In the Information Age, the personal computer is becoming as pervasive as the telephone and television. It accesses vast stores of constantly changing information and the ability to navigate it and the Internet has become a professional necessity for a majority of white and blue collar jobs. And the key to opening that doorway is computer-based learning—"e-learning." Using computers for education and training, an industry that barely existed a decade ago, is a fast-growing business opportunity for enterprising people who enjoy helping others learn and who are comfortable with computers. Start Your Own e-Learning Business shows you how to become the person people turn to when they need to catch up on essential skills and knowledge. This guide covers the vast selection of roles you can choose from, including: • Teaching businesses computer basics, management techniques, or programming skills • Publishing guides to help employees understand their firm's software • Producing interactive content that explains products to customers • Creating Web sites to help students do their homework or seniors hone their Internet skills • Providing content, marketing help, or tech services for other e-learning firms • Brokering classes, recruiting students, or reselling CD-based courses for other businesses

Give students a well-rounded introduction to web development and design. Web Development and Design Foundations with HTML5 introduces HTML and CSS topics such as text configuration, color configuration, and page layout, with an enhanced focus on the topics of design, accessibility, and Web standards. The text relates both the necessary hard skills (such as HTML5, CSS, and JavaScript) and soft skills (design, e-commerce, and promotion strategies) considered fundamental to contemporary web development. An emphasis on hands-on practice provides a well-rounded foundation to help students as they pursue careers as web professionals. The updated and expanded 10th Edition contains current coverage of HTML5, expanded coverage of designing for mobile devices, and more. Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience. It lets students highlight and take notes, all in one place, even when offline. Seamlessly integrated videos engage students and give them access to the help they need, when they need it. Educators can easily schedule readings, customize the table of contents, and share their own notes with students so they see the connection between their eText and what they learn in class - motivating them to keep reading, and keep learning. And, reading analytics offer insight into how students use the eText, helping educators tailor their instruction. NOTE: This ISBN is for the Pearson eText access card. For students purchasing this product from an online retailer, Pearson eText is a fully digital delivery of Pearson content and should only be purchased when required by your instructor. In addition to your purchase, you will need a course invite link, provided by your instructor, to register for and use Pearson eText.

This is a hands-on, practical guide for learning React. We assume that you know HTML and JavaScript pretty well, and that you're comfortable with CSS, meaning that you know what CSS rules are and how to apply them with classes and styles. We start the book off with a lesson on some of JavaScript's more advanced features, many of which we use throughout the book. You should, at the very least, page through that lesson to make sure you're familiar with those aspects of JavaScript. From there, we jump into React. You'll start off with a simple "Hello, world!" app, and then we'll begin walking you through creating a small, but featureful math app. This will give you the skills you need to build many different types of React applications. When reading this book, you should be sitting at your computer. When you first begin, plan to spend at least two uninterrupted hours. You should do your best to get through lesson 3 in the first sitting. That will get you through the foundational learning. From there on out, you'll be hopping back and forth between the book and viewing, editing, and writing code on your computer. Go through the book slowly and methodically. Read every demo carefully. Work through every exercise. You cannot learn to code through reading alone. You must practice. When you have finished working through this book, you will be comfortable building React applications.
