A gripping behind-the-scenes account of the dramatic legal fight to hold leaders personally responsible for aggressive war. On July 17, 2018, starting an unjust war became a prosecutable international crime alongside genocide, crimes against humanity, and war crimes. Instead of collective state responsibility, our leaders are now personally subject to indictment for crimes of aggression, from invasions and preemptions to drone strikes and cyberattacks. The Crime of Aggression is Noah Weisbord's riveting insider's account of the high-stakes legal fight to enact this historic legislation and hold politicians accountable for the wars they start. Weisbord, a key drafter of the law for the International Criminal Court, takes readers behind the scenes of one of the most consequential legal dramas in modern international diplomacy. Drawing on in-depth interviews and his own invaluable insights, he sheds critical light on the motivations of the prosecutors, diplomats, and military strategists who championed the fledgling prohibition on unjust war—and those who tried to sink it. He untangles the complex history behind the measure, tracing how the crime of aggression was born at the Nuremberg trials only to fall dormant during the Cold War, and he draws lessons from such pivotal events as the collapse of the League of Nations, the rise of the United Nations, September 11, and the war on terror. The power to try leaders for unjust war holds untold promise for the international order, but also great risk. In this incisive and vitally important book, Weisbord explains how judges in such cases can balance the imperatives of justice and peace, and how the fair prosecution of aggression can humanize modern statecraft.

Since its original publication ten years ago, *Towards a European Civil Code* has become an international classic. It is both a preeminent reference in the debate on the future of European private law, and a standard text in legal education in many European universities. This third, fully revised and expanded edition includes new contributions on such important matters as the following: constitutionalisation; social concerns; economic analysis; arguments against a European civil code; e-commerce; and sales, service and insurance contracts. All forty four chapters have been brought fully up to date with European and national developments, making *Towards a European Civil Code* the cornerstone in any endeavour involving issues in European private law.

This book studies the adoption and diffusion of gender quotas in Latin America and beyond. Gender quotas are institutional mechanisms intended to increase the proportion of women rapidly and effectively in key decision-making political posts. Since the 1980s, gender quotas have been implemented in various governmental bodies and, more commonly, in legislatures. Starting in Northern Europe, these policies have expanded to other European countries and later to thirteen Latin American countries. Yet, whereas gender quotas in most European countries - with the exception of Belgium and France - have been adopted voluntarily by some political parties, in Latin America national legislation mandates all parties to include in their lists a quota for women candidates to legislatures. Although recent scholarship on gender quotas has been devoted to the adoption of gender quotas in a variety of countries, little has been done on Central and South America, despite the fact that the legislative -quota wave- originated there. Diffusion of Gender Quotas in Latin America and Beyond remedies that situation and provides a rich comparative analysis of this policy proliferation in Latin America as well as outside this region by also examining the adoption of legislative quotas in Armenia, Bosnia-Herzegovina, and Serbia."

When teenagers scuffle during a basketball game, they are typically benched. But when Will got into it on the court, he and

his rival were sprayed in the face at close range by a chemical similar to Mace, denied a shower for twenty-four hours, and then locked in solitary confinement for a month. One in three American children will be arrested by the time they are twenty-three, and many will spend time locked inside horrific detention centers that defy everything we know about how to rehabilitate young offenders. In a clear-eyed indictment of the juvenile justice system run amok, award-winning journalist Nell Bernstein shows that there is no right way to lock up a child. The very act of isolation denies delinquent children the thing that is most essential to their growth and rehabilitation: positive relationships with caring adults. Bernstein introduces us to youth across the nation who have suffered violence and psychological torture at the hands of the state. She presents these youths all as fully realized people, not victims. As they describe in their own voices their fight to maintain their humanity and protect their individuality in environments that would deny both, these young people offer a hopeful alternative to the doomed effort to reform a system that should only be dismantled. *Burning Down the House* is a clarion call to shut down our nation's brutal and counterproductive juvenile prisons and bring our children home.

*The Neuroscience of Psychological Therapies* summarizes knowledge of brain function and brain behavior relationships within the context of psychotherapy implementation. Applying a neuroscience framework to conceptualization and treatment of depression is offered as an example, and specific issues associated with trauma and false memories are discussed. The book is aimed at anyone working within a psychotherapy framework and who wishes to discover more about brain function and brain/behavior relationships.

*The Code of Hammurabi* is a well-preserved Babylonian law code of ancient Mesopotamia, dating back to about 1754 BC. It is one of the oldest deciphered writings of significant length in the world. The sixth Babylonian king, Hammurabi, enacted the code, and partial copies exist on a man-sized stone stele and various clay tablets. The Code consists of 282 laws, with scaled punishments, adjusting "an eye for an eye, a tooth for a tooth" (lex talionis) as graded depending on social status, of slave versus free man. Nearly one-half of the Code deals with matters of contract, establishing, for example, the wages to be paid to an ox driver or a surgeon. Other provisions set the terms of a transaction, establishing the liability of a builder for a house that collapses, for example, or property that is damaged while left in the care of another. A third of the code addresses issues concerning household and family relationships such as inheritance, divorce, paternity, and sexual behavior. Only one provision appears to impose obligations on an official; this provision establishes that a judge who reaches an incorrect decision is to be fined and removed from the bench permanently. A few provisions address issues related to military service. Hammurabi ruled for nearly 42 years, c. 1792 to 1750 BC according to the Middle chronology. In the preface to the law, he states, "Anu and Bel called by name me, Hammurabi, the exalted prince, who feared Marduk, the patron god of Babylon (The Human Record, Andrea & Overfield 2005), to bring about the rule in the land." On the stone slab there are 44 columns and 28 paragraphs that contained 282 laws. The laws follow along the rules of 'an eye for an eye'.

Masterful in its simplicity, *Chronicle in Stone* is a touching coming-of-age story and a testament to the perseverance of the human spirit. Surrounded by the magic of beautiful women and literature, a boy must endure the deprivations of war as he suffers the hardships of growing up. His sleepy country has just thrown off centuries of tyranny, but new waves of domination inundate his city. Through the boy's eyes, we see the terrors of World War II as he witnesses fascist invasions, allied bombings, partisan infighting, and the many faces of human cruelty—as well as the simple pleasures of life. Evacuating to the countryside, he expects to find an ideal world full of extraordinary things, but discovers instead an archaic backwater where a severed arm becomes a talisman and deflowered girls mysteriously vanish. Woven between the chapters of the boy's story are tantalizing fragments of the city's history. As the devastation mounts, the fragments lose coherence, and we perceive firsthand how the violence of war destroys more than just buildings and bridges.
