This book examines the experiences of disabled people on public transport to reveal the everyday abuses that many experience there, and the resilience that they need in order to conduct an ordinary life. This work represents an intertwining of personal journeys, with its author writing from first-hand experience, and now working as one of the leading researchers of disability hate crime (DHC) in the UK. DHC is an under-researched area and the findings in this book have implications beyond the public transport context. This book draws on a sample of 56 victim-participants and includes data drawn from public transport regulators, service operators and staff in the UK. Wilkin argues that established legislation needs to be recognised and implemented by regulatory and local authorities in order to reach equality objectives on public transport. Each chapter is clearly structured, accessibly written and includes key definitions which will speak to practitioners and academics with an interest in victimology, policing, social policy, gender studies, disability studies, migration studies, equality studies and religious studies. This book also examines how effectively authorities and service providers safeguard disabled people on UK public transport and reveals adaptive approaches to researching with disabled people.

Social science departments, both nationally and internationally, market boundless career destinations for their graduates but fail to identify the pathways to these lucrative destinations, and appear oblivious to the social forces that threaten their existence, such as the discerning parent's investment in their offspring's education and mounting individual student debt. This book responds to these social forces, drawing on Michael Burawoy's model of Public Sociology to show how a research-centred experiential internship provides opportunities for students to draw on their prior learning and realise their potential to create pathways towards employment. The author demonstrates how a specific, research-based course leading to employment with a non-government organisation or government department was evaluated and incrementally developed, giving voice to its multiple beneficiaries. Designed for university teachers, this book will appeal to those in social science departments who are using an internship, service learning or capstone model for their senior undergraduate classes.

In most schools you will probably see one, if not all of the following: Metal detectors to prevent handguns and other weapons from being brought onto school property Students in standardized uniforms to prevent the appearance of gang affiliations Police officers patrolling the property to deter violent activity as well as respond to incidents Such evolutions have forever changed how we view the safety of our students. However, the phrase "school safety" goes beyond these issues of security put in place to protect students, faculty, and staff. Environmental factors also play a role. The *Comprehensive Handbook of School Safety* expands the dialogue on school safety to comprehensively address the spectrum of safety risks such as bullying, fire safety, playground and transportation safety, and more. Based on research and practical experience, it helps school administrators develop appropriate programs that protect all individuals from harm. Author E. Scott Dunlap brings his experience in OSHA and DOT compliance, behavior-based safety, and organizational safety culture to bear on the issue of school safety. He presents school safety from a holistic perspective and details vulnerability assessment tools and incident investigation forms to help schools develop a comprehensive safety program. By focusing on this range of issues, the book's dynamic perspective puts the keys to achieving an effective safety program within easy reach.
