Christianity believes in a God who acts in history. The Bible tells us the story of God's actions in Israel, culminating in the ministry of Jesus of Nazareth and the spreading of the gospel from Jerusalem to Rome. The issue of history is thus unavoidable when it comes to reading the Bible. Volume 4 of the Scripture and Hermeneutics Series looks at how history has dominated biblical studies under the guise of historical criticism. This book explores ways in which different views of history influence interpretation. It considers the implications of a theology of history for biblical exegesis, and in several case studies it relates these insights to particular texts. "Few topics are more central to the task of biblical interpretation than history, and few books open up the subject in so illuminating and thought-provoking a manner as this splendid collection of essays and responses." Hugh Williamson, Regius Professor of Hebrew, University of Oxford, England ". . . breaks new ground in its interdisciplinary examination of the methodology, presuppositions, practices and purposes of biblical hermeneutics, with a special emphasis on the relation of faith and history." Eleonore Stump, Robert J. Henle Professor of Philosophy, Saint Louis University, United States "This volume holds great promise for the full-fledged academic recovery of the Bible as Scripture. It embodies an unusual combination of world-class scholarship, historic Christian orthodoxy, bold challenges to conventional wisdom, and the launching of fresh new ideas." Al Wolters, Professor of Religion and Theology, Redeemer University College, Ontario, Canada "The essays presented here respect the need and fruitfulness of a critical historiography while beginning the much-needed process of correcting the philosophical tenets underlying much modern and postmodern biblical research. The result is a book that mediates a faith understanding, both theoretical and practical, of how to read the Bible authentically as a Christian today." Francis Martin, Chair, Catholic-Jewish Theological Studies, John Paul II Cultural Center, Washington, D.C. Not only is history central to the biblical story, but from a Christian perspective history revolves around Jesus Christ. All roads of human activity before Christ lead up to him, and all roads after Christ connect with him. A concern with history and God's action in it is a central characteristic of the Bible. The Bible furnishes us with an account of God's interactions with people and with the nation of Israel that stretches down the timeline from creation to the early church. It tells us of real men, women, and children, real circumstances and events, real cultures, places, languages, and worldviews. And it shows us God at work in human affairs, revealing his character and heart through his activities. "Behind" the Text examines the correlation between history and the Bible. For the scholar, student, and informed reader of the Bible, this volume highlights the importance of history for biblical interpretation, and looks at how history has and should influence interpretation.

Territorial autonomy in Spain has reached a crossroads. After over thirty years of development, the consensus regarding its appropriateness has started to crumble. The transformation project embodied by the reform of Statute of Catalonia (2006) has failed to achieve its most significant demands. Although the concept of Spain as a Federation is disputed -more within the country than beyond-, the evolution of the Spanish system needs to follow a markedly federalist path. In this perspective, reference models assume critical importance. This edition gathers the works of a broad group of European, American and Spanish experts who analyse the present-day challenges of their respective systems. The objective, thus, is to contribute ideas which might help to address the evolution of the Spanish system in the light of the experience of more established Federations. This first volume analyses the challenges facing federal systems in the age of globalisation from a global perspective. It also addresses current questions and the challenges faced today by, in the sphere of the internal division of powers, the most significant 'western' federal systems, on the one hand, and the Spanish system of territorial autonomy, on the other.

In this volume a range of authors from different international contexts argue that the notion of communicative competence in English, hitherto largely referenced to metropolitan native-speaker norms, has to be expanded to take account of diverse contexts of use for a variety of purposes. It also discusses the popular belief that language and literacy should simply be regarded as a technical 'skill' which confers universal benefits and that it should be replaced with a social practice view that recognises situated variations and diversity. This volume, we believe, provides a reference point for extended research and practice in these areas that will be of interest to wide range of people engaged in language and literacy education.

In response to the COVID-19 pandemic, many educational institutions implemented social distancing interventions such as initiating closure, developing plans for employees to work remotely, and transitioning teaching and learning from face-to-face classrooms to online environments. The abrupt switch to online teaching and learning, for the most part, has been a massive change for administration, faculty, and students at traditional brick-and-mortar universities and colleges as concerns regarding the pedagogical soundness of this mode of delivery remain among some stakeholders. Not only that, but the switch has also revealed the inequities in the system when it comes to the types of students universities serve. It is important as institutions move forward with online instruction that consideration be made about all students and what policies and strategies need to be put into place to help support and meet the needs of all constituents now or when unprecedented situations arise. The only way this can be done is by documenting the experiences through the eyes of faculty who were at the frontline of providing instruction and advising services to students. The Handbook of Research on Inequities in Online Education During Global Crises brings to light the struggles faculty and students faced as they were required to switch to online education during the global COVID-19 health crisis. This crisis has revealed inequities in the educational system as well as the specific effects of inequities when it comes to learning online, and the chapters in this book provide information to help institutions be

better prepared for online education or remote learning in the future. While highlighting topics such as new educational trends, remote instruction, diversity in education, and teaching and learning in a pandemic, this book is ideal for in-service and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in the inequalities within the educational systems and the new policies and strategies put in place with online education to combat these issues and support the needs of all diverse student populations.

For the pastor or serious layperson, the realm of biblical interpretation can be a confusing maze of personalities, communities, methods, and theories. This maze can often result in obscuring the main goal of interpreting Scripture: hearing and knowing God better. The Dictionary for Theological Interpretation of the Bible is a groundbreaking reference tool that introduces readers to key names, theories, and concepts in the field of biblical interpretation. It discusses these approaches and evaluates their helpfulness in enabling Christians to hear what God is saying to the church through Scripture. The contributors come from a variety of backgrounds, and the dictionary covers a broad range of topics with both clarity and depth.

The Indian Subcontinent has been at the centre of folklore inquiry since the 19th century, yet, while much attention was paid to India by early scholars, folkloristic interest in the region waned over time until it virtually disappeared from the research agendas of scholars working in the discipline of folklore and folklife. This fortunately changed in the 1980s when a newly energized group of younger scholars, who were interested in a variety of new approaches that went beyond the textual interface, returned to folklore as an untapped resource in South Asian Studies. This comprehensive volume further reinvigorates the field by providing fresh studies and new models both for studying the "lore" and the "life" of everyday people in the region, as well as their engagement with the world at large. By bringing Muslims, material culture, diasporic horizons, global interventions and politics to bear on South Asian folklore studies, the authors hope to stimulate more dialogue across theoretical and geographical borders to infuse the study of the Indian Subcontinent's cultural traditions with a new sense of relevance that will be of interest not only to areal specialists but also to folklorists and anthropologists in general. This book was originally published as a special issue of South Asian History and Culture.

Anthony C Thiselton and the Grammar of Hermeneutics Litres

The idea of determinate or single meaning in biblical interpretation has long been considered to be a purely modern idea, indissolubly wedded to the hermeneutics of historical criticism. At a time when historical criticism is increasingly viewed with theological suspicion, it must be asked whether determinate meaning has a future in biblical interpretation. Written for *Our Learning* explores the various expressions of single meaning within Christian theology, from the apostolic period to the present, and argues for the preservation of the discernment of determinate meaning as the goal of biblical reading and study.

A provisional and preliminary attempt to show how the formative hermeneutical thinking of Anthony C. Thiselton - once systematized and critiqued - can begin to resolve the major problems found in the discipline of hermeneutics today, most notably its varying 'disunities' - theoretical, practical, and inter-disciplinary. This book aims to show that the formative thinking of Anthony C. Thiselton provides valuable insights for a programmatic

construction towards a unified hermeneutical theory. This construction provides powerful keys for unlocking six contemporary problems in hermeneutics: disorganization, complexity, abstraction, theoretical disunity on several levels, inter-disciplinary polarization, and irresponsible interpretation. Robert Knowles' exhaustive analysis engages critically and creatively.

There is a strong link between organisational culture and profit after all a happy workforce is a productive workforce. Yet a culture of inertia rather than innovation prevails in many organisations. Wise leaders, however, know how to work with the grain of human value and worth, harnessing it, so as to add shared value both for the organisation and for the good of society. So, how can astute leaders set the right conditions for creativity and cultivate non-economic goods, such as time and relationships, that make for a happy, effective workforce? The author proposes the notion of organisational culture as 'environments of value' wherein inner value translated into external value is embedded within the triple bottom line and indeed an awareness of how an organisation is like a force field: it exercises power and leaves a footprint. This construct informs the emerging concept of Shared Value as requiring five literacies about: [Shareholder value and return for risk [Value for the social environment linked to respect for the natural environment [Inner value of those in the enterprise, which, when unlocked, releases energies and adds value [Nurture of non-quantifiable qualities that promote human flourishing [Understandings of how power relations distort the way organisations operate He clearly signposts the link between promoting an environment of value within which these literacies flourish and the added value for the organisation arising from such a culture.
