EWING ALYSON

Special Issue: Issues in Banking and International Finance Palgrave Macmillan

This work studies the economic foundations of the international covenant on economic, social and cultural rights. It is argued that legal principles alone cannot fully actualise this instrument: only sustained inter-disciplinary elaboration of its guarantees can give this instrument full effect.

Financial Markets and Institutions New Age International

This textbook covers financial systems and services, particularly focusing on present systems and future developments. Broken into three parts, Part One establishes the public institutional framework in which financial services are conducted, defines financial service systems, critically examines the link between finance, wealth and income inequality, and economic growth, challenges conventional paradigms about the *raison d'être* of financial institutions and markets, and considers the loss of US financial hegemony to emerging regional entities [BRICS]. Part Two focuses on financial innovation by explaining the impact of the following technologies: cryptography, FinTech, distributed ledger technology, and artificial intelligence. Part Three assesses to what extent financial innovation has disrupted legacy banking and the delivery of financial services, identifies the main obstacles to reconstructing the whole financial system based upon "first principles thinking": Nation State regulation and incumbent interests of multi-national companies, and provides a cursory description of how the pandemic of COVID-19 may establish a "new normal" for the financial services industry. Combining rigorous detail alongside exercises and PowerPoint slides for each chapter, this textbook helps finance students understand the wide breadth of financial systems and speculates the forthcoming developments in the industry. A website to serve as a companion to the textbook is available here: www.johnjaburke.com.

Das Lehrbuch beschreibt die Bewertung von sicheren und unsicheren Sach- und Finanzinvestitionen unter der Annahme von arbitragefreien und friktionslosen Finanzmärkten. Im Mittelpunkt steht dabei die Investitionsbewertung nach dem Duplikationsprinzip. Auf letzterem Bewertungsprinzip basieren sowohl die klassische Kapitalwertformel für Sachinvestitionen, die mittlerweile klassische Bewertungsformel von Black, Scholes und Merton für Aktienoptionen als auch neuere Varianten für Zins- und Kreditderivate. Alle wesentlichen Ergebnisse sind übersichtlich in sogenannten Eigenschaften zusammengefasst und werden mit vielen Illustrationen und Beispielen veranschaulicht. Übungsaufgaben bieten eine solide Grundlage für Veranstaltungen des finanzwirtschaftlichen Hauptstudiums, für Weiterbildungsseminare sowie zum eigenständigen Erlernen der Inhalte.

At these workshops usually some 20 central banks from Europe, the Federal Reserve Board and various other central banks were present. Furthermore the workshops contain papers from international organizations such as the OECD, European Commission, Bank for International Settlement, government ministries, commercial banks, research institutes and academics from Europe and elsewhere.
