Physical Therapy Clinical Handbook for PTAs Jones & Bartlett Learning

Fundamental Concepts and Skills for Nursing, 5th Edition provides all the basic theoretical and applied knowledge that the LPN/LVN nurse needs to practice in an expanded number of care settings, such as the community clinic, physician's office, long-term care facility, home, and acute-care hospital setting. With an extensive art program and thorough discussion of QSEN, this text addresses topics like the physical and psychosocial needs of the patient, critical thinking for problem solving and clinical judgment, and communication — all within a strong nursing process framework. The accessible, friendly, and clear writing style appeals to students and instructors, and its rich ancillary package, including NCLEX-PN® review questions, gives students an edge on learning fundamentals. Concept maps give a visual example of concepts addressed in the text, help you visualize difficult material, and illustrate how a disorder's multiple symptoms, treatments, and side effects are associated. Over 110 skills and steps, featuring sample documentation examples and Home Care Considerations boxes where appropriate, present step-by-step procedures in an action/rationale format. Life Span Considerations: The Older Adult highlight changes that occur with aging and how they affect nursing care by LPN/LVNs working in community and long-term care. Easy-to-follow reading level and text organization presents information from simple to most complex, making it perfect for lower level students and those speaking English as a second language. Numbered objectives, divided by theory and clinical practice, provide a framework for content. Cultural Considerations cover biocultural variations, as well as health promotion for specific ethnic groups, so you provide culturally competent care. Health Promotion and Patient Teaching boxes include guidelines to prevent illness, promote health, and develop self-care strategies. Nursing process framework features application of the nursing process and nursing care plans to reinforce application of the nursing process in the clinical setting. Think Critically boxes encourage you to synthesize information and apply concepts to practice. Home Care Considerations boxes highlight the necessary adaptations of nursing skills and techniques for the patient in the home care setting. Communication boxes present examples of nurse-patient dialogues and instructive therapeutic communication techniques. Over 20 nursing care plans, which include critical thinking questions at the end of the text, provide you with a model for planning patient care. Clinical chapters provide an overview of structure and function to give you a refresher in related anatomy and physiology, including a section on aging. Key terms include phonetic pronunciations, which are helpful for ESL students, and text page references to find the definition. Standard LPN Threads features include helpful characteristics such as full-color design, key terms, numbered objectives, key points, critical thinking questions, critical thinking activities, glossary, and references.

The Role of the Physical Therapist Assistant Elsevier Health Sciences

Handbook of Home Health Standards: Quality, Documentation, and Reimbursement includes everything the home care nurse needs to provide quality care and effectively document care based on accepted professional standards. This handbook offers detailed standards and documentation guidelines including ICD-9-CM (diagnostic) codes, OASIS considerations, service skills (including the skills of the multidisciplinary health care team), factors justifying homebound status, interdisciplinary goals and outcomes, reimbursement, and resources for practice and education. The fifth edition of this "little red book" has been updated to include new information from the most recently revised Federal Register Final Rule and up-to-date coding. All information in this handbook has been thoroughly reviewed, revised, and updated. Offers easy-to-access and easy-to-read format that guides users step by step through important home care standards and documentation guidelines Provides practical tips for effective documentation of diagnoses/clinical conditions commonly treated in the home, designed to positively influence reimbursement from third party payors. Lists ICD-9-CM diagnostic codes, needed for completing CMS billing forms, in each body system section, along with a complete alphabetical list of all codes included in the book in an appendix. Incorporates hospice care and documentation standards so providers can create effective hospice documentation. Emphasizes the provision of quality care by providing guidelines based on the most current approved standards of care. Includes the most current NANDA-approved nursing diagnoses so that providers have the most accurate and up-to-date information at their fingertips. Identifies skilled services, including services appropriate for the multidisciplinary team to perform. Offers discharge planning solutions to address specific concerns so providers can easily identify the plan of discharge that most effectively meets the patient's needs. Lists the crucial parts of all standards that specific members of the multidisciplinary team (e.g., the nurse, social worker) must uphold to work effectively together to achieve optimum patient outcomes. Resources for care and practice direct providers to useful sources to improve patient care and/or enhance their professional practice. Each set of guidelines includes patient, family, and caregiver education so that health care providers can supply clients with necessary information for specific problems or concerns. Communication tips identify quantifiable data that assists in providing insurance case managers

with information on which to make effective patient care decisions. Several useful sections make the handbook thorough and complete: medicare guidelines; home care definitions, roles, and abbreviations; NANDA-approved nursing diagnoses; guidelines for home medical equipment and supplies. Small size for convenient carrying in bag or pocket! Provides the most up-to-date information about the newest and predominant reimbursement mechanisms in home care: the Prospective Payment System (PPS) and Pay For Performance (P4P). Updated terminology, definitions, and language to reflect the federal agency change from Health Care Financing Administration (HCFA) to Centers for Medicare & Medicaid Services (CMS) and other industry changes. Includes the most recent NANDA diagnoses and OASIS form and documentation explanations. New interdisciplinary roles have been added, such as respiratory therapist and nutritionist. /LI>

This book is designed to foster quality care to home care recipients. It is written for companions, home health aides, and other care givers who deliver non-medical home care. Prieto provides information, tips, and techniques on personal care routines as well as additional responsibilities that are often necessary in this work, including home safety and maintenance, meal planning, errand running, caring for couples, and making use of recreational time. Going beyond standard nurses' aide training manuals, the book focuses on the psycho-social needs of home care recipients, stressing the need to maintain the house as a home and sustaining the recipient's way of life throughout caregiving situations. Prieto stresses interpersonal skills that benefit recipient and caregiver, creating a systematic, easy-to-follow plan for delivering quality service and maintaining, or improving, quality of life.

Better patient management starts with better documentation! Documentation for Rehabilitation: A Guide to Clinical Decision Making in Physical Therapy, 3rd Edition shows how to accurately document treatment progress and patient outcomes. Designed for use by rehabilitation professionals, documentation guidelines are easily adaptable to different practice settings and patient populations. Realistic examples and practice exercises reinforce concepts and encourage you to apply what you've learned. Written by expert physical therapy educators Lori Quinn and James Gordon, this book will improve your skills in both documentation and clinical reasoning. A practical framework shows how to organize and structure PT records, making it easier to document functional outcomes in many practice settings, and is based on the International Classification for Functioning, Disability, and Health (ICF) model - the one adopted by the APTA. Coverage of practice settings includes documentation examples in acute care, rehabilitation, outpatient, home care, and nursing homes, as well as a separate chapter on documentation in pediatric settings. Guidelines to systematic documentation describe how to identify, record, measure, and evaluate treatment and therapies - especially important when insurance companies require evidence of functional progress in order to provide reimbursement. Workbook/textbook format uses examples and exercises in each chapter to reinforce your understanding of concepts. NEW Standardized Outcome Measures chapter leads to better care and patient management by helping you select the right outcome measures for use in evaluations, re-evaluations, and discharge summaries. UPDATED content is based on data from current research, federal policies and APTA guidelines, including incorporation of new terminology from the Guide to Physical Therapist 3.0 and ICD-10 coding. EXPANDED number of case examples covers an even broader range of clinical practice areas.
