Much like wine tasting, cigar aficionados have created a culture around the art of smoking, assembling various theories and accessories to facilitate smoking. In the 1980s and 1990s, cigar

smoking was portrayed as a trendy habit associated with the upper echelons of society. While industrial development has allowed today's public to access inexpensive machine-made cigars, premium cigars crafted from a blend of top-quality tobaccos and aged to perfection remain popular among celebrities and the business class.

David and I weren't ready to have a threesome, not yet. Still, we were taking baby steps toward it. On his birthday, I decided to give him a show and sleep with a woman right in front of him. My best friend was willing, and it was a beautiful first lesbian experience for both of us. David certainly didn't complain. Warning: This ebook contains very explicit descriptions of sexual activity during a first lesbian sex encounter. Only mature adults who won't find that offensive should read this story.

In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. *Stand Firm: Apologetics and the Brilliance of the Gospel* argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.

Have you ever wondered where cigars were first produced? It is widely believed that cigars were first produced in Spain. But before cigars became all the rage in Europe, tobacco was needed to make them. Tobacco is indigenous to the Americas, where native peoples have produced it for hundreds of years. As the legend has it, the Maya of Yucatan peninsula in Mexico and parts of Central America cultivated tobacco, and even smoked it! Tobacco use spread to other tribes, both north and south. Its first use in the United States was probably among the tribe along the Mississippi. It was not until Christopher Columbus sailed his famous voyage to the Americas in 1492

Every day, at least 1,191 Americans die before their time. They die painful, lingering deaths that could have been prevented. Every three days, as many citizens die from their own smoking habit, or from exposure to second-hand smoke, as died in the Sept 11 tragedy. Each and every pack of cigarettes costs American taxpayers \$40 in higher medical premiums, unavailability of health services, and other hidden financial drains. And every year, 925 out of every 1,000 smokers who try to quit on their own fail to stay smoke-free for a year-while hundreds of thousands of children become addicted to nicotine. Dr. Michael Rabinoff, a respected psychiatrist who holds two patents and has published repeatedly in the *New England Journal of Medicine* and other top-flight journals, shows the health and financial suicide we commit by allowing tobacco companies to continue doing business as usual-and, like any good doctor, provides a detailed prescription for what to do about it: simple actions you can take to save the lives of millions around the world.
