The Path to Strategic Insight for Yourself and Your Company MIT Press
The world we live in today is more volatile than ever. The security of free nations is threatened by

rogue states, the global economy is in flux, and the rapid advance of technology forces constant reevaluation of our society. With so many powerful forces at work and seemingly unpredictable events occurring, to many the future seems dark, and its possibilities frightening. Peter Schwartz disagrees. A world-renowned visionary in the field of scenario planning, Schwartz's startling—and accurate— predictions have been employed by government agencies and

major corporations for more than twenty-five years. He argues that the future is foreseeable, and that by examining the dynamics at work today we can predict the “inevitable surprises” of tomorrow. Timely and thought-provoking, *Inevitable Surprises* is a book that no one with an interest in business—or the future of our society—can afford to miss.

The first truly global history of work, an upbeat assessment from the age of the hunter-gatherer to the present day We work

because we have to, but also because we like it: from hunting-gathering over 700,000 years ago to the present era of zoom meetings, humans have always worked to make the world around them serve their needs. Jan Lucassen provides an inclusive history of humanity's busy labor throughout the ages. Spanning China, India, Africa, the Americas, and Europe, Lucassen looks at the ways in which humanity organizes work: in the household, the tribe, the city, and the

state. He examines how labor is split between men, women, and children; the watershed moment of the invention of money; the collective action of workers; and at the impact of migration, slavery, and the idea of leisure. From peasant farmers in the first agrarian societies to the precarious existence of today's gig workers, this surprising account of both cooperation and subordination at work throws essential light on the opportunities we face today.

September 11th, 2001 was America's wake up call to terrorism.

Unfortunately, we hit the snooze alarm. The next wave of terror attacks won't be nation shaking, cataclysmic events. We're ready for that. Instead, they'll be minor, localized nightmares. Mere pinpricks to our country, but catastrophic to the small towns that find themselves in the crosshairs. Worst of all, there's nothing we can do to stop it from happening

- or is there? A gritty novel extrapolated from real world events, this fast-paced, riveting thriller will leave you alarmed, angry, and awestruck at America's unpreparedness for the next wave of terror attacks. Some might refer to it as death by a thousand cuts, but the counterterrorism community calls it Small Ball. Small Ball is an indictment of our woefully wrongheaded security infrastructure and a testament to the resilience,

resourcefulness, and integrity of the average American. You'll wonder why it hasn't happened already. Perhaps it's happening right now...

Inevitable Surprises

David C Cook

Strategic thinking rather than strategic planning is the key to sustainable success. Strategy involves a broader look, a deeper analysis and a longer time-frame. Strategic thinking is about considering the consequences of developments and possible developments, of

actions and possible actions, on the success, prosperity and continuity of people, organizations or communities. And it is about the kind of success, prosperity and continuity that we seek. This study explores strategic thinking on the basis of strategy literature and cognitive psychology. It reviews studies of how strategic decision-makers operate, including the military. It helps to recognize strategic thinking ability in individuals, to teach strategic thinking and to

foster it in those at the helm: directors, executives, commanders and public administrators. *Thinking Ahead in a Time of Turbulence*

Scenario planning helps organization leaders, executives and decision-makers envision and develop strategies for multiple possible futures instead of just one. It enables organizations to become resilient and agile, carefully calibrating their responses and adapting quickly to new

circumstances in a fast-changing environment. This book is the most comprehensive treatment to date of the scenario planning process. Unlike existing books it offers a thorough discussion of the evolution and theoretical foundations of scenario planning, examining its connections to learning theory, decision-making theory, mental model theory and more. Chermack emphasizes that scenario planning is far more than a simple set of steps to follow, as so many other practice-

focused books do—he addresses the subtleties and complexities of planning. And, unique among scenario planning books, he deals not just with developing different scenarios but also with applying scenarios once they have been constructed, and assessing the impact of the scenario project. Using a case study based on a real scenario project Chermack lays out a comprehensive five phase scenario planning system—project preparation, scenario

exploration, scenario development, scenario implementation and project assessment. Each chapter describes specific techniques for gathering and analyzing relevant data with a particular emphasis on the use of workshops to encourage dialogue. He offers a scenario project worksheet to help readers structure and manage scenario projects as well as avoid common pitfalls, and a discussion, based in recent neurological findings, of how scenario planning helps people to

overcome barriers to creative thinking. “This book is about action and performance. Compelling and thoroughly researched, it offers every business executive a playbook for including uncertainty in the organizational change process and driving competitive advantage”. - Tim Reynolds, Vice President, Talent and Organization

 “A dazzling debut,

establishing Namwali Serpell as a writer on the world stage.”—Salman Rushdie, The New York Times Book Review
 NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Dwight Garner, The New York Times • The New York Times Book Review • Time • NPR • The Atlantic • BuzzFeed • Tordotcom • Kirkus Reviews • BookPage WINNER OF: The Arthur C. Clarke Award • The Los Angeles Times Art Seidenbaum Award • The Anisfield-Wolf Book Award for Fiction • The Windham-

Campbell Prizes for Fiction 1904. On the banks of the Zambezi River, a few miles from the majestic Victoria Falls, there is a colonial settlement called The Old Drift. In a smoky room at the hotel across the river, an Old Drifter named Percy M. Clark, foggy with fever, makes a mistake that entangles the fates of an Italian hotelier and an African busboy. This sets off a cycle of unwitting retribution between three Zambian families (black, white, brown) as they collide and converge over

the course of the century, into the present and beyond. As the generations pass, their lives—their triumphs, errors, losses and hopes—emerge through a panorama of history, fairytale, romance and science fiction. From a woman covered with hair and another plagued with endless tears, to forbidden love affairs and fiery political ones, to homegrown technological marvels like Afronauts, microdrones and viral vaccines, this gripping, unforgettable novel is a

testament to our yearning to create and cross borders, and a meditation on the slow, grand passage of time. Finalist for the Los Angeles Times Ray Bradbury Prize • Longlisted for the Center for Fiction First Novel Prize “An intimate, brainy, gleaming epic . . . This is a dazzling book, as ambitious as any first novel published this decade.”—Dwight Garner, The New York Times “A founding epic in the vein of Virgil’s Aeneid . . . though in its sprawling size, its flavor of

picaresque comedy and its fusion of family lore with national politics it more resembles Salman Rushdie’s *Midnight’s Children*.”—The Wall Street Journal “A story that intertwines strangers into families, which we’ll follow for a century, magic into everyday moments, and the story of a nation, Zambia.”—NPR

Dr. Brooke Spencer always felt different from other girls. Now a successful scientist, she is finally discovering where

she belongs: working alongside the brilliant, trailblazing researcher Dr. Charles Samuelson. Dr. Samuelson has recently made a discovery that has eluded philosophers and dreamers for centuries: How to transmute iron into gold. Determined to use the knowledge for good, Dr. Samuelson recruits Brooke to assist him with his new plan, his "Golden Manifesto." But humans are not alone and his discovery has not gone unnoticed. Extraterrestrial visitors seek to control Dr.

Samuelson's Breakthrough, and before long, Brooke is all that stands between Earth and total Destruction. Will she be able to hold her ground? Or will the timeless temptation of gold prove too much for even the strongest of spirits? Brooke will soon face a choice that will make her question her background, her career, and the fate of the planet.

An important Russian economist and politician

takes a long view of economic history and Russia's development. It is not so easy to take the long view of socioeconomic history when you are participating in a revolution. For that reason, Russian economist Yegor Gaidar put aside an early version of this work to take up a series of government positions—as Minister of Finance and as Boris Yeltsin's acting Prime Minister—in the early 1990s. In government, Gaidar shepherded Russia

through its transition to a market economy after years of socialism. Once out of government, Gaidar turned again to his consideration of Russia's economic history and long-term economic and political challenges. This book, revised and updated shortly before his death in 2009, is the result. Gaidar's account of long-term socioeconomic trends puts his country in historical context and outlines problems faced by Russia (and other developing economies) that more developed

countries have already encountered: aging population, migration, evolution of the system of social protection, changes in the armed forces, and balancing stability and flexibility in democratic institutions. This is not a memoir, but, Gaidar points out, neither is it "written from the position of a man who spent his entire life in a research institute." Gaidar's "long view" is inevitably informed and enriched by his experience in government at a watershed moment in

history.

For decades now, the story of art in America has been dominated by New York. It gets the majority of attention, the stories of its schools and movements and masterpieces the stuff of pop culture legend. Chicago, on the other hand . . . well, people here just get on with the work

of making art. Now that art is getting its due. Art in Chicago is a magisterial account of the long history of Chicago art, from the rupture of the Great Fire in 1871 to the present, Manierre Dawson, László Moholy-Nagy, and Ivan Albright to Chris Ware, Anne Wilson, and Theaster Gates. The first single-volume history of art and artists in Chicago, the book--in recognition of the complexity of the story it tells--doesn't follow a single continuous trajectory. Rather, it

presents an overlapping sequence of interrelated narratives that together tell a full and nuanced, yet wholly accessible history of visual art in the city. From the temptingly blank canvas left by the Fire, we loop back to the 1830s and on up through the 1860s, tracing the beginnings of the city's institutional and professional art world and community. From there, we travel in chronological order through the decades to the present. Familiar developments--such as the founding of

the Art Institute, the Armory Show, and the arrival of the Bauhaus-- are given a fresh look, while less well-known aspects of the story, like the contributions of African American artists dating back to the 1860s or the long history of activist art, finally get suitable recognition. The six chapters, each written by an expert in the period, brilliantly mix narrative and image, weaving in oral histories from artists and critics reflecting on their work in the city, and setting new

movements and key works in historical context. The final chapter, comprised of interviews and conversations with contemporary artists, brings the story up to the present, offering a look at the vibrant art being created in the city now and addressing ongoing debates about what it means to identify as--or resist identifying as--a Chicago artist today. The result is an unprecedentedly inclusive and rich tapestry, one that reveals Chicago art in all its variety and vigor--

and one that will surprise and enlighten even the most dedicated fan of the city's artistic heritage. Part of the Terra Foundation for American Art's year-long Art Design Chicago initiative, which will bring major arts events to venues throughout Chicago in 2018, Art in Chicago is a landmark publication, a book that will be the standard account of Chicago art for decades to come. No art fan-- regardless of their city-- will want to miss it. **You've Got Time** Blue

Dramatic character is among the most long-standing and familiar of artistic phenomena. From the theatre of Dionysus in ancient Greece to the modern stage, William Storm's book delivers a wide-ranging view of how characters have been conceived at pivotal moments in history. Storm reaffirms dramatic character as not only ancestrally prominent but as a continuing focus of interest. He looks closely at how stage figures compare to fictional

characters in books, dramatic media, and other visual arts. Emphasis is sustained throughout on fundamental questions of how theatrical characterization relates to dramatic structure, style, and genre. Extensive attention is given to how characters think and to aspects of agency, selfhood, and consciousness. As the only book to offer a long view of theatrical characterization across this historical span, Storm's dramaturgical

and theoretical investigation examines topics that remain vital and pertinent for practitioners, scholars, students of theatre and literature, and general audiences.

 Indigenous and decolonizing perspectives on education have long persisted alongside

colonial models of education, yet too often have been subsumed within the fields of multiculturalism, critical race theory, and progressive education. Timely and compelling, Indigenous and Decolonizing Studies in Education features research, theory, and dynamic foundational readings for educators and educational researchers who are looking for possibilities beyond the limits of liberal democratic schooling. Featuring

original chapters by authors at the forefront of theorizing, practice, research, and activism, this volume helps define and imagine the exciting interstices between Indigenous and decolonizing studies and education. Each chapter forwards Indigenous principles - such as Land as literacy and water as life - that are grounded in place-specific efforts of creating Indigenous universities and schools, community organizing and social movements, trans and Two Spirit

practices, refusals of state policies, and land-based and water-based pedagogies.

Johnson returns home to South Florida from Vietnam in 1973 with a plan. In order to execute it he will need the help of his younger brother Tommy and his less than scrupulous friends but trying to keep things a secret and off the radar of law enforcement may be harder than he thinks. Based on events and accounts, *A Time to Hustle* is a gripping pulse pounding ride into the illegal and dangerous underworld of the narcotics trade in the 1970's. This story is

fiction. It is loosely based on actual events that happened a long time ago. All of the names and locations have been altered. Please do not try anything described or depicted in the following pages. Personal injury or death may result. Drug use, organized crime, and smuggling are illegal and not encouraged by the author. Any similarity to persons living or dead is coincidental and not intended by the author. Reader discretion is definitely advised.

Penguin
Strategic non-action is a powerful yet under-rated method of influencing worldly affairs. In cultures where action is favoured over inaction, like in the West, direct action is considered a virtue while inaction is little more than laziness or cowardice. Let us be more subtle and nuanced in our understanding. There is a time for both action and inaction. Non-action gives access to a deeper intuitive awareness than that gained through action, since knowledge

that comes through action is obscured by situation-specific reactions. Non-action is an aspect of going with the flow, not resisting the larger forces that govern a world of which you are a small part. It acknowledges that events are governed by the laws of Nature, and it is often best to simply allow those laws to operate and play out in their own time, in their own way. Non-action can help us towards our goals by encouraging patience and taking the long-view.
Humanistic Psychology

says that it is within our reach to create the life we want for ourselves. As we think and believe, so we create our world. This is indeed true, but only up to a point. We can transform our lives in goal fulfilling ways, but the transformation is relatively slow, its progress measured in months and years.

My Overdue Book: Too many stories not to tell: spells out the varied episodes in the life of a

man who spent decades working in Hollywood. He began as a little boy in Cincinnati impressed early on by the broadcasting magic of radio and then TV in the middle of twentieth century America. His drive to get into broadcasting culminates in an early success that gets interrupted by an unexpected sidebar in The US Army and a subsequent tour as an Infantryman in Vietnam in the late 1960's. His yearlong excursion in "Fun City East," with its

repeated life and death experiences, had lifelong effects on this soldier-of-media. Following his wanderings through the jungles of Vietnam, Bright's interactions with many of America's top public figures throughout his decades in radio and television come to life with intriguing stories that are personal, professional, positive and negative. It's life without a filter! Readers across generations will share and co-experience numerous real life feelings and emotions with writer

Bright as his winding trail of life opens in front of them. book endorsement for peter bright; i always thought that peter bright and i had many things in common; we both grew up in ohio, we both had careers in the live event and variety side of television, and the few times we had times to talk i thought we shared a mutual philosophy toward the ups and downs of life. but it wasn't until i read his "overdue" book that i

realized just what a rich and storied life peter has had and how much more deeply he had experienced the highs and lows, particularly during his years in the military, than i ever could have imagined. it really amazes me just how little we know about people we think we know, and just how much more we appreciate who they are when we are fortunate enough to have that background filled in by someone as articulate and

able to express both facts and feelings as peter has in this book. when i started to read it, i thought all of those common events that we shared would be an interesting parallel track to my life and as such i would have a great frame of reference, but as i read on, i realized just what an amazing story peter has to tell and just how well he tells it. ken ehrlich, executive producer, the grammy awards
