Organized around four commonplaces of education—learners and learning, subject matter, teachers and teaching, and classroom environment—Elementary Social Studies provides a rich and ambitious framework to help social studies teachers achieve powerful teaching and learning results. By blending the theoretical and the practical, the authors deeply probe the basic elements of quality instruction—planning, implementation, and assessment—always with the goal of creating and supporting students who are motivated, engaged, and thoughtful. Book features and updates to the fourth edition include:

- Two new chapters on using the Inquiry Design Model (IDM) to understand inquiry-based teaching

and learning and to develop IDM inquiries. • Revised chapter on ideas and questions. • Revised chapter on literacy to more fully incorporate media literacy and digital citizenship. • Real-classroom narratives introduce chapters and provide in-depth access to teaching and learning contexts. • Practical curriculum and resource suggestions for the social studies classroom. • End-of-chapter summaries and annotated teaching resources.

Math Word Problems Carson-Dellosa Publishing

This volume is a direct result of an international conference that brought together a number of scholars from Europe and the United States to discuss their ideas and research about cognitive and instructional processes in history and the social sciences. As such, it fills a major gap in the study of how people learn and reason in the context of particular subject matter domains and how instruction can be improved in order to facilitate better learning and reasoning. Previous cognitive work on subject matter learning has been focused primarily upon mathematics and physics; the present effort provides the first such venture examining the history and social science domains from a cognitive perspective. The different sections of the book cover topics related to comprehension, learning, and instruction of history and the social sciences, including: *the development of some social sciences concepts, *the teaching of social sciences -- problems and questions arising from this cognitive perspective of learning, *the comprehension and learning from historical texts, *how people and students understand historical causality and provide explanations of historical events, and *the deduction processes involved in reasoning about social sciences contents. This volume will be useful for primary and secondary school teachers and for cognitive and instructional researchers interested in problem solving and reasoning, text comprehension, domain-specific knowledge acquisition and concept development.

In the 21st century, digital tools enable information to be generated faster and in greater profusion than ever before, to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools, and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching, and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered, but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists, to consider how learners need to be equipped in an educational

environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged, and new literacies, including information literacy and IT literacy, need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate, and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky, provides the foreword. The book is in two parts: In Part 1, Literacies in the Digital Age, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed, and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, Enabling and Supporting Digital Literacies, the contributors go on to consider the ways in which digital literacies can be made available to learners, and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning. Readership: This book takes the issues raised in the successful Information and IT Literacy, also co-edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.

The main purpose of this study is to determine the level of use of primary sources in the 6th Grade Social Studies Course Books. The "document analysis" method from among the qualitative research methods was used in the study. The study was conducted on 4 books from among the Social Studies course books published by total of 6 Publishing Houses accredited by the Republic of Turkey Ministry of National Education Head Council of Education and Morality. The "Primary Source Utilization List", which was prepared based on the literature review carried out by the researchers, was used for data collection. The research data were analyzed descriptively in the form of frequency on the basis of these criteria and research questions. The findings were interpreted with supporting examples from the relevant course books. According to the results obtained at the end of the study, the image sources were used the most and the audio and the community sources the least in all course books. In terms of the fields of learning, the field in which the primary sources are used the most was the "Turks on the Silk Road". (Contains 2 tables and 6 figures.).
