles, income levels, and stages development are creating synergies and reducing trade-offs in the development of resilient, resource-efficient,

environmentally friendly, liveable, socially equitable, integrated, and technology-enabled centres and regions.

Balanced yet eclectic in its approach, *Contemporary Issues in Curriculum* reflects the emergent trends in the field of curriculum. The fourth edition of this issues-oriented collection offers 40 articles by the major thinkers in curriculum study. Designed for students in curriculum, instruction, administration, and teacher education, it explores the issues that affect implementation, planning, and evaluation of curriculum at all levels of learning. The editors have organized the collection into six Parts: Curriculum and Philosophy, Curriculum and Teaching, Curriculum and Learning, Curriculum and Instruction, Curriculum and Supervision, and Curriculum and Policy. The readings reflect both traditionally held beliefs and those that are more controversial in nature, providing students and practitioners the opportunity to investigate the breadth of issues that affect curriculum and to access such information in a single source. Readers are

encouraged to examine and debate these issues, to formulate their own ideas, and to shape what direction the field of curriculum should take. The fourth edition features 14 new articles, by such leading scholars as John Goodlad, Linda Darling-Hammond, Evans Clinchy, Andrew Gitlin, Stacey Ornstein, Geneva Gay, David Perkins, Harry Wong, Frank Levy, Richard Murnane, Robert Slavin, Allan Odden, Richard Rothstein, Alan Ornstein, and Edward Pajak.

Documents Relating to the Foreign Relations of the United States with Other Countries During the Years from 1809 to 1898 R & L Education

2020 Foreword INDIE awards winner "Day-to-day life in immigrant communities is described with refreshing clarity and heart... an unusually accessible primer on immigration law and a valuable guide to the ways it currently works to perpetuate an excluded immigrant underclass with diminished rights." —The New York Review of Books The national debate over American immigration policy has obsessed politicians and disrupted the lives of millions of people for decades. *The Battle to Stay in America* focuses on Las Vegas,

Nevada—a city where more than one in five residents was born in a foreign country, and where the community is struggling to defend itself against the federal government's crackdown on undocumented immigrants. Told through the eyes of an immigration lawyer on the front lines of that battle, this book offers an accessible, intensely personal introduction to a broken legal system. It is also a raw, honest story of exhaustion, perseverance, and solidarity. Michael Kagan describes how current immigration law affects real people's lives and introduces us to some remarkable individuals—immigrants and activists—who grapple with its complications every day. He explains how American immigration law often gives good people no recourse. He shows how under President Trump the complex bureaucracies that administer immigration law have been re-engineered to carry out a relentless but often invisible attack against people and families who are integral to American communities. Kagan tells the stories of people desperate to escape unspeakable violence in their homeland, children separated from their

families and trapped in a tangle of administrative regulations, and hardworking long-time residents suddenly ripped from their productive lives when they fall unwittingly into the clutches of the immigration enforcement system. He considers how the crackdown on immigrants negatively impacts the national economy and offers a deeply considered assessment of the future of immigration policy in the United States. Kagan also captures the psychological costs exacted by fear of deportation and by increasingly overt expressions of hatred against immigrants.

Coverage of cultural and ethnic health disparities highlights important issues such as risk factors,

economic aspects, and access to health care. Coverage of gerontology and chronic illness is addressed in a separate chapter and highlighted in special gerontologic tables. Pathophysiology maps use flowcharts to outline complex concepts related to diseases, making them easier to understand. Focused Assessment boxes provide brief checklists for a practical "assessment on the run" or bedside approach to assessment, and can be used to evaluate the status of previously identified health problems and monitor for signs of new problems. Safety Alert boxes highlight patient safety issues and focus on the National Patient Safety Goals. Nutritional Therapy tables summarize nutritional interventions and strategies for promoting healthy lifestyles. Promoting Population Health boxes summarize health care goals as they relate to specific disorders such as cancer and diabetes, and identify strategies for health promotion. Drug Therapy tables and Drug Alerts highlight important safety considerations for key drugs. State of Hawaii The Dreamers and DACA During the last decade the issue of migration has increased in global prominence and has caused controversy among host countries around the world. To remedy the tendency of scholars to speak only to and from their own disciplinary perspective, this book brings together in a single volume essays dealing with central concepts and key theoretical issues in the study of international migration across the social sciences. Editors Caroline B. Brettell and James F. Hollifield have guided a thorough revision of this seminal text, with valuable insights from such fields as anthropology, demography, economics, geography, history, law, political science, and sociology. Each essay focuses on key concepts, questions, and theoretical frameworks on the topic of international migration in a particular discipline, but the volume as a whole teaches readers about similarities and differences across the boundaries between one academic field and the next. How, for example, do political scientists wrestle with the question of citizenship as compared with sociologists, and how different is this from the questions that anthropologists explore

when they deal with ethnicity and identity? Are economic theories about ethnic enclaves similar to those of sociologists? What theories do historians (the "essentializers") and demographers (the "modelers") draw upon in their attempts to explain empirical phenomena in the study of immigration? What are the units of analysis in each of the disciplines and do these shape different questions and diverse models and theories? Scholars and students in migration studies will find this book a powerful theoretical guide and a text that brings them up to speed quickly on the important issues and the debates. All of the social science disciplines will find that this book offers a one-stop synthesis of contemporary thought on migration.

Hands-On Design Patterns and Best

Practices with Julia Oxford University Press
Scholars from history, economics, political science, and psychology describe the present state of school accountability, how it evolved, how it succeeded and failed, and how it can be improved. They review the history behind the ongoing conflict between educators and policymakers over accountability and testing, describe various accountability schemes, and analyze the costs of accountability. Case studies of three states with strong school systems compare how accountability works in practice. Evers is a research fellow at the Hoover Institution. Immigration is among the most prominent, enduring, and contentious features of our globalized world. Yet, there is little systematic, cross-national research on

why countries "do what they do" when it comes to their immigration policies. Rights, Deportation, and Detention in the Age of Immigration Control addresses this gap by examining what are arguably the most contested and dynamic immigration policies—immigration control—across 25 immigrant-receiving countries, including the U.S. and most of the European Union. The book addresses head on three of the most salient aspects of immigration control: the denial of rights to non-citizens, their physical removal and exclusion from the polity through deportation, and their deprivation of liberty and freedom of movement in immigration detention. In addition to answering the question of why states do what they do, the book describes contemporary trends in what Tom K. Wong refers to as the machinery of immigration control, analyzes the determinants of these trends using a combination of quantitative analysis and fieldwork, and explores whether efforts to deter unwanted immigration are actually working.
