Biblical Exegesis in African Context Beyond the Rivers of Ethiopia

Until comparatively recent times, knowledge that black Africa was the seat of highly evolved civilizations and cultures during a time when Europe stagnated was limited to a small group of scholars. That great empires such as Ghana, and later, Mali flourished for centuries while Europe slept through its dark ages almost has been ignored by historians. Thousands of years before that, as Rudolph R. Windsor notes in this enlightening book, civilizations began with the black races of Africa and Asia, including the Hebrews, who in Biblical times were jet black. Then, western Europe had no nations as such, and its stone age inhabitants had but the crudest tools and lived in caves. Because of the scarce literature on the contributions of blacks to world civilizations, most people today hold the erroneous opinion that the black races have little real history. It was not known, for instance, that the ancient Hebrews, Mesopotamians, Phoenicians, and Egyptians were black. Now, a growing body of literature is presenting the illustrious history of the blacks and their enormous contributions. This carefully researched book is a significant addition to this vital field of knowledge. It sets forth in fascinating detail the history, from earliest recorded times, of the black races of the Middle East and Africa. Dr. Windsor's discussion of Islamic civilization and the movement of the black Hebrew to all parts of Africa is edifying and absorbing. Readers, regardless of race, will find this factual story of a noble heritage a valuable enrichment to their knowledge of world history.

Nigeria predicted in the Bible is an inspirational book that unlocks the prophecies concerning Nigeria and some other nations, and institution. The emphasis dwells more on Nigeria and her citizen's biological ancestries. Historians recorded the ancient Ethiopia cover extensive part of West Africa and that excludes Proper Guinea. The prophecy says beyond the rivers of Ethiopia there is a nation whose land the rivers divide; this prophecy pointed to Proper Guinea which is beyond ancient Ethiopia territory where we found Nigeria, a nation with two great rivers from different location forming a confluence and creating the greatest delta in Africa. This is the Y symbol in Nigeria coat of arms which explains the emphasis of a nation whose land the rivers divide. Through the prophecies and historical records, we are been informed that Nigerians ancestors were true biblical Israelite s fugitives; that settled in present day Nigeria. The Book Unsealed Thomas Nelson

'Biblical Exegesis in African Context' explores how the Church in Africa can affirm its uniqueness in terms of the African identity and experiences, and at the same time, remain faithful to the gospel message. The volume begins with an explanation of exegesis and hermeneutics, and the agenda for the rest of the book is set. The second chapter deals with textual criticism, which is the task of determining the originality of a biblical text. In chapter three, issues related to the context of the text are considered, after which the volume proceeds to examine the various literary forms present in the Bible— prominent among them being— Narrative, Law, Poetry, Prophecy, Wisdom Literature, Gospels, Acts of the Apostles, Epistles and Revelation. The authors then dedicate the next chapter to discussions on socio-rhetorical interpretation. The final chapters of the book deal with matters solely related to the context of Africa; this part intends to equip readers to be able to interpret the Bible from African cultural perspectives and then apply the gospel message meaningfully to the life of African Christians. Chapter seven deals with the emergence and historical development of African Biblical Studies (ABS), noting its relevance and how Africans can benefit from it. The main contention of the chapter is that Africans will better understand and apply God's word to their lives if they read the Scriptures in an African way. The volume then explores how

African languages can be used to derive the meaning of scripture and apply it to real-life situations. Here, the authors contribute to the development of MTBH by developing a methodological framework for this interpretative tool. The next chapter of the volume deals with mother-tongue theologizing in Ghana. The final chapter considers the legitimacy of female leadership in the Church within the African context through the examination of two Pauline texts. This volume will be of interest to undergraduate and graduate seminary students, students of Biblical Interpretation in religions departments, as well as practicing pastors.

For to us a child is born, to us a son is given; and the government will be upon his shoulder and his name shall be called "Wonderful Counselor, Mighty God, Everlasting Father, Prince of Peace." For the early church fathers the prophecy of Isaiah was not a compendium of Jewish history or theology but an announcement of the coming Messiah fulfilled in the life and ministry of Jesus of Nazareth. As such, the prophet's words were a rich source of theological reflection concerning their Lord and a vital aid in their defense against the objections of the Jews that Jesus was the promised Messiah. The interpretation of Jesus' ministry in light of Isaiah's prophecy was not a theological innovation on their part but rather a following of the path blazed by the New Testament writers and Jesus himself. Among passage-by-passage commentaries cited here are those by Eusebius of Caesarea, Jerome, Cyril of Alexandria, and Theodoret of Cyr, as well as one attributed to Basil of Caesarea. John Chrysostom preached a series of homilies on Isaiah of which most of those extant concern the first eight chapters, though Chrysostom frequently cites Isaiah

in numerous homilies on other books. Augustine of Hippo, Gregory the Great, and Bede the Venerable frequently cite passages from Isaiah 1-39, as did many other fathers in defending the Christian faith from Jewish critics. In this Ancient Christian Commentary on Scripture volume, readers will find materials ranging from East to West and from the first through the eighth centuries, some appearing here in English translation for the first time. Within this treasure house are riches to illumine the mind and fire the heart.

Is God's Sign real? Has God been talking to us? Or are we the real demagogues of our own image? Sudan has been the land of Biblical plagues, where the locusts came down upon Egypt. And Sudan has sent envoys on boats by water (down the Nile River or down the Red Sea) to Jerusalem. This included Eben-Malech, who saved Jeremiah, (Jeremiah 38:7-13) and the treasurer of Queen

Candice (Acts 8:26-40). The prophecy in Isaiah 18 could well refer to Southern Sudan. It speaks of a land "beyond the rivers of Ethiopia" which worships the Lord God. They are described as "a nation tall and smooth of skin," feared all over the world.

Isaiah's Call to England: Being an Exposition of Isaiah the Eighteenth Peter Lang

Africans are not literally black, yet they are called black. Why? This book explores the genesis and evolution of the description of Africans as black, the consequences of this practice, and how it contributes to the denigration (blackening) and dehumanisation of Africans. It uses this analysis to advance a case for abandoning the use of the term 'black' to describe and categorise Africans. Mainstream discussions of the history of European racism have generally neglected the role of black and white colour symbolisms in sustaining the supposed superiority of those labelled white over those labelled black. This work redresses that neglect, by tracing the genesis of the conception of Africans as black in ancient Greece and its continued employment in early Christian writings, followed by an original, close analysis of how this use is replicated in three key representative texts: Shakespeare's Othello, the translation of the Bible into the African language Ewe, and a book by the influential Ghanaian religious leader, Mensa Otabil. It concludes by directly addressing the argument that 'black' can be turned into a positive concept, demonstrating the failure of this approach to deal with the real problems raised by imposing the term 'black' on its human referents.
