Murray Stein is well-known as an insightful and pioneering author and academic. *Soul: Treatment and Recovery* presents a selection of papers and book chapters spanning his career from 1973 to 2012. The chapters included in this collection speak for Stein's hope that individuals and humanity as a whole can evolve toward greater consciousness and awareness of meaning in daily life. The book is presented in four parts, each of which represents a stage in Stein's personal development as an author. Part One, *Psyche and Myth*, presents papers which draw on timeless documents of the soul for the benefit of our generations of humans who are no longer contained within mythic consciousness. In Part Two, *Clinical Themes*, Stein has selected papers and an interview that explore themes familiar to many clinicians that were raised in his own practical work as a Jungian psychoanalyst. Part Three is dedicated to the process of individuation, a key notion in analytical psychology which lies at the heart of the Jungian enterprise and is a topic that has occupied Stein throughout his career. Finally, Part Four presents several papers dealing with the theme of psychology and

spirituality, a matter of increasing concern to Stein in recent years. This unique collection of work will be of great interest to analytical psychologists and psychotherapists as well as academics and students in the field. Additionally, for anyone invested in the project of self-discovery and with the desire to relate more deeply to self and world, the papers included here will suggest important points of reference and directions to pursue further.

The Two Faces of Christianity John Hunt Publishing
In this book, using Eric Fromm's distinction between Humanistic and Authoritarian Religions whose implications for Christianity the author explored at some length in his recently published /The Two Faces of Christianity/, he identifies what he believes to be the fundamental psychopathology which has prevented Christianity becoming an unambiguous good for humanity, namely an authoritarian mind-set. Central to this mindset is the idea of God as a controlling force acting on the universe, but separate from it, rather than as a property of 'all that is'. Dr Oxtoby argues that it is this ubiquitous authoritarian thinking, with its emphasis on the need for obedience to imposed authority which lies at the root of the sado-masochistic obsession with pain, suffering and death of the Doctrine of the Atonement.

Confessions of an Inhouse Counsel: How to Give Fee Quotes Like a Rainmaker and Win My Business Suhrkamp Verlag
When Throckmorton P. Gildersleeve bade farewell to Fibber McGee and Molly and left Wistful Vista on a train in 1941, no one could have predicted that he would be riding the airwaves with his own new show until 1957. But when one listens to episodes of radio's first spinoff, it becomes clear the The Great Gildersleeve succeeded because its likable and amusing characters were appealingly fallible, much like the folks each of us knew in our hometowns. This book is a guide to more than 500 episodes of The Great Gildersleeve that are in circulation and also to the scripts of 46 episodes for which no recordings exist. Background

on the development of the program is included, and the appendices include a list of episodes as well as information about cast members, notable occurrences on the program, ratings, and the films and TV series.

The Evolution of the Dragon Routledge

Published in Cooperation with the William P. Clements Center for Southwest Studies, Southern Methodist University This iconic description of the interaction between the vast central plains of the continent and the white Americans who moved there in the mid-nineteenth century has endured as one of the most influential, widely known, and controversial works in western history since its first publication in 1931. Arguing that "the Great Plains environment . . . constitutes a geographic unity whose influences have been so powerful as to put a characteristic mark upon everything that survives within its borders," Walter Prescott Webb identifies the revolver, barbed wire, and the windmill as technological adaptations that facilitated Anglo conquest of the arid, treeless region. Webb draws on history, anthropology, geography, demographics, climatology, and economics in arguing that the 98th Meridian constitutes an institutional fault line at which "practically every institution that was carried across it was either broken and remade or else greatly altered." This new edition of one of the foundational works of western American history features an introduction by Great Plains historian Andrew R. Graybill and a new index and updated design.

Tuning In The Great Gildersleeve McFarland

Applying Eric Fromm's concept of the differences between Humanistic and Authoritarian religions, The Two Faces of Christianity proposes that Christianity consists of two distinctly different religions which co-exist under the same verbal label. The ethical teachings of that inspired Jewish religious genius, Jesus of Nazareth which has traditionally been believed to be the core around which the religion of Christianity has been built,

constitute a Humanistic Religion. In many parts of the Christian Church the tenets of that religion have all but disappeared under the spreading influence of the salvation theology of St Paul and his fellow-travellers. Examination of the guilt-ridden mind of St Paul, to whom the authorship of nearly half of the 27 books of the New Testament has been attributed, throws revealing light on how this process has taken place. Paul's notoriously neurotic anxieties about sex are just one of the more striking manifestations of the psychopathology of his split personality which has been a major influence in the process by which the Humanistic religion of Jesus has been transformed into an oppressive Authoritarian one.

When the space drama *Battlestar Galactica* debuted on ABC in 1978, it was expected to be the most popular new program of the year. Instead, it was attacked as a *Star Wars* rip-off and canceled after a mere 17 stories. The author acknowledges the show was full of dramatic clichés and scientific inaccuracies, but despite these shortcomings, *Battlestar Galactica* was a dramatically resonant series full of unique and individual characters, such as Commander Adama (Lorne Greene) and ace warrior Captain Apollo (Richard Hatch). The author contends that *Battlestar Galactica* was a memorable attempt to make science fiction accessible to mainstream television audiences. The brilliant work of artist John Dykstra brought a new world of special effects to network television. *Battlestar Galactica* also skillfully exploited legends and names from both the Bible and ancient mythology, which added a layer of depth and maturity to the weekly drama.

Barret Baumgart's literary debut presents a haunting and deeply personal portrait of civilization poised at the precipice, a picture of humanity caught between its deepest past and darkest future. In the fall of 2013, during the height of California's historic drought, Baumgart toured the remote military base, NAWA China Lake, near Death Valley, California. His mother, the survivor of a recent stroke, decided to come along for the ride. She hoped the alleged healing power of the base's ancient Native American hot springs might cure her crippling headaches. Baumgart sought to debunk claims that the military was spraying the atmosphere with toxic chemicals to control the weather. What follows is a discovery that threatens to sever not only the bonds between mother and son but between planet Earth and life itself. Stalking the fringes of Internet conspiracy, speculative science, and contemporary archaeology, Baumgart weaves memoir, military history, and investigative journalism in a dizzying journey that carries him from the cornfields of Iowa to drought-riddled California, from the Vietnam jungle to the caves of prehistoric Europe and eventually the walls of the US Capitol, the sparkling white hallways of the Pentagon, and straight into the contradicted heart of a worldwide climate emergency.

Many people have an aptitude for religious experience and spirituality but don't know how to develop this or take it further. Modern societies offer little assistance, and traditional religions are overly preoccupied with their own organizational survival. *Minding the Self: Jungian meditations on contemporary spirituality* offers suggestions for individual spiritual development in our modern and post-modern times. Here, Murray Stein argues that C.G. Jung and depth psychology provide guidance and the foundation for a new kind of modern spirituality. Murray Stein explores the problem of spirituality within the cultural context of modernity and offers a way forward without relapsing into traditional or mythological modes of consciousness. Chapters work towards finding the proper vessel for contemporary spirituality and dealing with the ethical issues that crop up along the way. Stein shows how it is an individual path but not an isolationist one, often using many resources borrowed from a variety of religious traditions: it is a way of symbol, dream and experiences of the numinous with hints of transcendence as these come into personal awareness. *Minding the Self: Jungian meditations on contemporary spirituality* uses research from a wide variety of fields, such as dream-work and the neuroscience of the sleeping brain, clinical experience in Jungian psychoanalysis, anthropology, ethics, Zen Buddhism, Jung's writings and the recently published *Red Book*. It will be of interest to psychoanalysts, Jungian scholars, undergraduates, graduate and post-graduate students and anyone with an interest in modern spirituality.
