Vol.1. ETYMOLOGY, PHILOLOGY AND COMPARATIVE DICTIONARY OF SYNONYMS IN 22 DEAD AND ANCIENT LANGUAGES Tuttle Publishing

This dictionary uses transliteration as the basis for the word entries and makes it easier for the language learners who are not familiar with the Persian script or are not skilled enough in using it. In those few dictionaries which use transliterations, since the alphabetical order is based on Persian script, it is very difficult and in some cases impossible for a non-native speaker to find the word, especially for those who are at the first stages of learning the language. However, in this method, they would be able to find the transliteration as quick as the English word and they can match it with the equivalent word in the script. So, this dictionary is the first one which can be used by those who even do not know writing and reading in Persian script.

Persian language, one of the major Indo-European group of languages, presently known as "Farsi," though corrupted by of intentional and unintentional foreign and native scribes, poets and writers for hundreds of years, still survives with treasures of the original Persian language grammar and words. The author has relearned his mother tongue ie the "Persian language" through more than three decades of constant work on the Avestan, Sanskrit, Pahlavi languages, and through field work, surveying major dialects and semilanguages has now compiled this work "The etymology dictionary of the Persian language," the first in this field for a language with more than three millenia of history. The author is most grateful to the German scholars who had paved the road (see the references), making this research work possible. JGS
